

# Ping, the app that helps restaurants get their supplies locally.

---

for Kraft Heinz • 2020, 12-week project

Mission

**Help KHC enter  
the healthy food  
business**

KraftHeinz

Client based in Chicago

Context

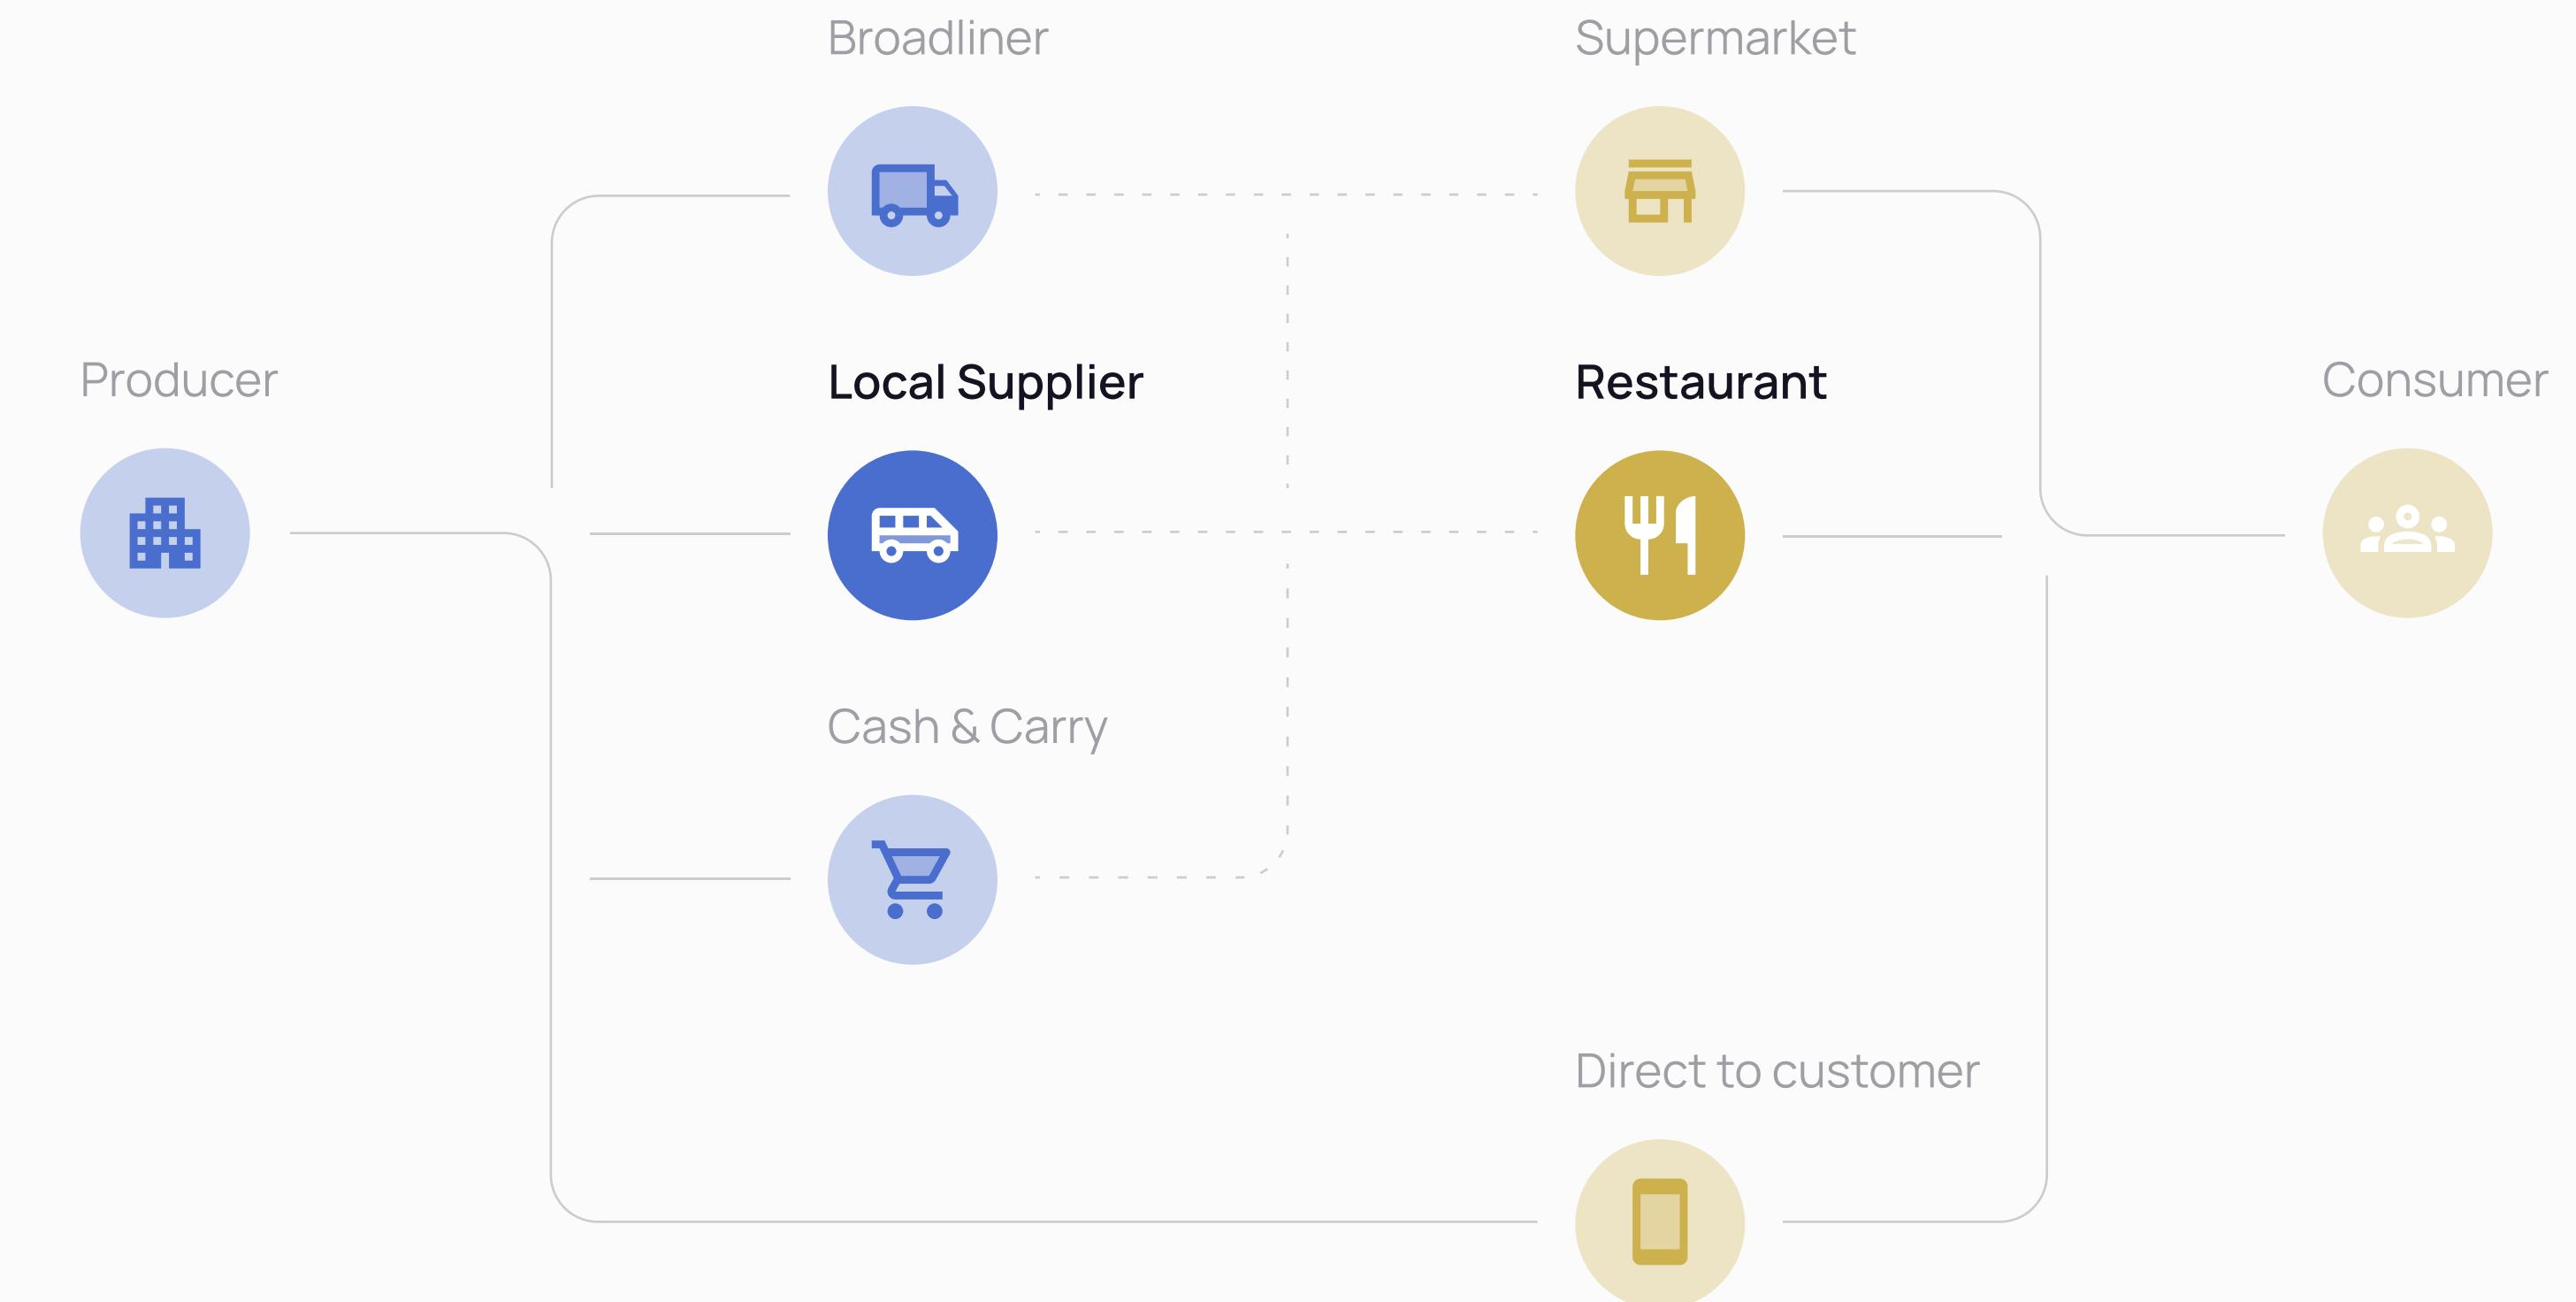

# Exploring an industry with many actors

## Initial ideas

B2B, B2C, Production side, Consumption side...

## Selected idea

The Restaurant-Supplier relationship

## Initial Research

# Local Food Suppliers

## Company

**10-20**  
people team

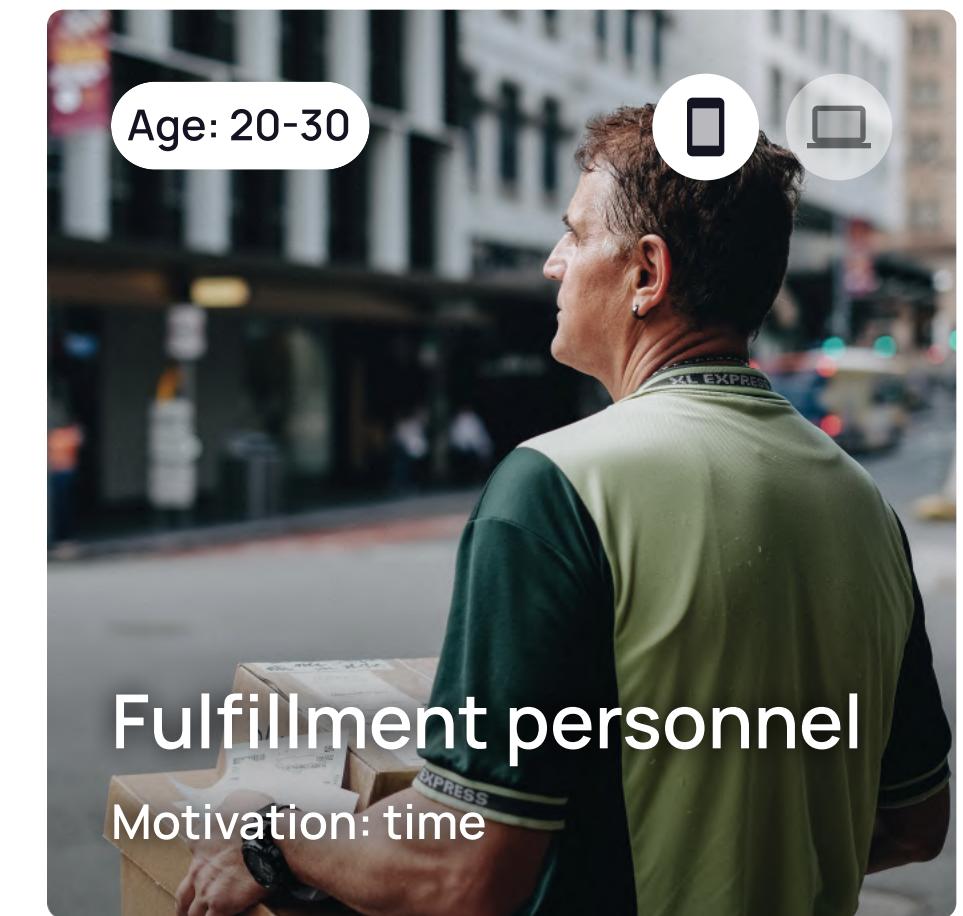

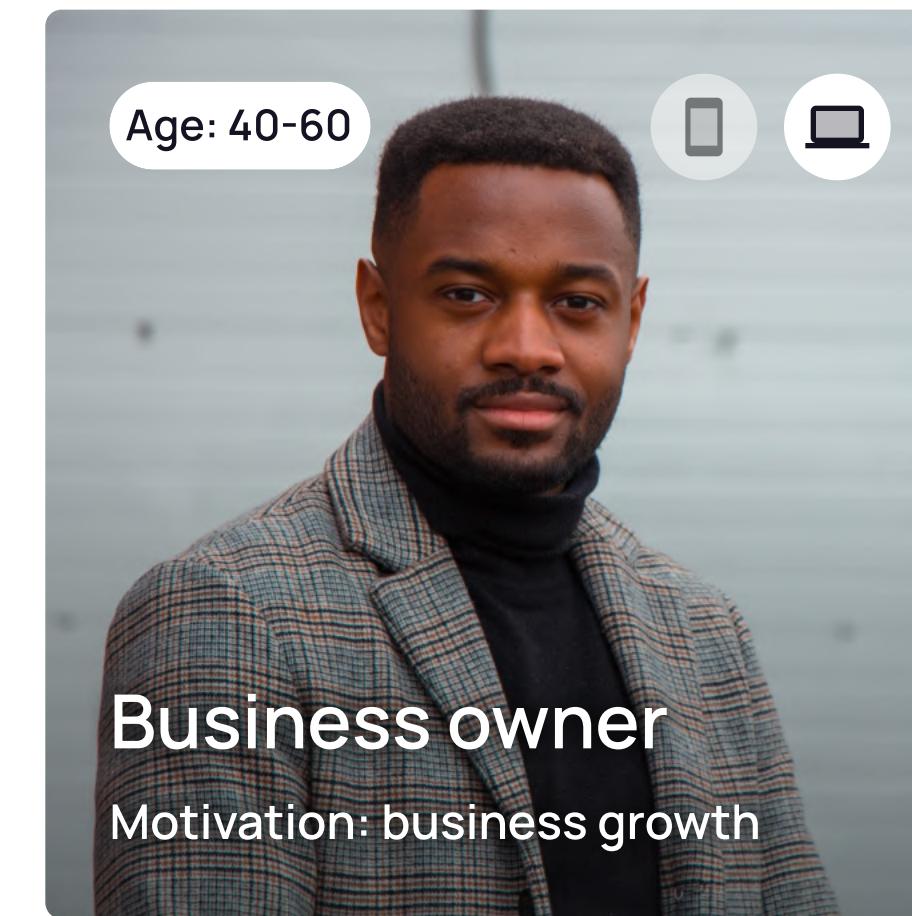

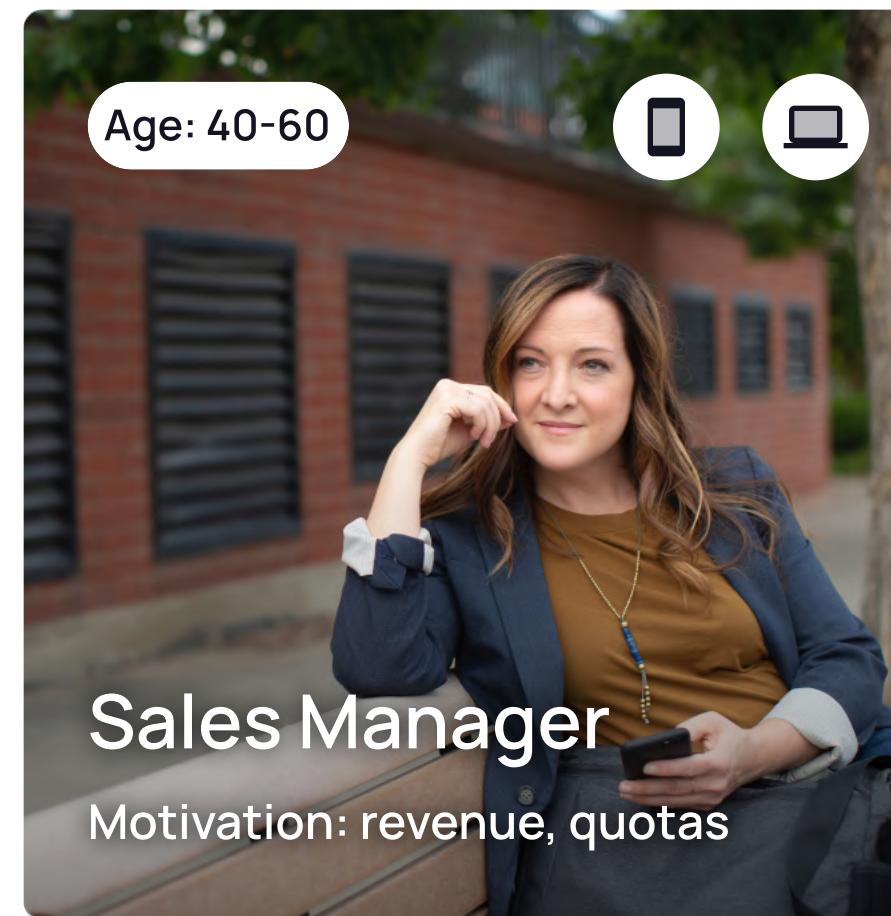

**1**  
food category

**1**  
local zone

**20%**  
lower prices

**Best**  
quality

## People

## Journey

Acquiring new restaurants  
Deprioritized

Weekly orders  
Repetitive, no history

Frequent price updates  
Reactive, not proactive

Payments  
Low fees over practicality

Prep & fulfillment  
Communication errors

## Initial Research

# Independent Restaurants

### Company

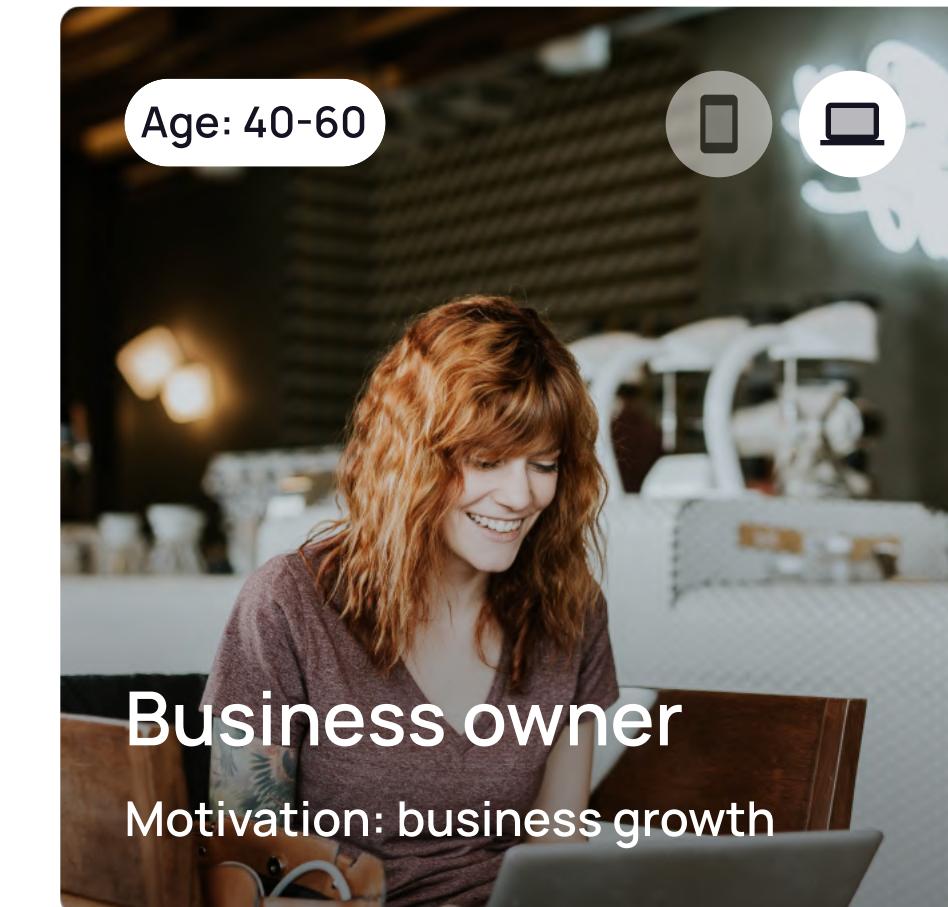

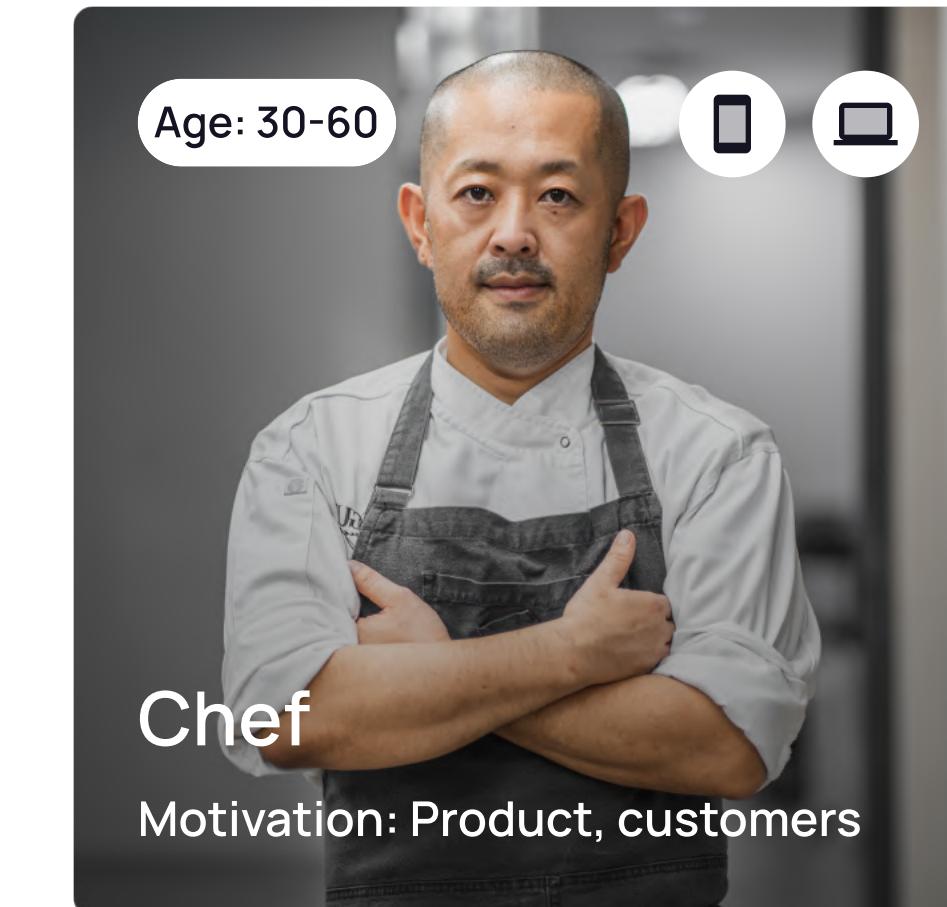

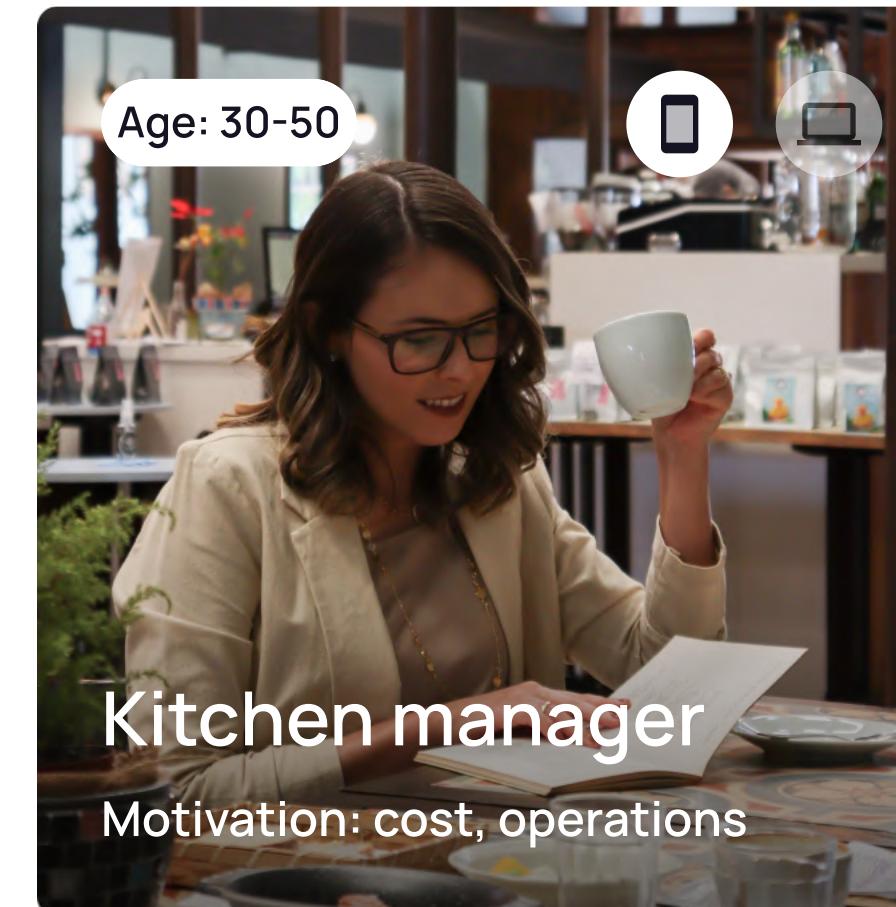

**30%**  
of total costs

**\$2k**  
weekly order

**5h**  
on procur.

**Costs**  
driven

### People

### Journey

**Supply discovery**

Fragmented price-shopping

**Ordering**

Decentralized

**Re-ordering**

Repetitive

**Payment**

Focus on cashflow

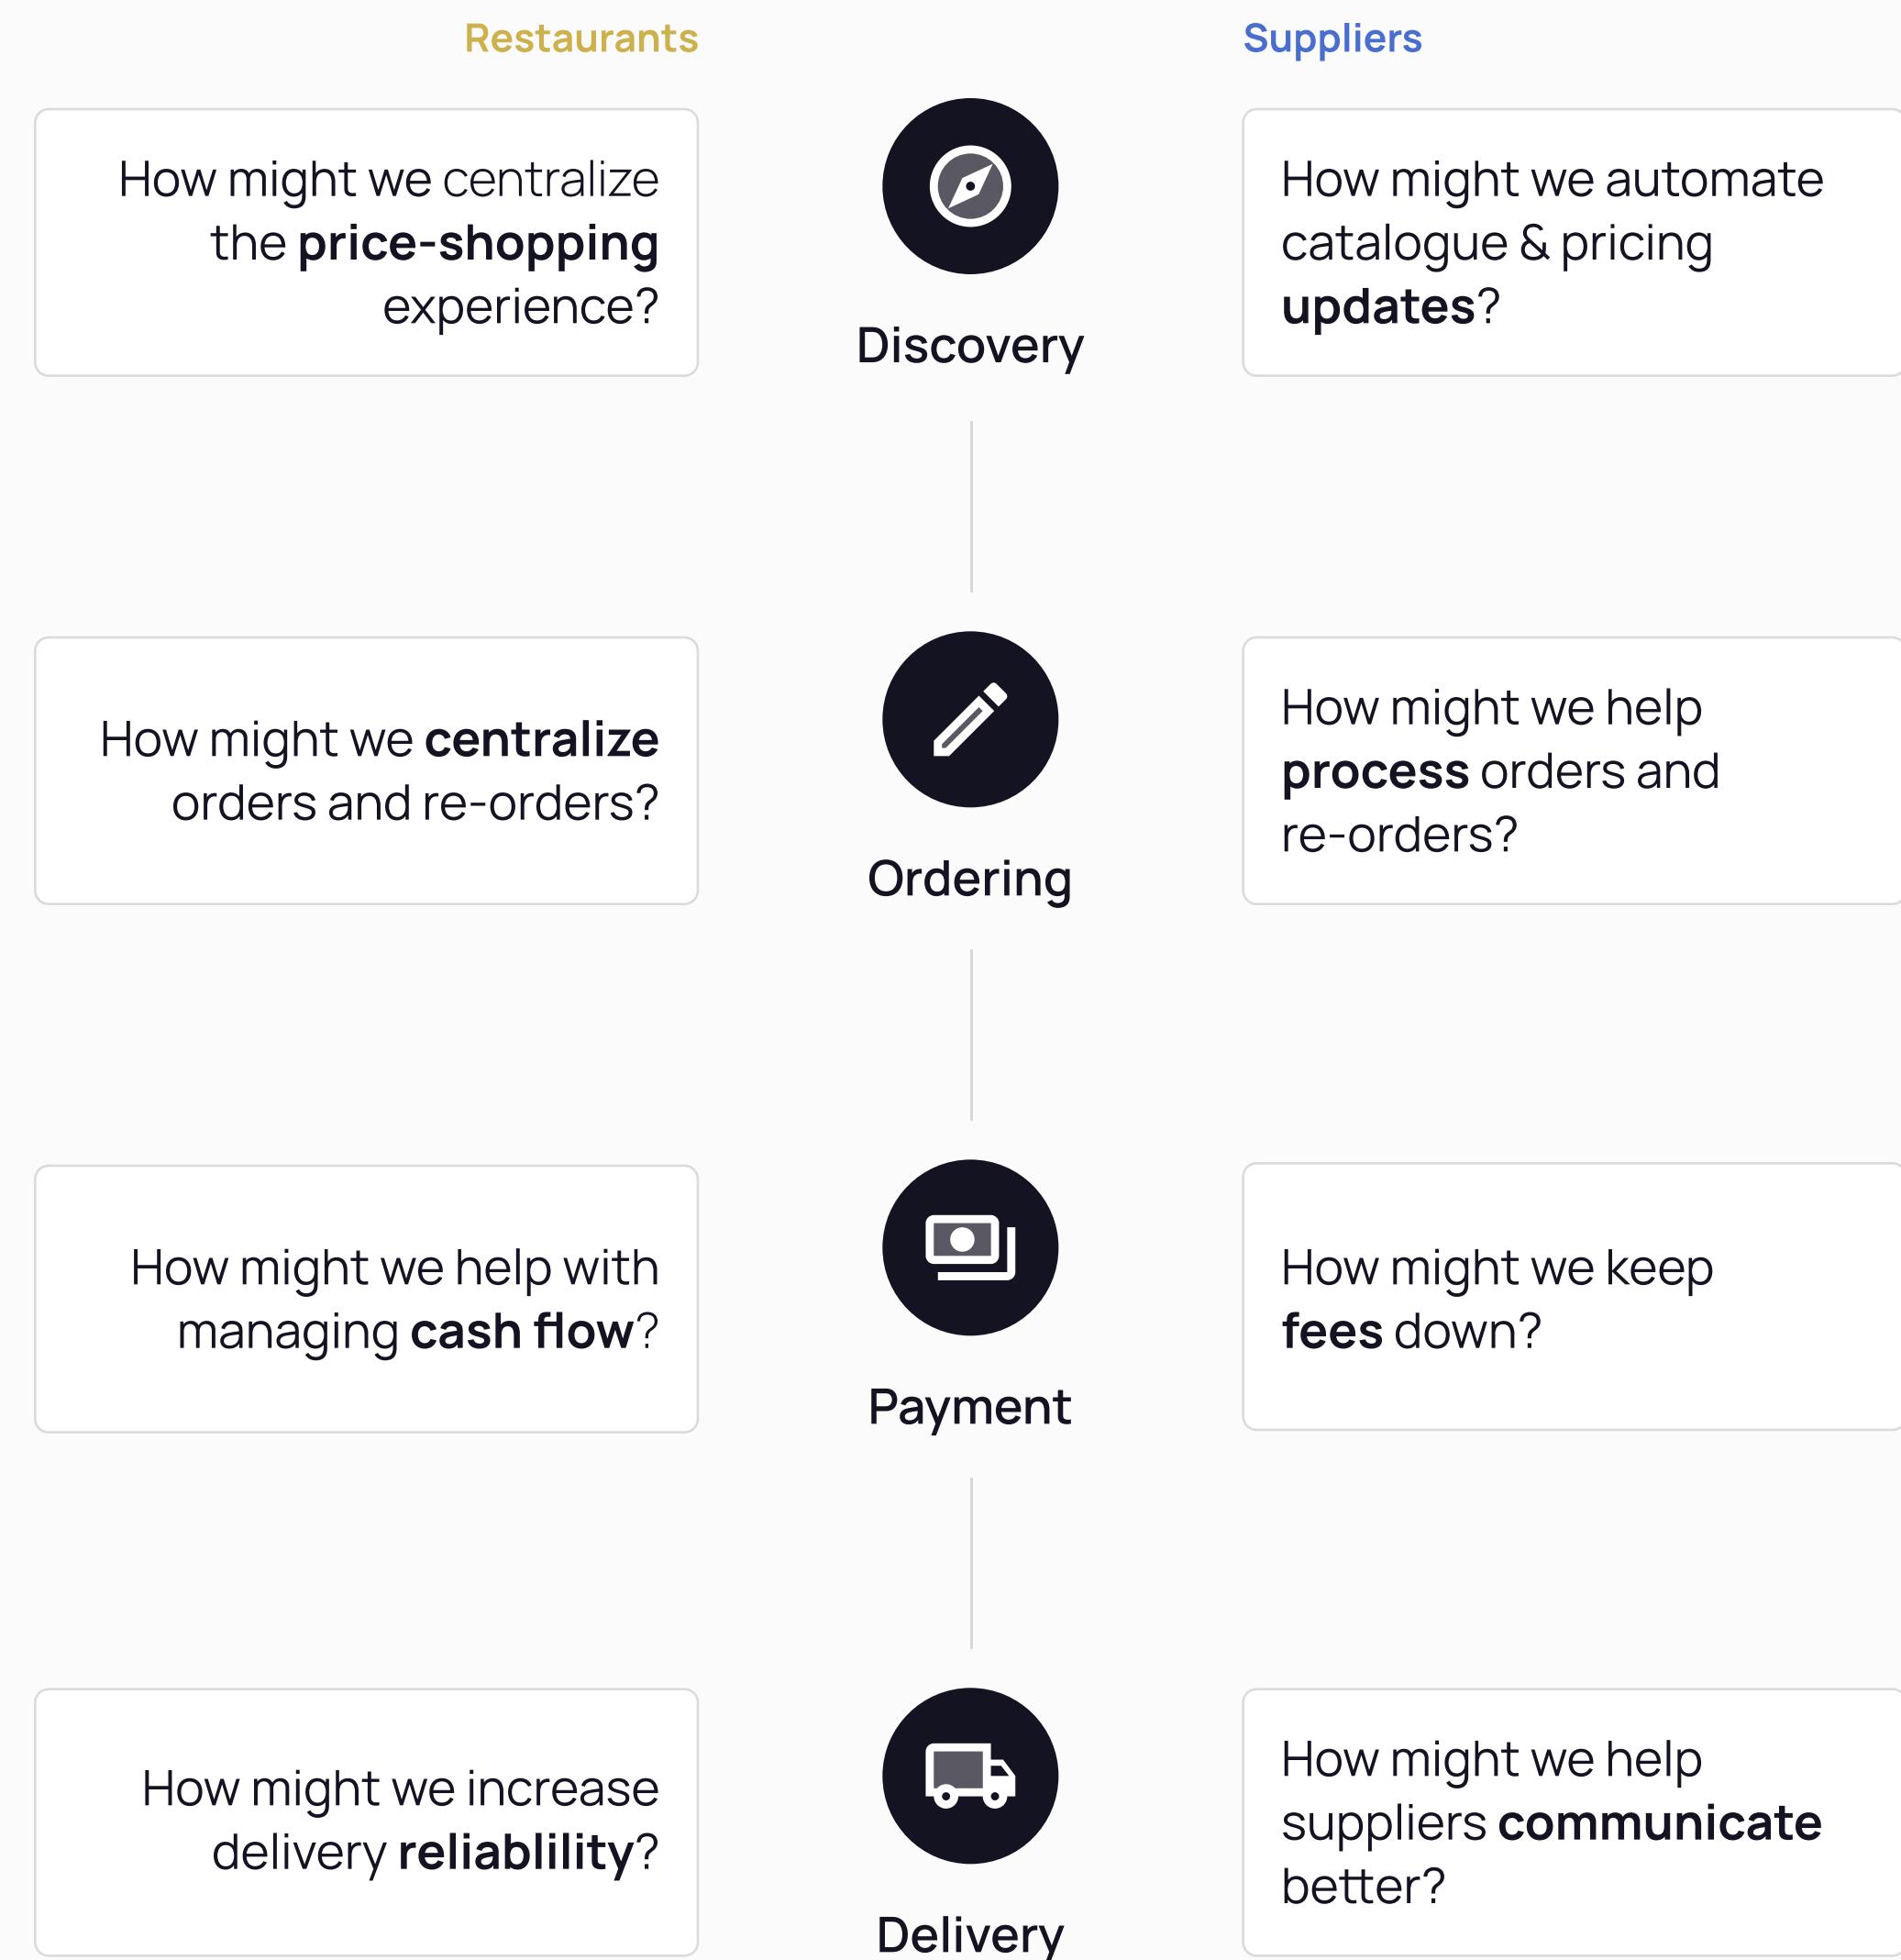

**Delivery**

Unreliable, large windows

# Four areas of collaboration

People goals

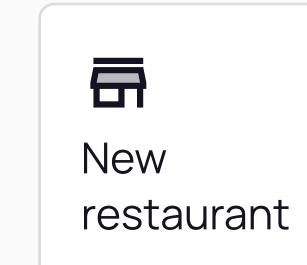

Business goals

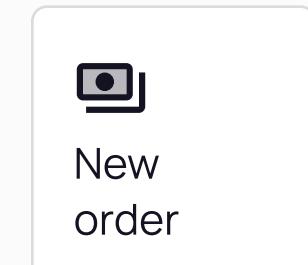

# Beta with 10+ restaurants in 4 months

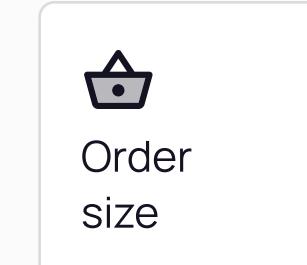

Restaurant KPIs

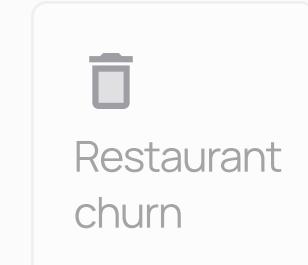

New restaurant

New order

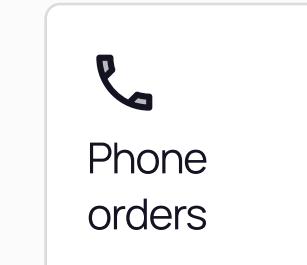

Order size

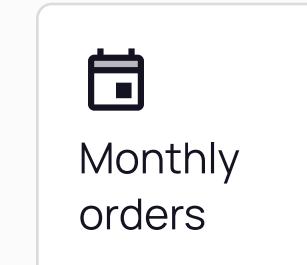

Restaurant churn

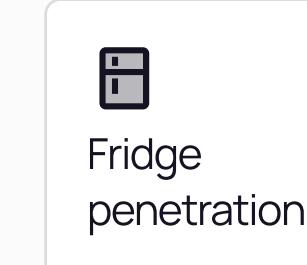

Product KPIs

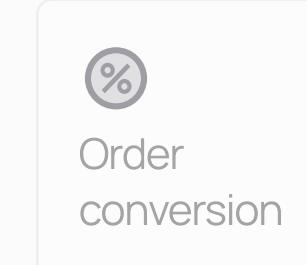

Phone orders

Monthly orders

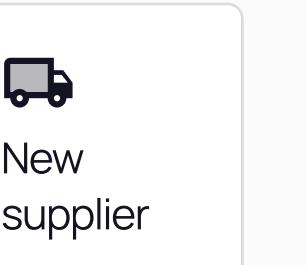

Fridge penetration

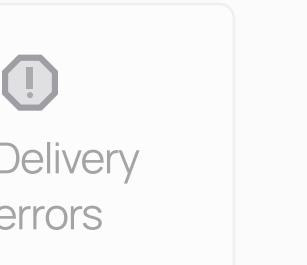

Order conversion

Supplier KPIs

New supplier

Delivery errors

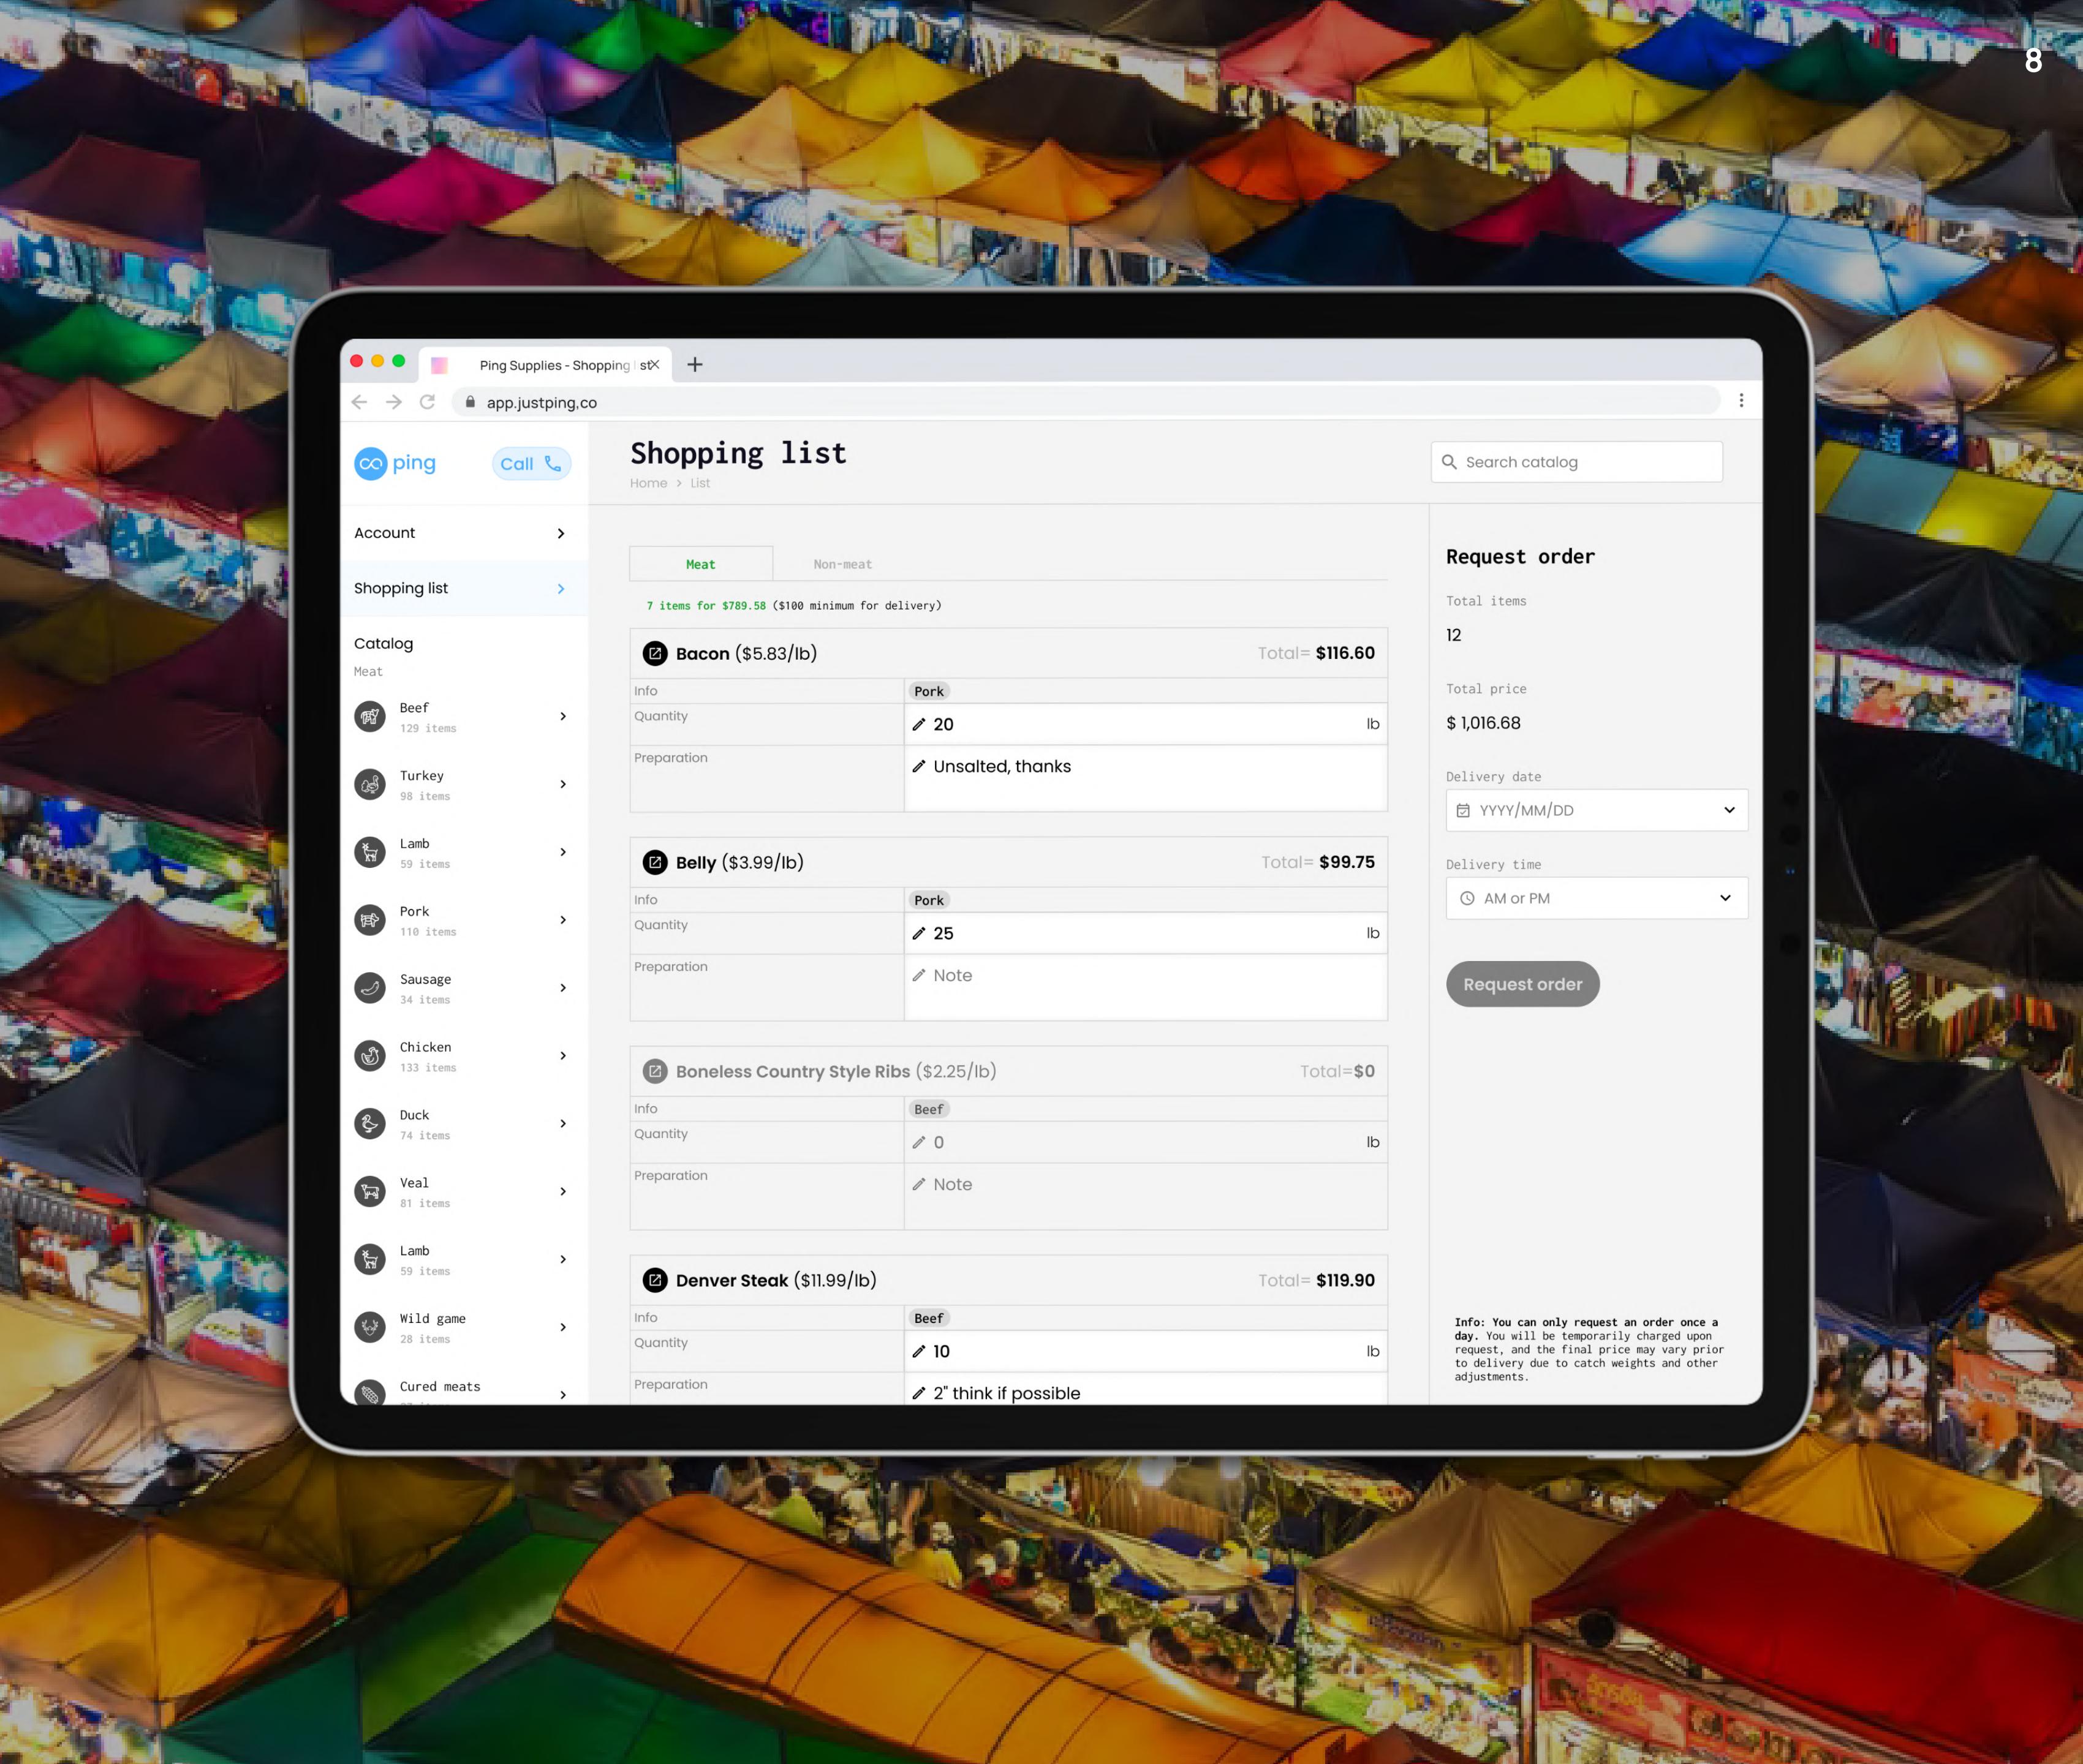

\*Grey KPIs: although we were tracking them, I am unable to retrieve the data at this time.

Solution

# Easily order from local suppliers in your area.

Journey

1. **Browse** thousands of local products
2. Create and keep a **shopping list**
3. Request **quotes** from many suppliers at once
4. **Pay** online with low fees
5. **Delivery updates** by text or email

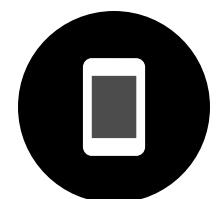

Timeline

# Four iterations in four months

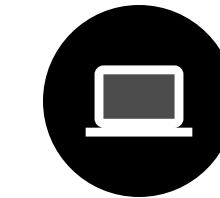

Mobile web app

V1 • April

Switched to desktop & tablet

V2 • May

Timeline

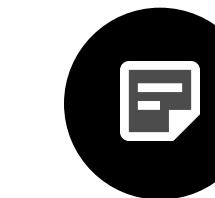

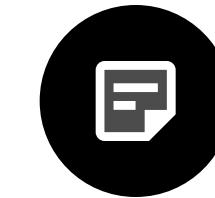

New mental model: shop lists

V3 • June

Shop lists improvements

V4 • July

# Version 1

## Objectives

Barebone product: order supply from your mobile

## Success

Get a couple of restaurants to buy, gather feedback

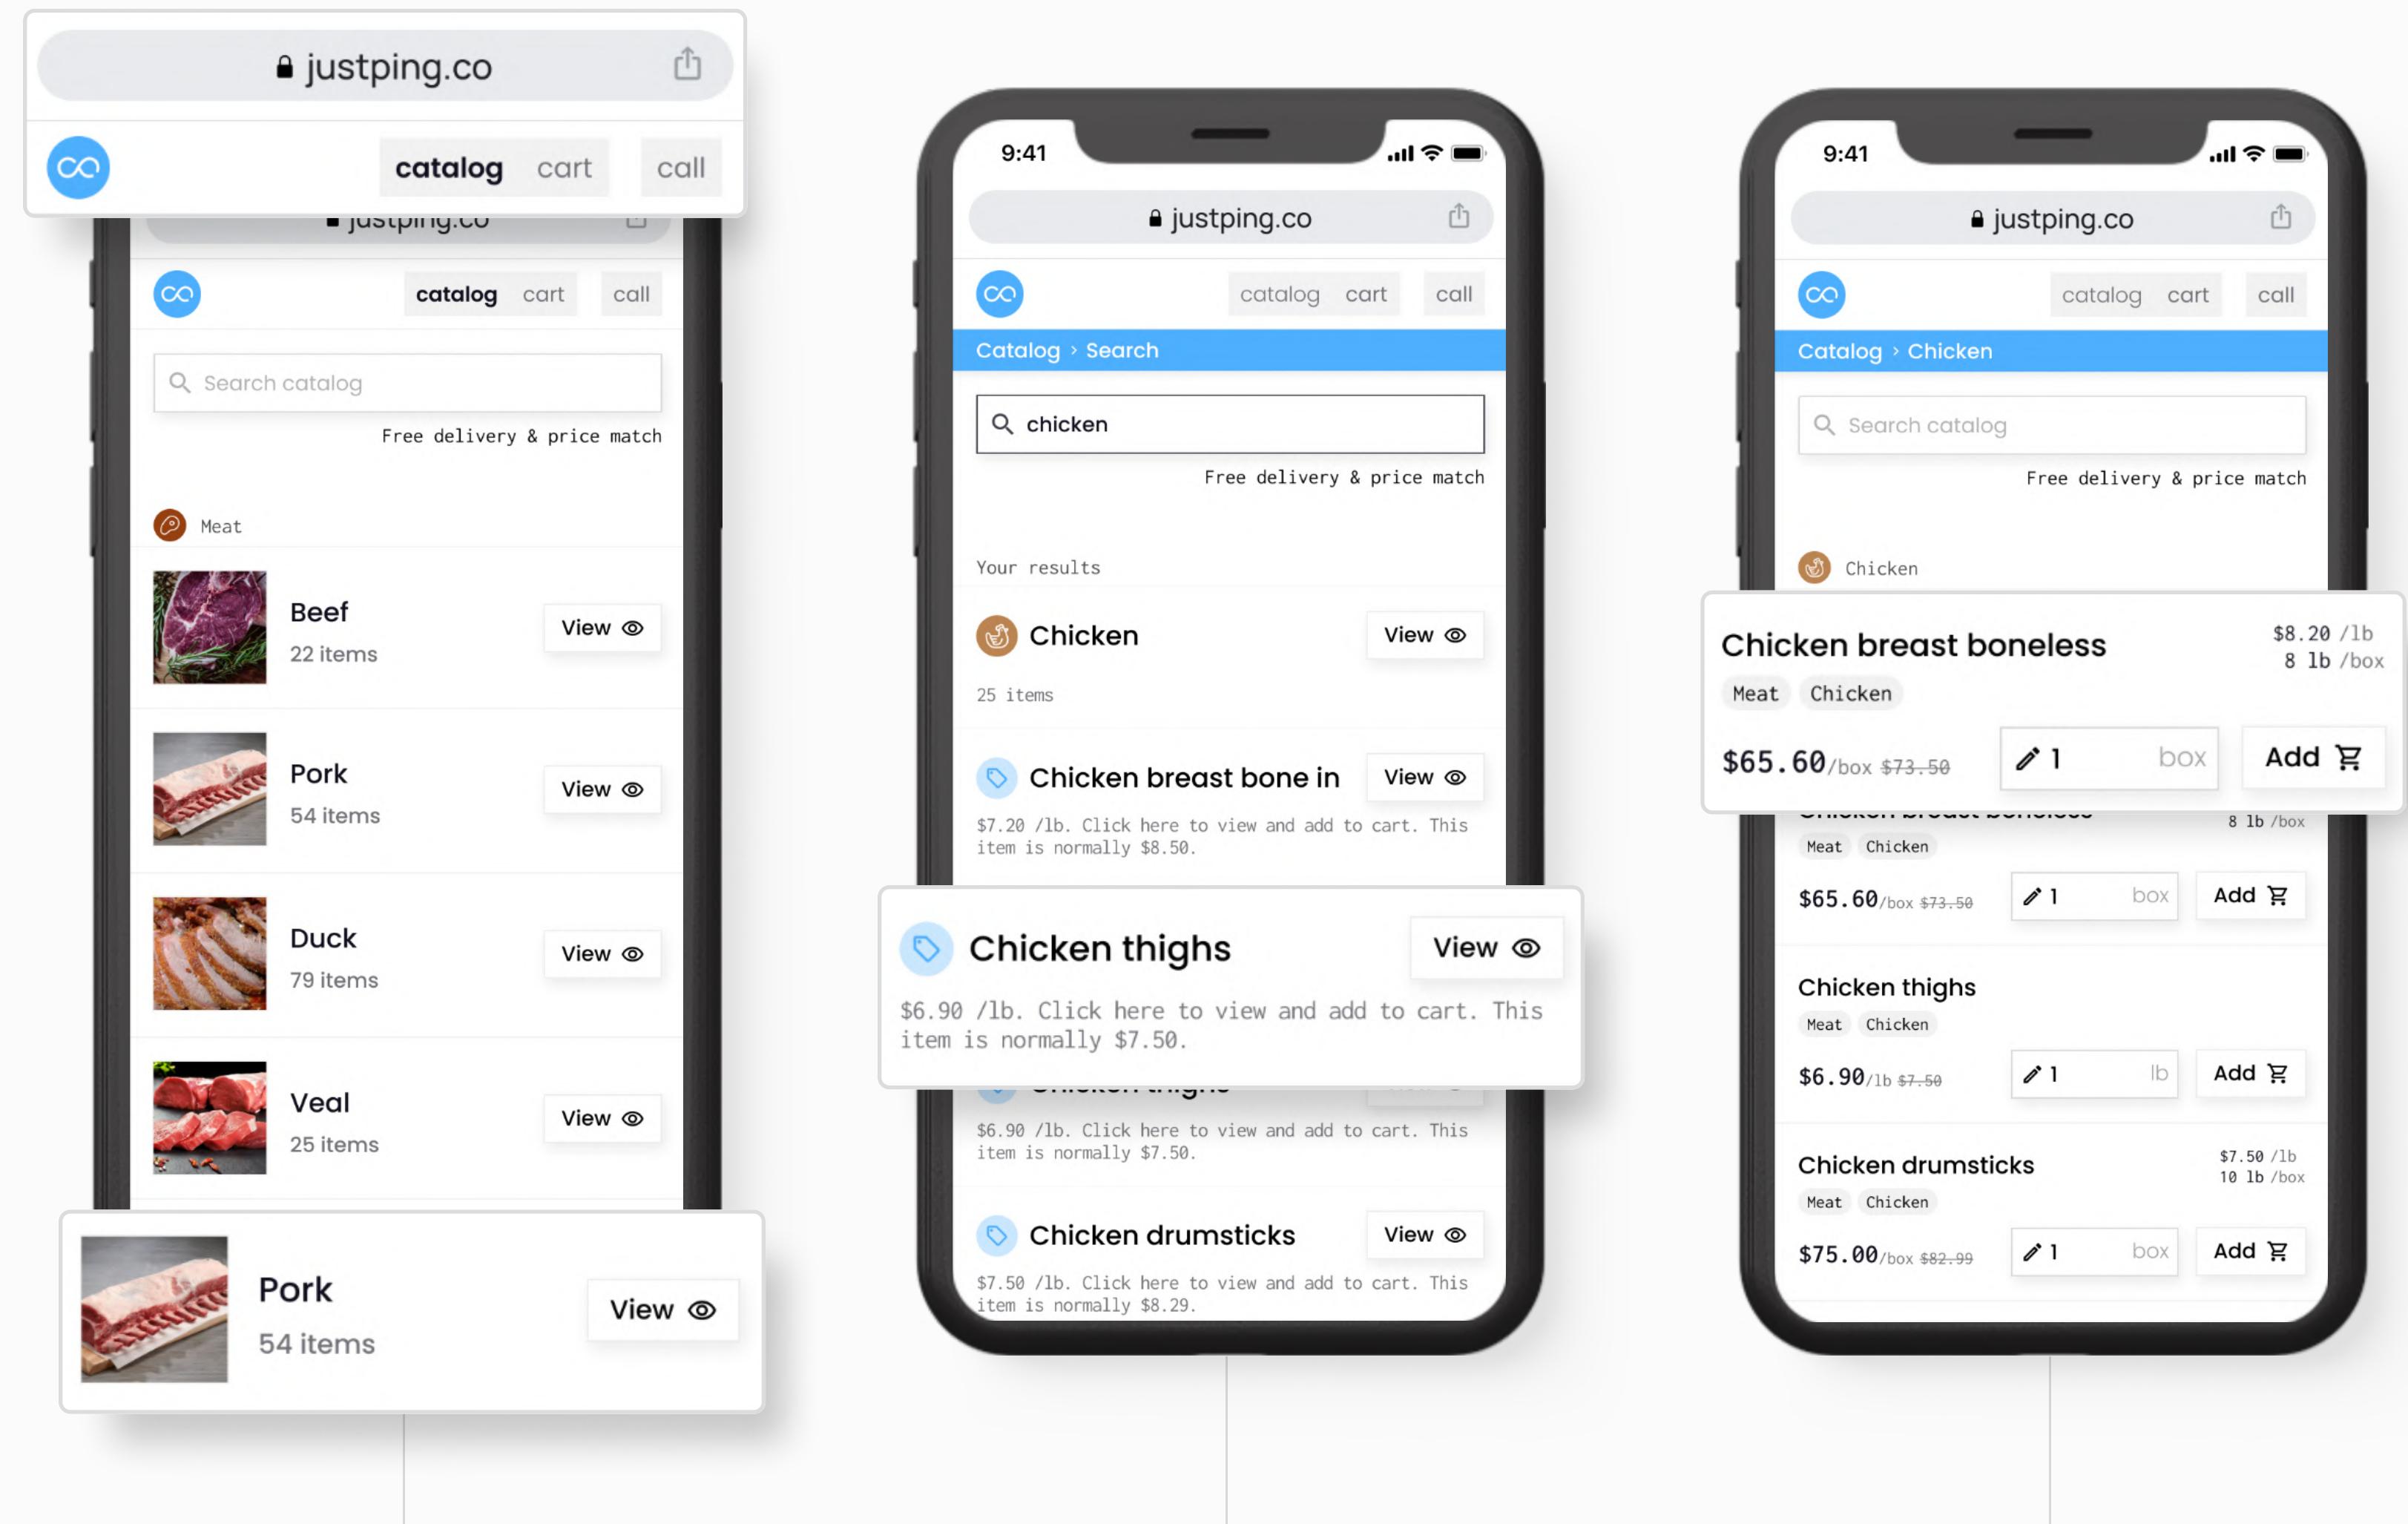

## Results

qual

- 😊 Centralized catalog
- 😊 Pricing transparency
- 😢 Mobile experience for discovery
- 😢 Want more choice

quant

Restaurants	2	Order size	\$ 800
New orders	5	Monthly orders	2.5
New sales	\$ 4,000	Phone orders	40%

Home

User needed to easily search, browse, access the cart, and call.

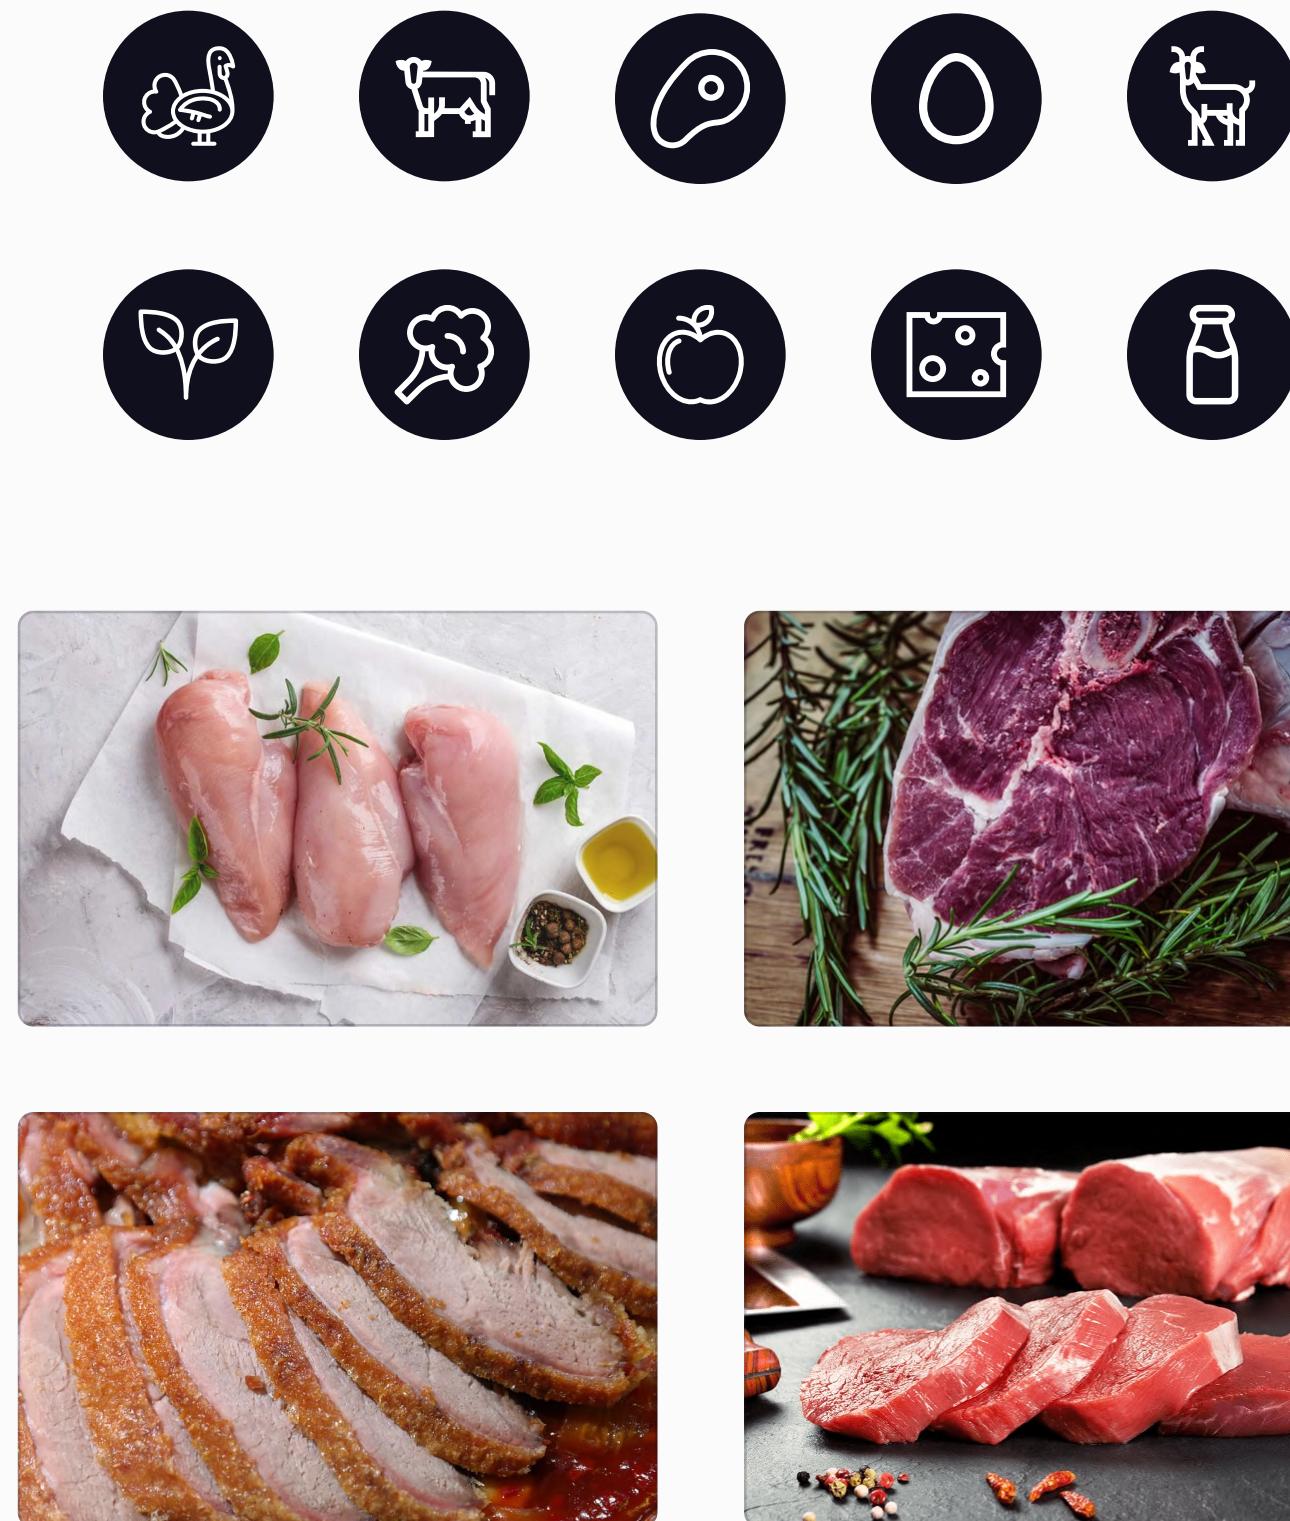

Search

People know what they want so search was important.

Category

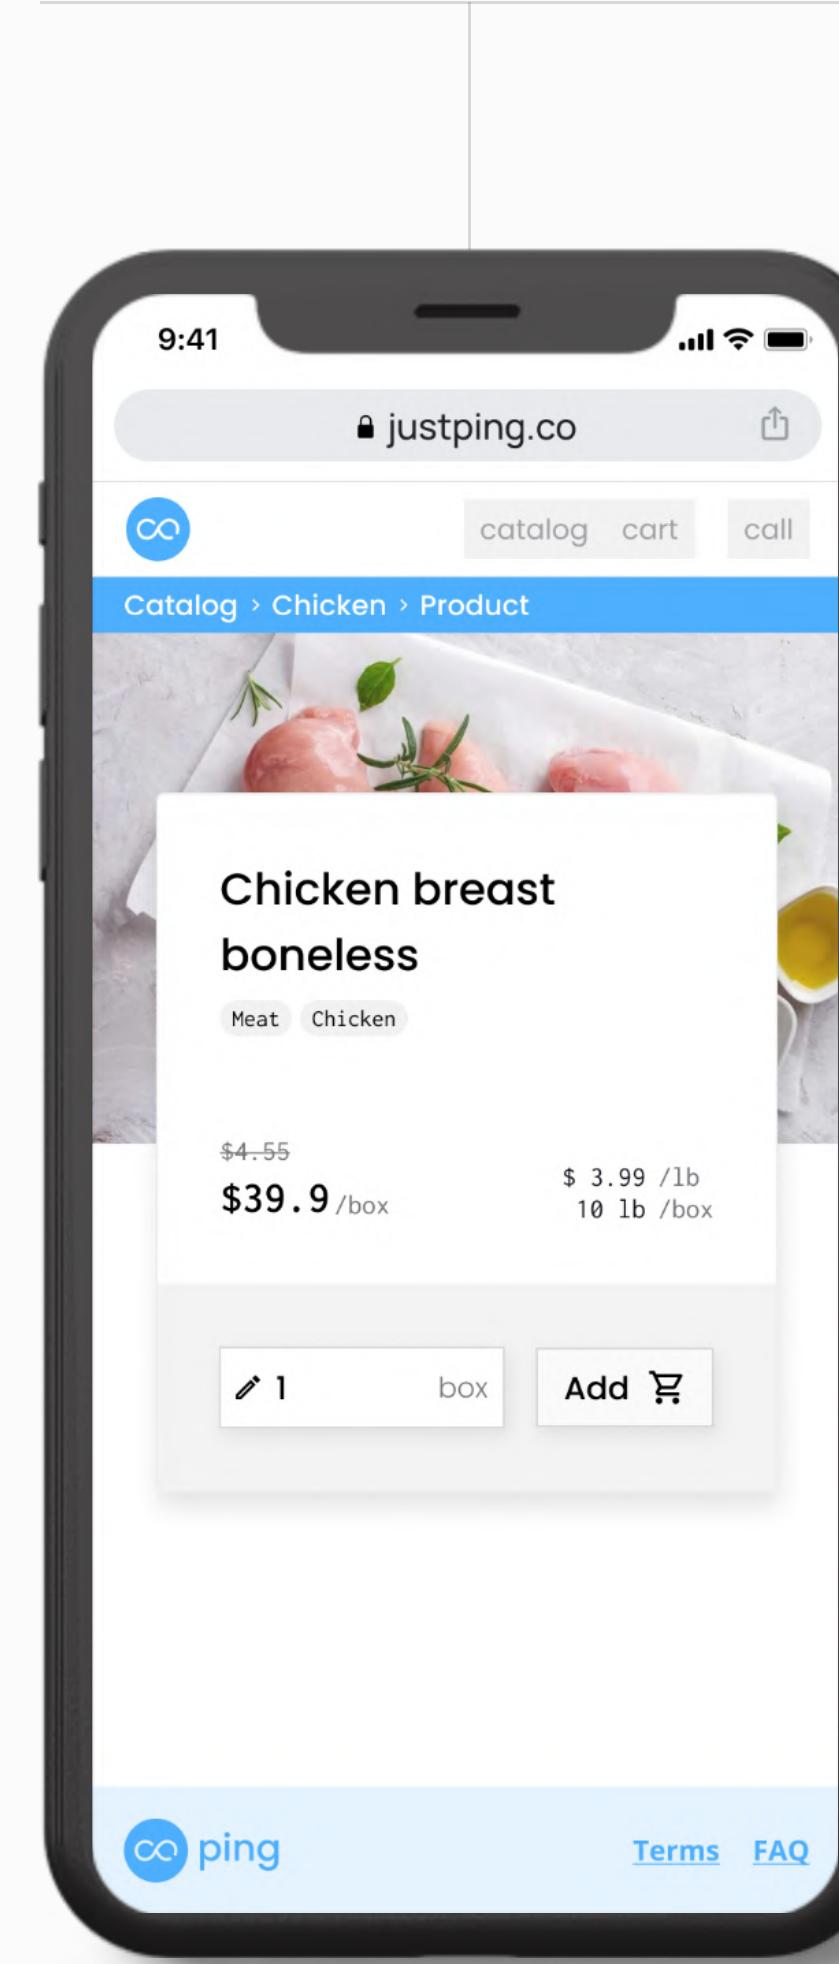

No product image or description. Added order input.

# Version 1

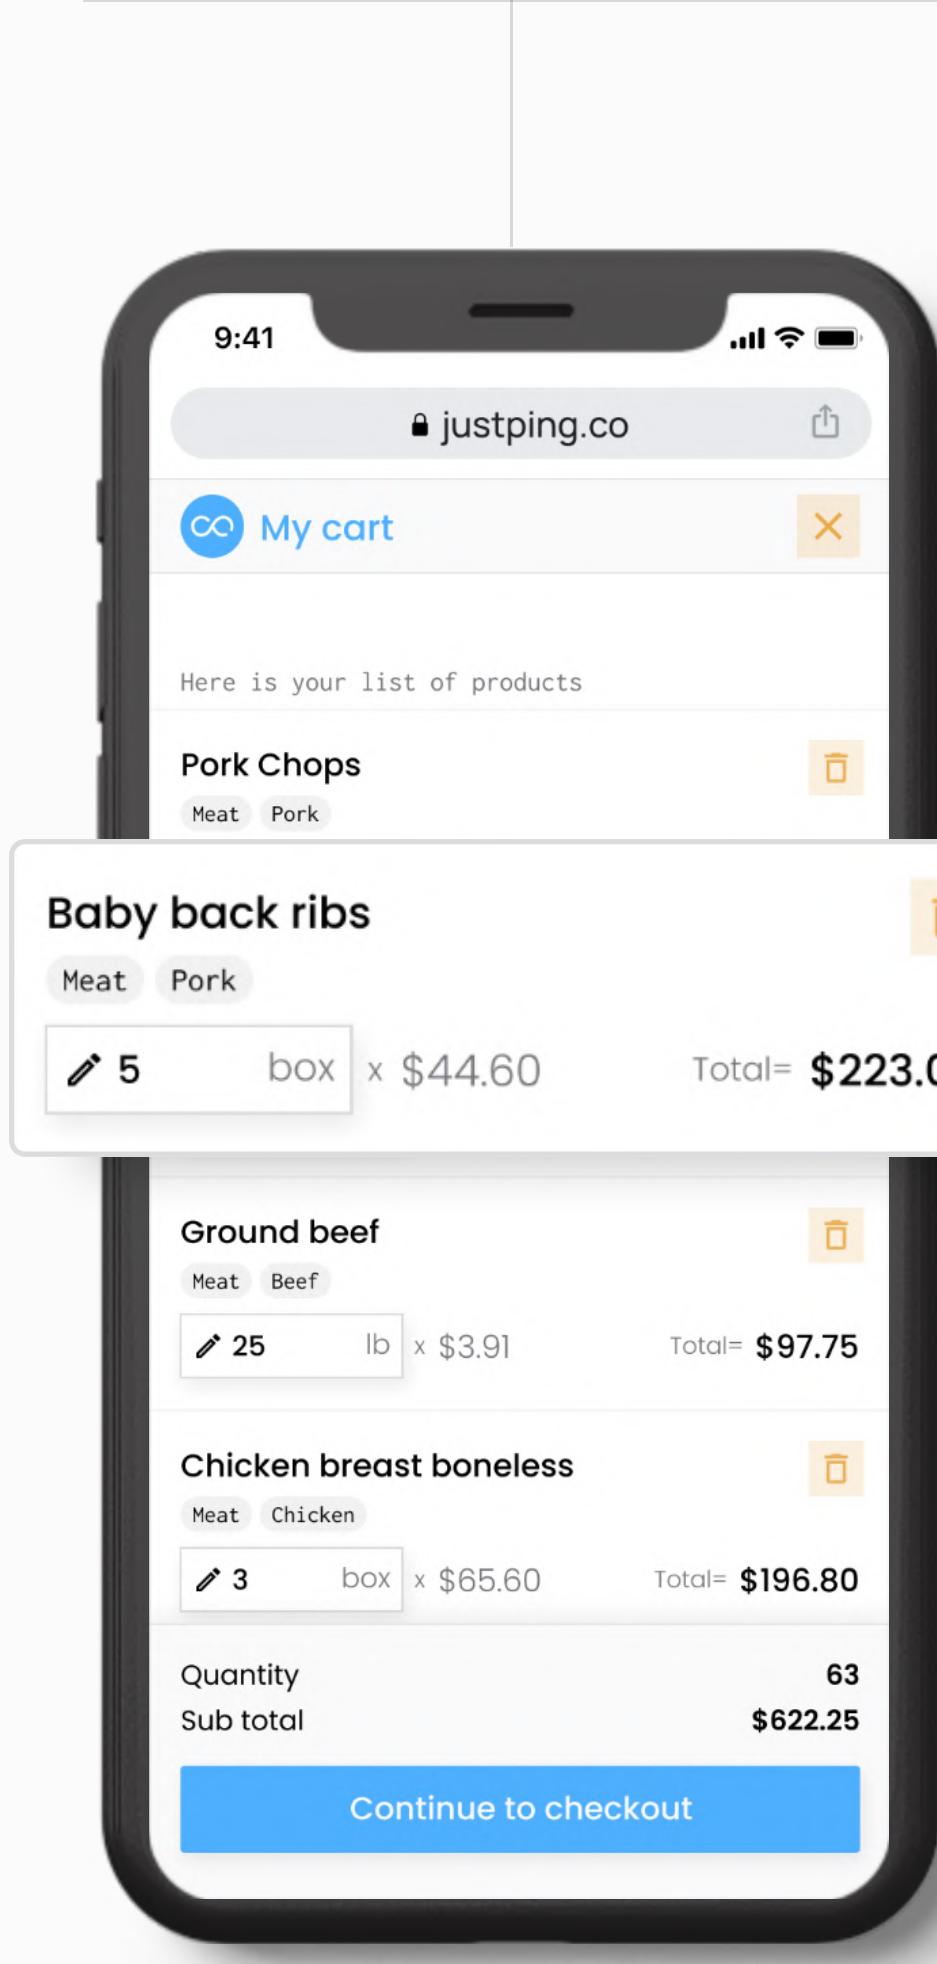

Product page

Modal design to bring CTA closer to thumb-zone

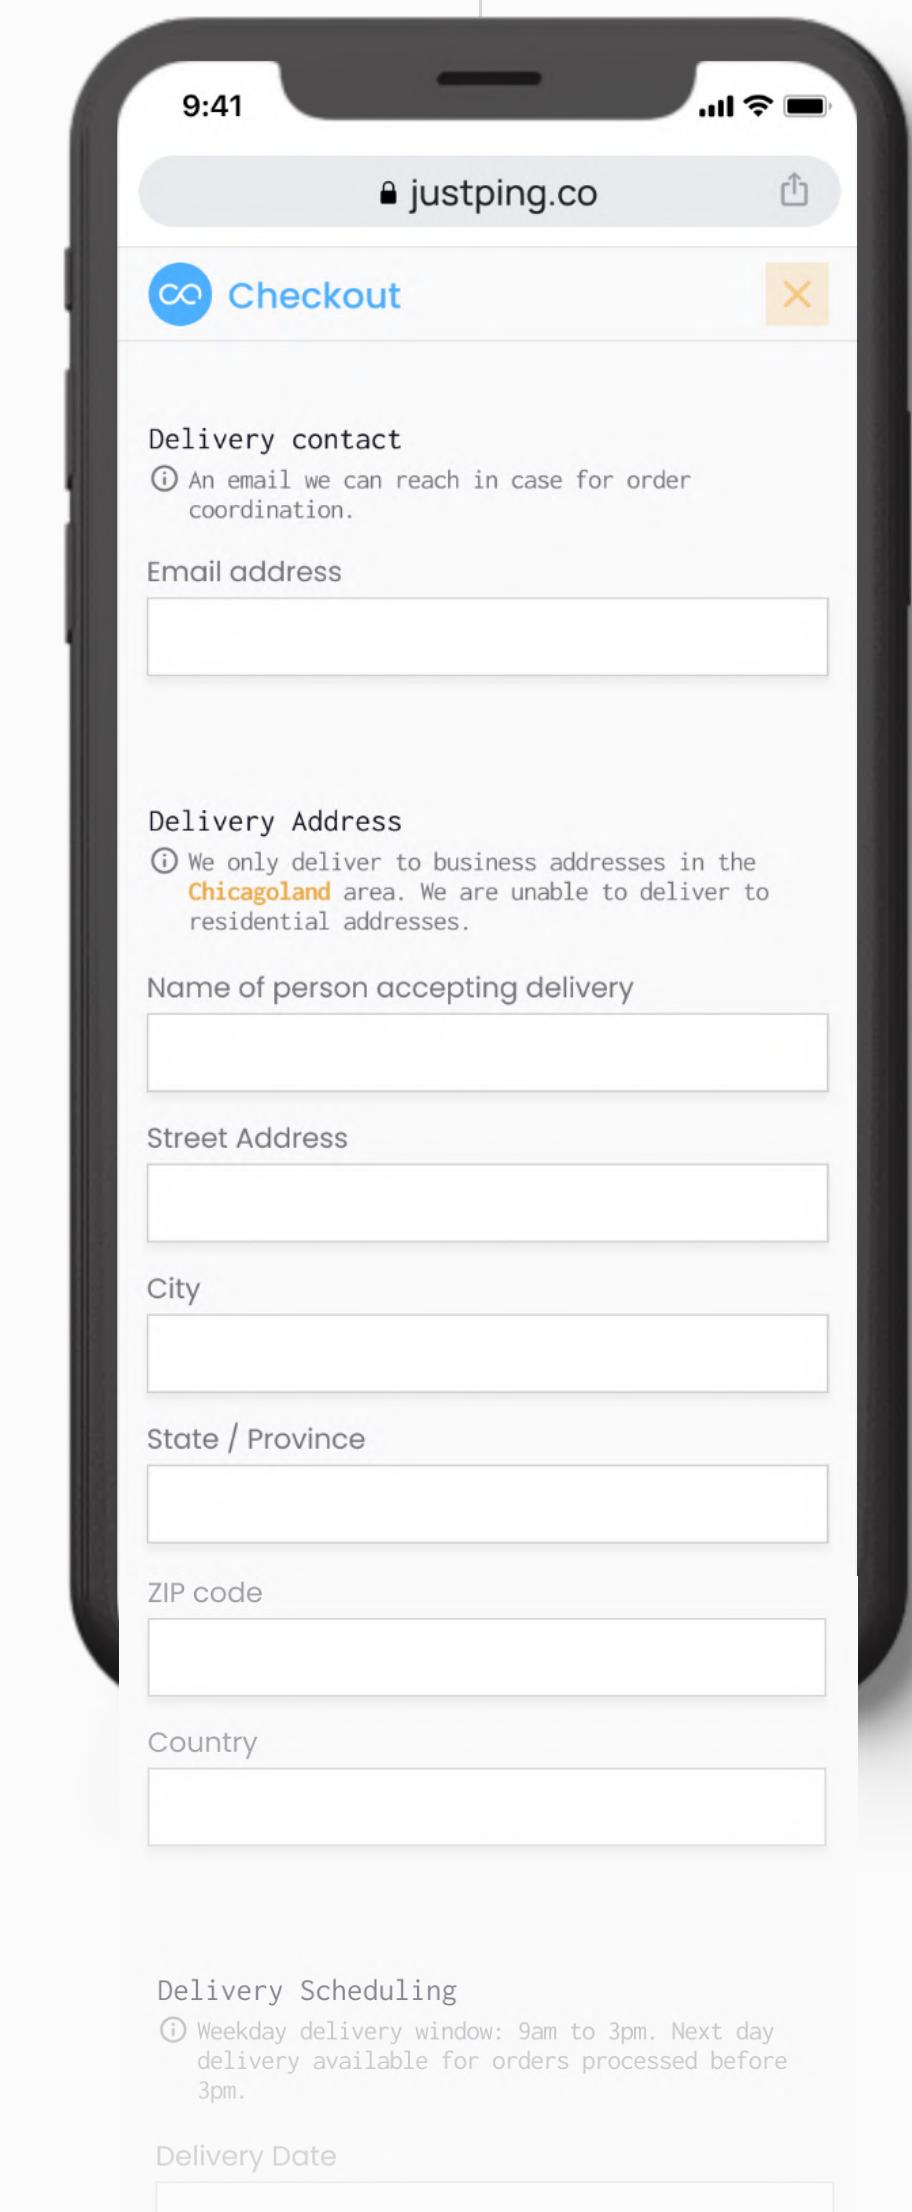

Cart

Designed the cards to enable easy budgeting

Checkout

Long checkout with information not saved for next time

# Version 2

## Objectives

Larger devices will improve conversion & monthly orders

## Success

Reach 3 monthly orders and improve conversion rate

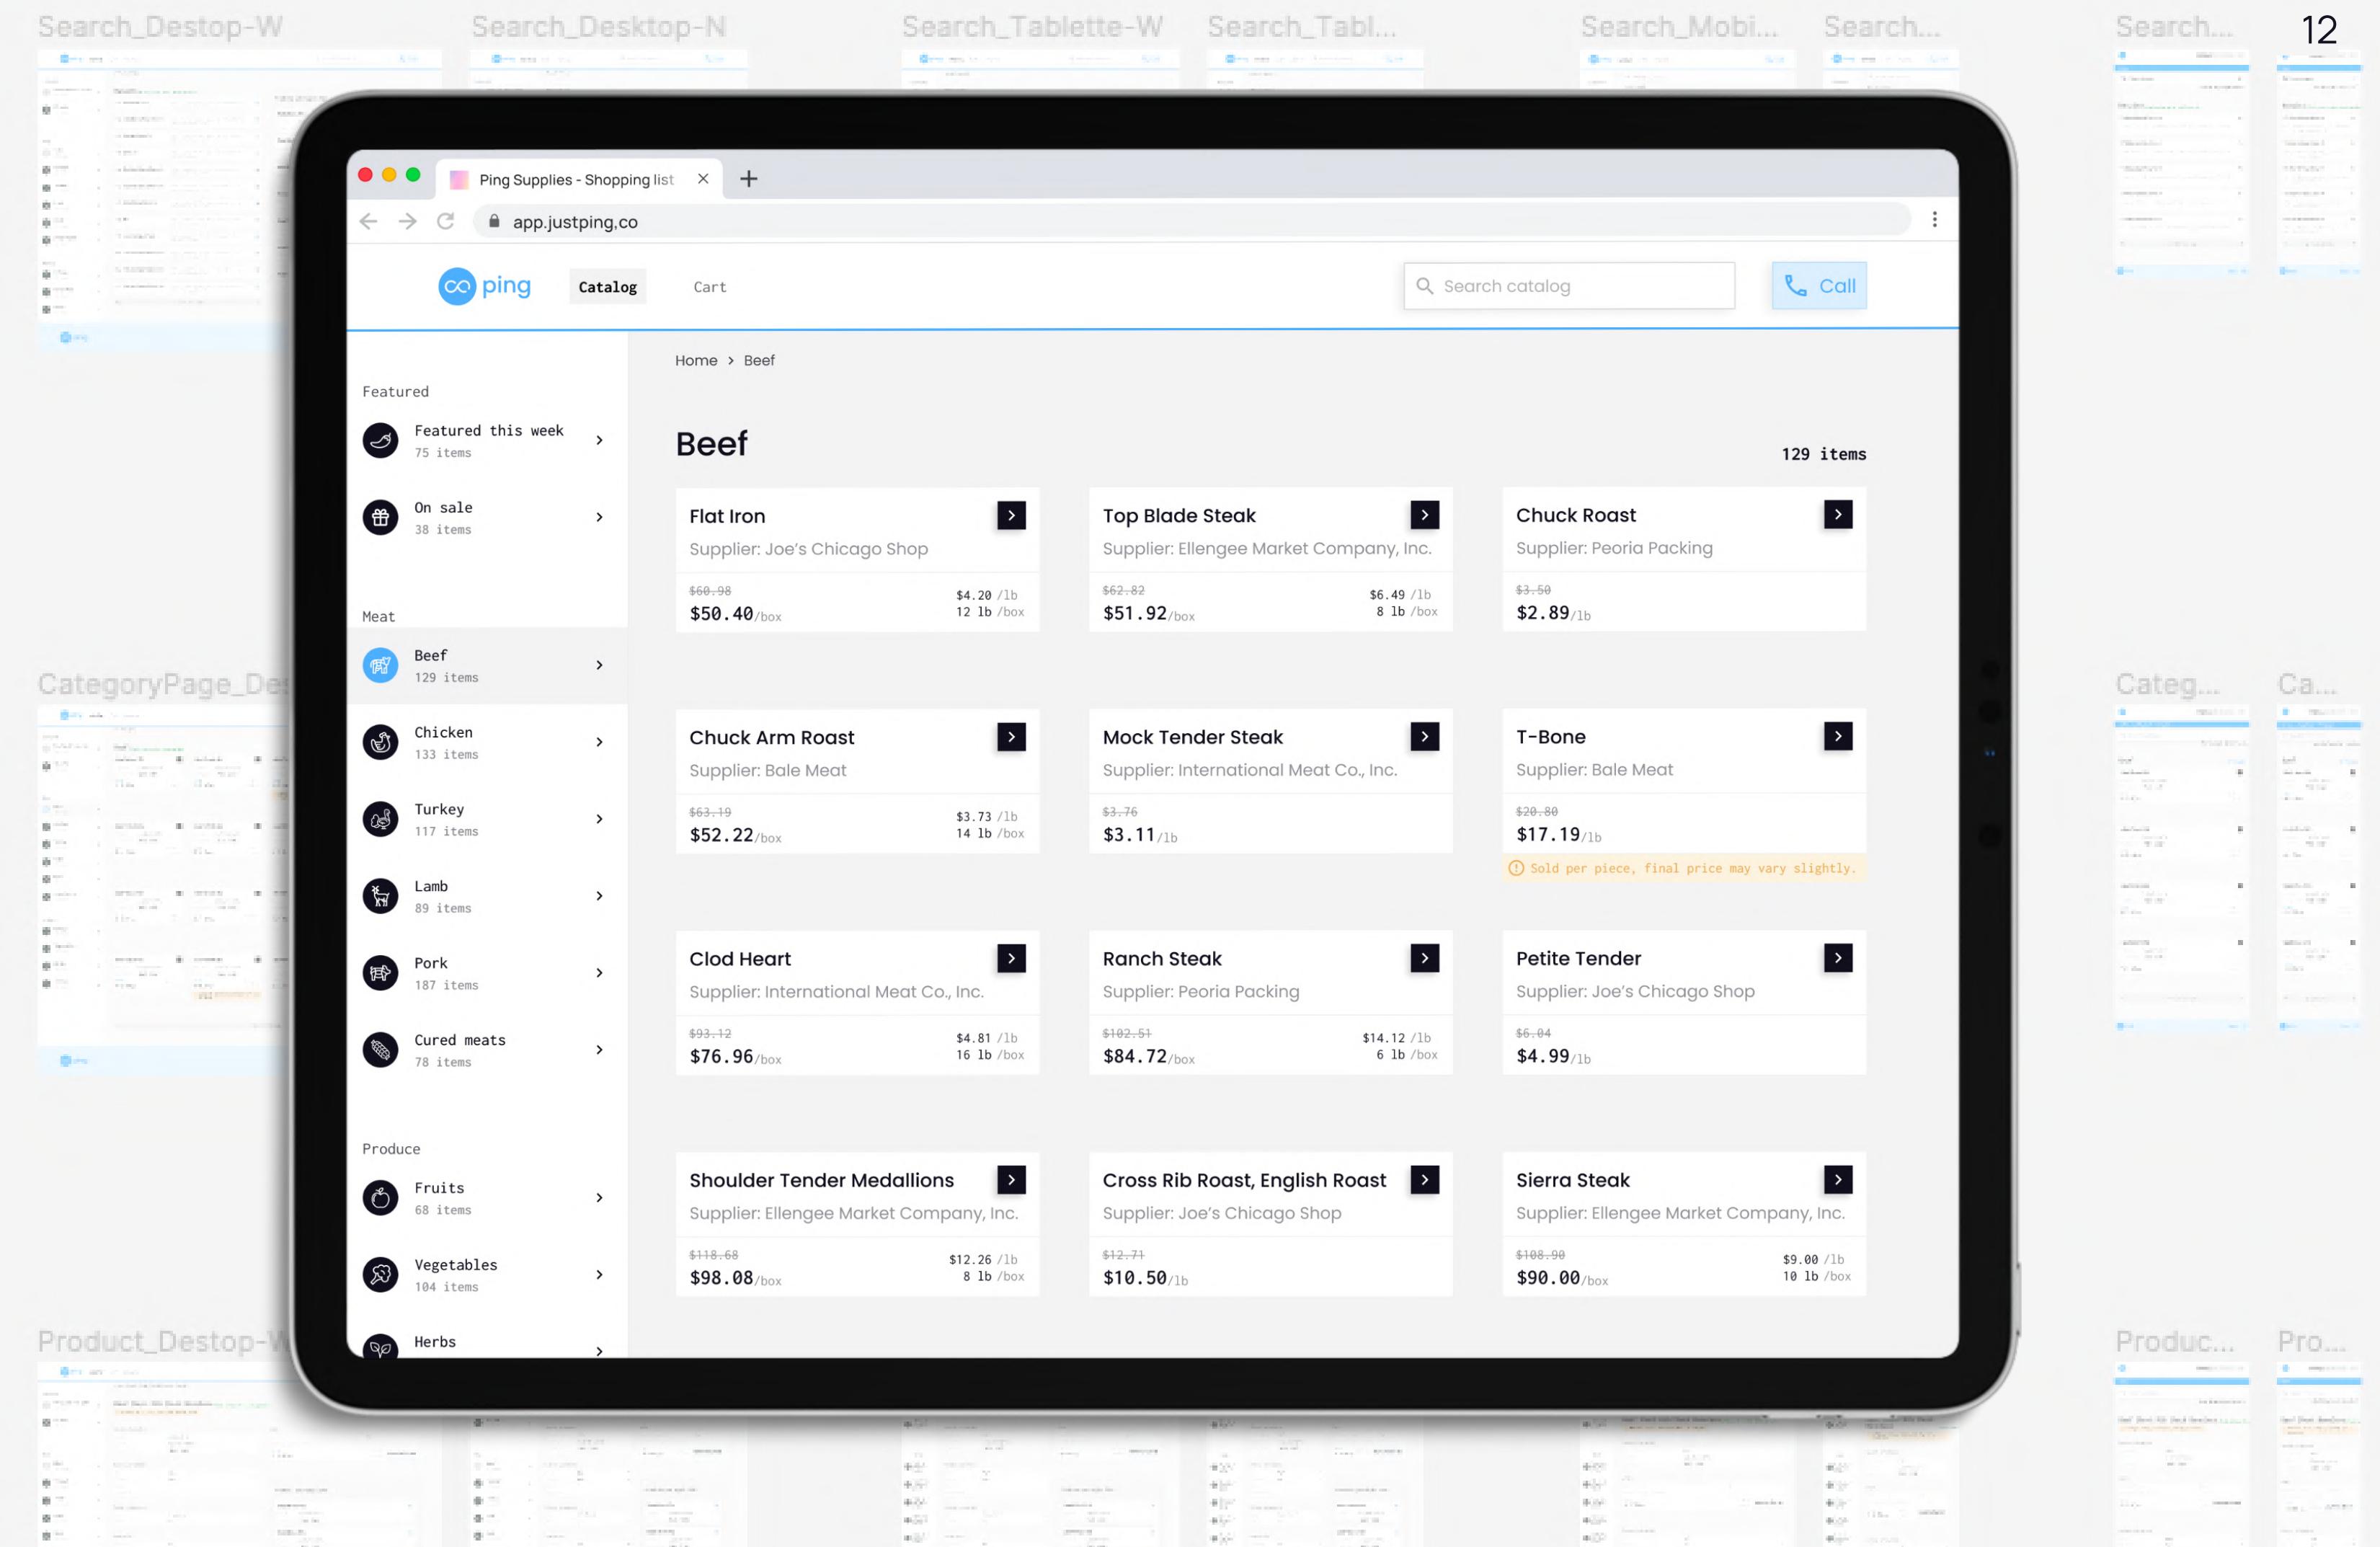

## Results

qual

- 😊 Tablet experience
- 😊 Large offering
- 😢 Unable to save info
- 😢 Price changes after quote

quant

Restaurants	↗ 5	Order size	→ \$ 813
New orders	↗ 16	Monthly orders	↗ 3.2
New sales	↗ \$ 13,000	Phone order ratio	↘ 31%

### Responsiveness

Designed each extremes of each breakpoint to understand the limits of my components.

### Product Card

Removed the add-to-cart feature from card. Not used because budgeting was hard to do.

# Version 2

Missing values

Our imperfect database impacted the page design

**Beef Short Rib Chuck Boneless**

Supplier: Joe's Chicago Shop

\$4.55

**\$3.99**/lb

**Beef Short Rib Chuck Boneless**

Supplier: Joe's Chicago Shop

\$23.88

\$19.9 /box

\$ 1.99 /lb  
10 lb /box

**Beef Short Rib Chuck Boneless**

Supplier: Joe's Chicago Shop

\$4.55

**\$3.99**/lb

! Sold per piece, final price may vary slightly.

Product schema

Card design needed to reflect how people buy

**Short Rib Chuck Boneless**

**General**

Supplier	Joe's Chicago Shop
Category	Meat / Beef
Package size	16" x 20" x 3" inch

**Diets**

Allal	Yes
Kosher	No
Vegan	N. A.
Vegetarian	N. A.

**Preparation**

Skinless	No
Boneless	Yes

**Order**

Unit price	Originally \$4.55	\$35.91	/box
Minimum order quantity	1	box	
Lb per box	3	lb/box	
Price per lb	\$11.97	/lb	

! Sold per piece, final price may vary slightly.

# Version 3

## Objectives

A quote request system and saving restaurant info will improve conversion.

## Success

Order rate and conversion improvements: +30% in catalogue/search > cart, +30% in cart > quote.

## Results

qual

- 😊 Shopping lists
- 😊 Request a quote
- 😢 Search and filter experience

quant

Restaurants	<span>↗ 11</span>	Order size	<span>↗ \$ 1057</span>
New orders	<span>↗ 35</span>	Monthly orders	<span>→ 3.2</span>
New sales	<span>↗ \$ 37,000</span>	Phone orders	<span>↘ 22%</span>

No code tools

Combining no code tools so users can request quotes.

The screenshot shows a web-based shopping application interface. On the left, there's a sidebar with categories like 'Featured', 'On sale', 'Meat' (with sub-categories like Beef, Chicken, Turkey, Lamb, Pork, Cured meats), 'Produce' (Fruits, Vegetables), and 'Other'. The main area is titled 'My Shopping List' and shows a shopping cart with the following items:

Item	Total
Mock Tender Steak	\$108.85
Denver Steak	\$119.90
Ribeye	\$0.00
Tenders	\$115.80

Each item row includes a checkbox, unit price, quantity, and preparation notes. A modal window is open for the 'Mock Tender Steak' item, showing its details: Unit price (\$3.11), Quantity (35 lb), Preparation ('any preparation needed?'), and a total of \$108.85. To the right of the shopping list, there's a 'Request a quote' section with fields for 'Delivery date' (set to YYYY/MM/DD) and 'Delivery time' (set to 9am - 12pm). Below these fields are 'Delivery Info' and 'Payment Info' sections. At the bottom, there are 'Delivery date' and 'Delivery time' dropdown menus.

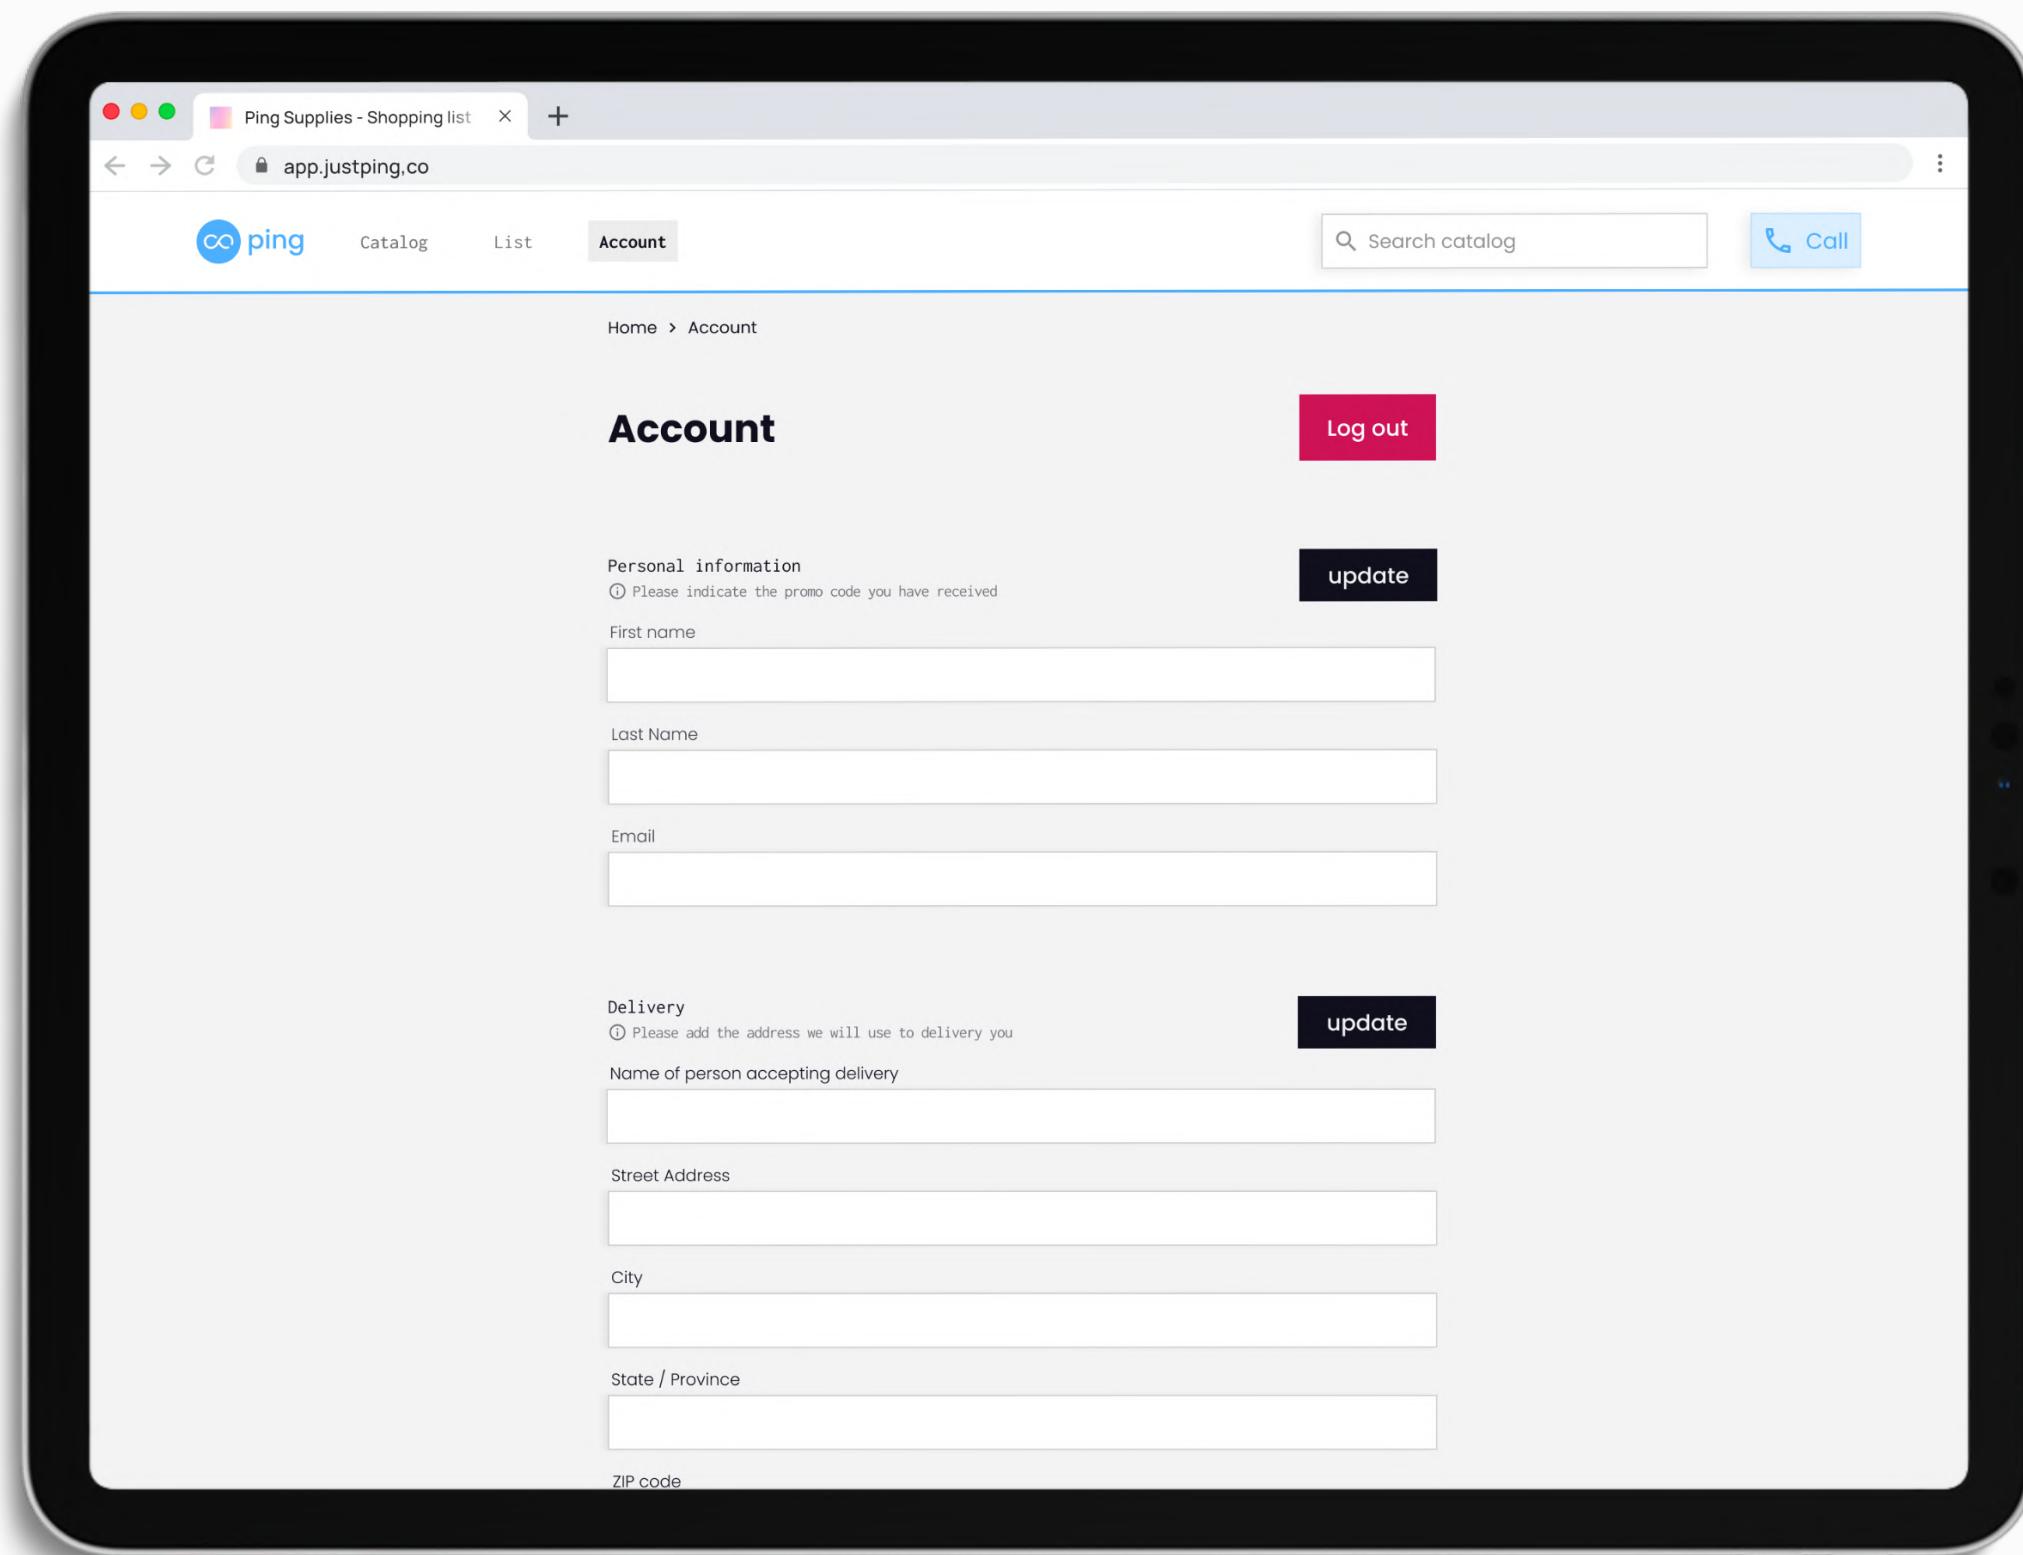

New technology

New stack enable to improve budgeting and facilitate the ordering process.

# Version 3

Account capabilities

Saving delivery and payment info at the account level

New mental model > new design  
Add-to-cart became Save-to-list.  
Quantity was input too long to code.

# Version 4

## Objectives

Improve conversion with search and filters, update nav, add CTA to product cards.

## Success

+20% in search > cart, +10% in catalogue > cart.

## Results

V4 was built and tested but not launched

qual

Loved the search and filters

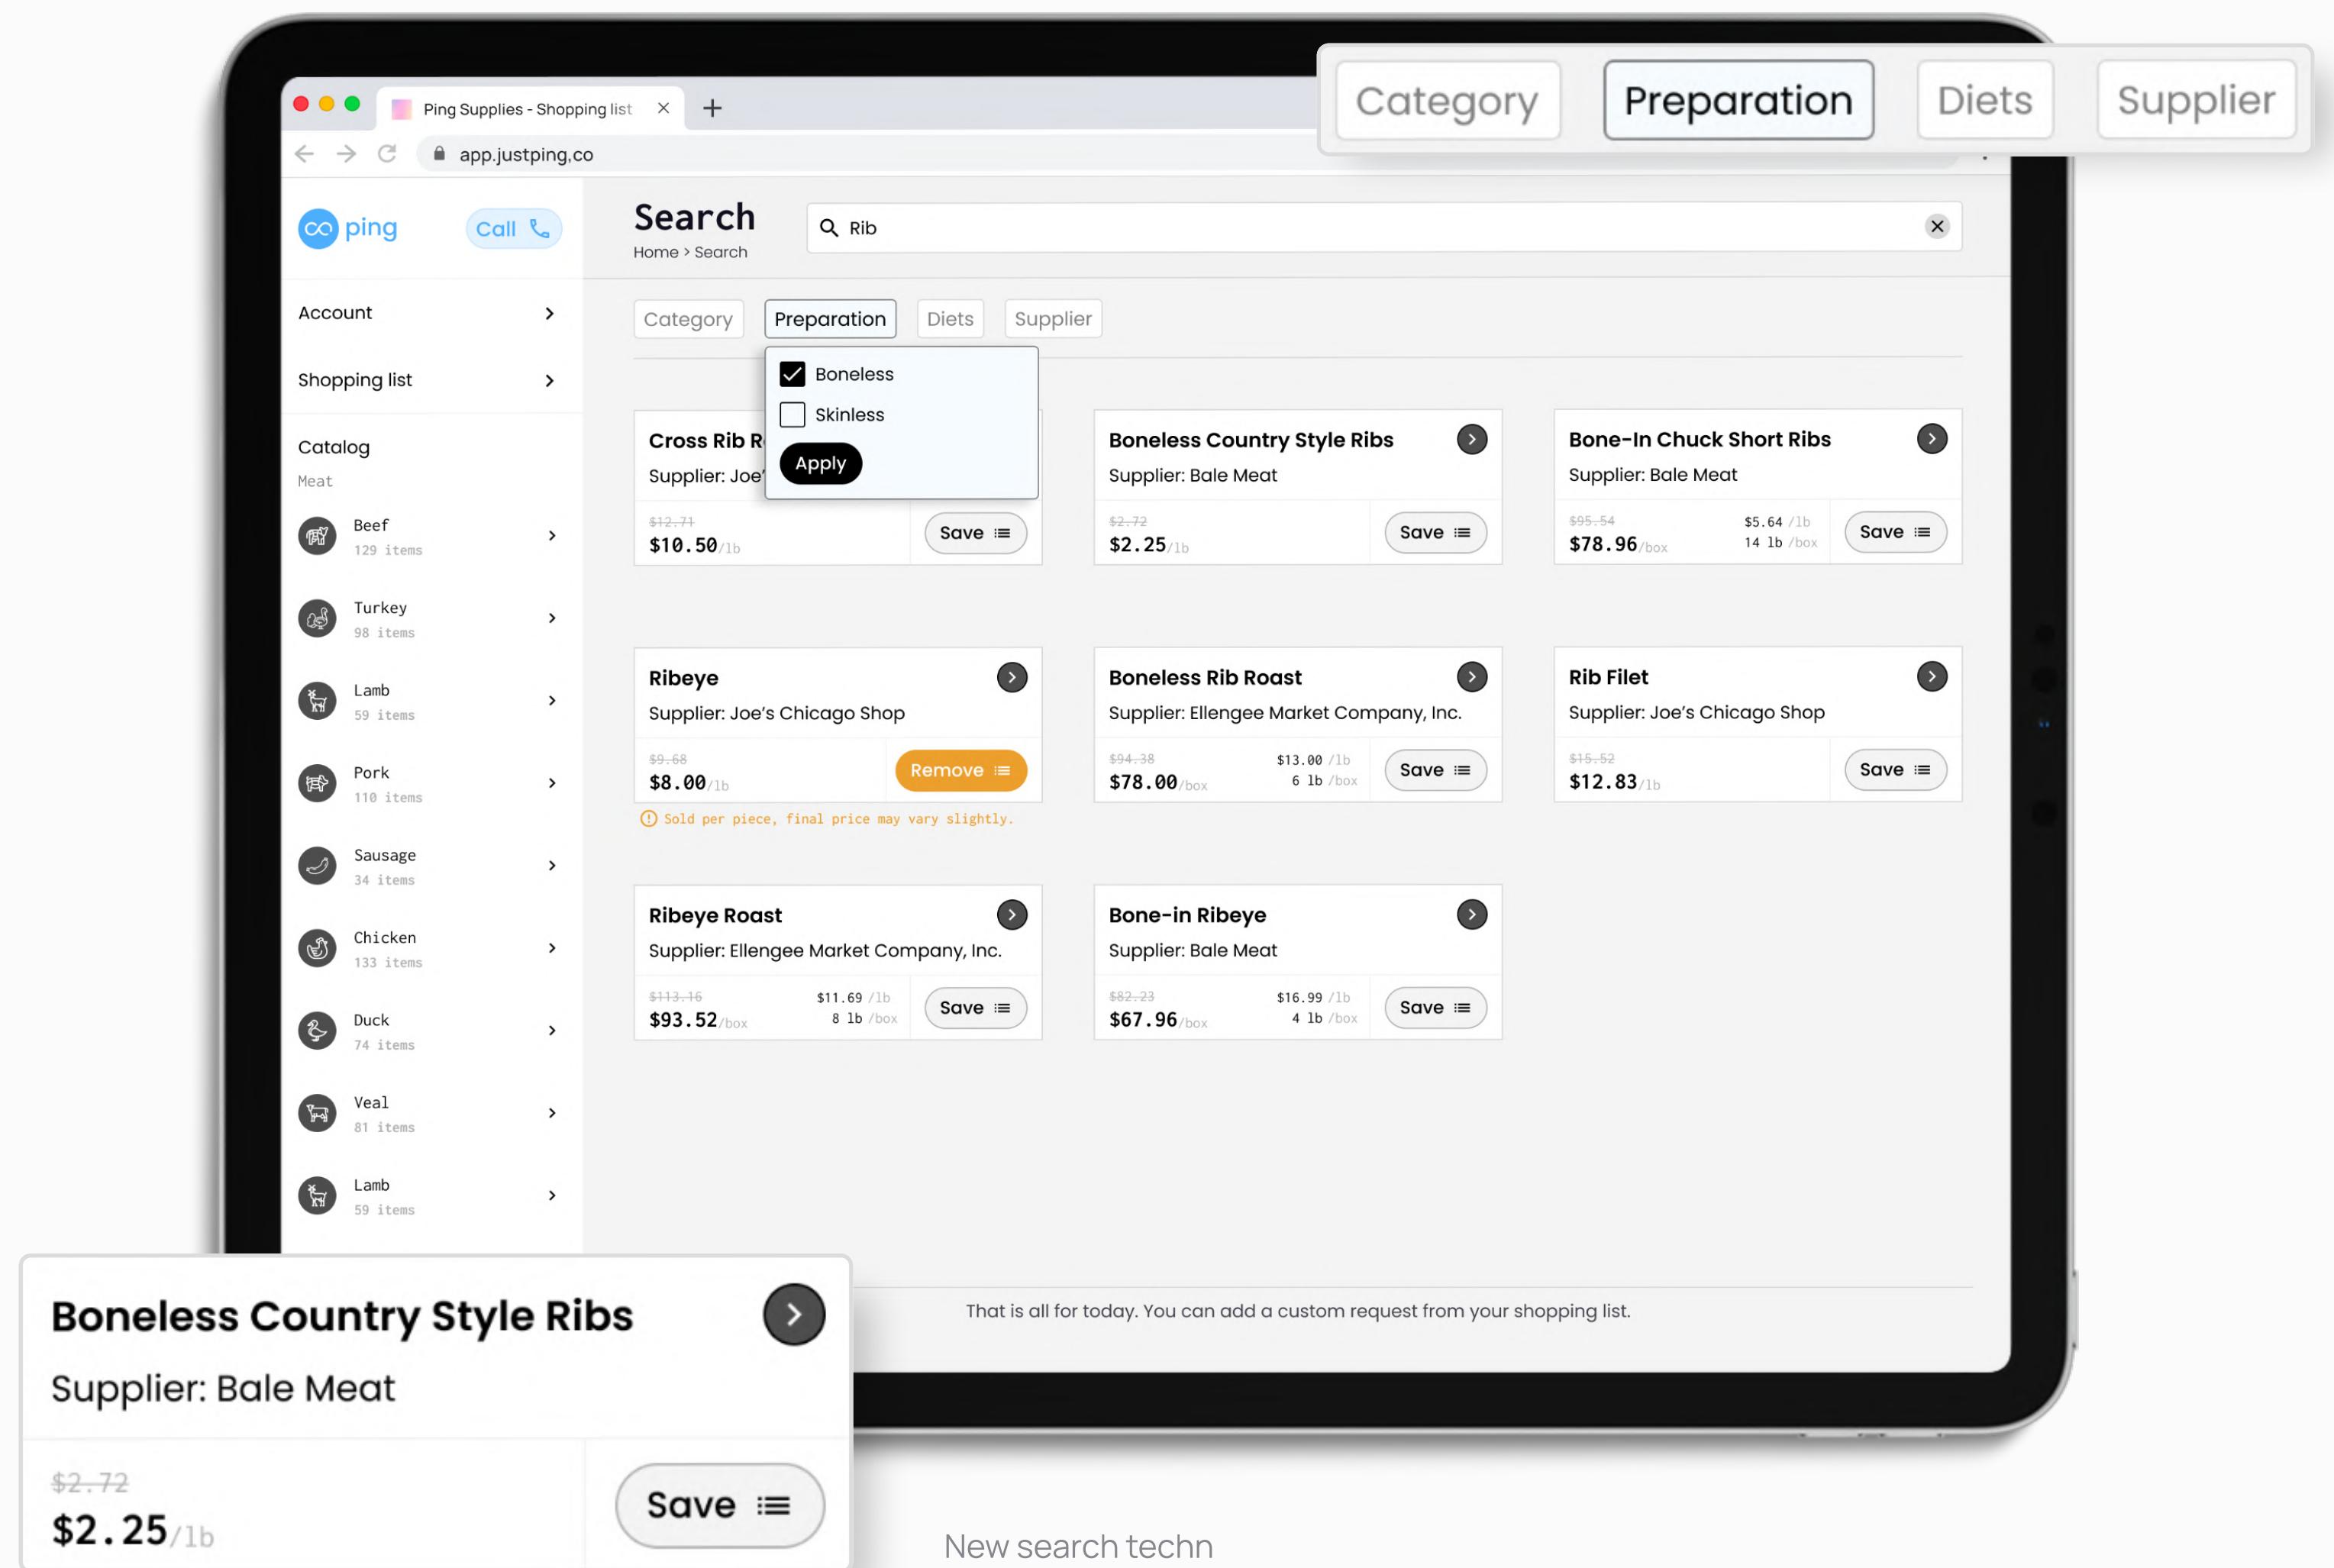

Did not see a change between old/new nav.

quant

Restaurants	16	Order size	\$ 1066
New orders	61	Monthly orders	3.8
New sales	\$ 65,000	Phone orders	18%

Search page

Opensource low-code API enabled search and filtering of products (not pages)

New search techn

We added relevant info and actions to the search result cards.

# Version 4

Quantity	✓ 30
Preparation	✓ Note

<b>French green beans (\$2.13/lb)</b>	Total= \$42.60
Info	Vegetable
Quantity	✓ 20
Preparation	✓ Note

<b>Apple, Granny Smith (\$1.32/lb)</b>	Total= \$26.40
Info	Fruit
Quantity	✓ 20
Preparation	✓ Note

**Request order**

Total items: 13

Total price: \$1,029.13

Delivery date: 2021/03/21

Delivery time: 9am - 12pm

Special meat order: Need something outside our catalog?

Info: You can only request an order once a day. You will be temporarily charged upon request, and the final price may vary prior to delivery due to catch weights and other adjustments.

## Results

# How far did we take this

### Monthly orders (client satisfaction)

Number of orders per month per restaurant

**+52%** 3.8/m

### Phone orders (interface performance)

Orders by phone compared to online orders

**-55%** 18%

### Fridge penetration (offering quality)

Average order size compared to total food costs

**+33%** 54%

# Learnings

**Execution:** Familiarity with technological landscape is crucial

**Collaboration:** Developer communication improves design and tech

**Strategic:** Separating design thinking and implementation leads to better solutions
