

Aura, daily mental health exercises between your appointments

for Green Shield • 2020, 8-week project

Context

The story behind the project

Client

Green Shield Canada, top 5 biggest insurance in Canada

Goal

Leverage existing assets to get into mental health space.

Mind Beacon POCKET PILLS maple

Mandate

6 weeks to find a problem and validate it with a POC.

Research plan
3 weeks to find a problem worth solving

Secondary and competition research

Research findings

Imperfect public healthcare

20%
have mental
illness

\$ 3500
yearly cost
for therapy

28%
maximum
coverage

Months waiting for appointment

Companies fill the gaps

Users start with an assessment or diagnosis before entering a product loop.

Assessment

 NHS

Diagnosis

Research findings

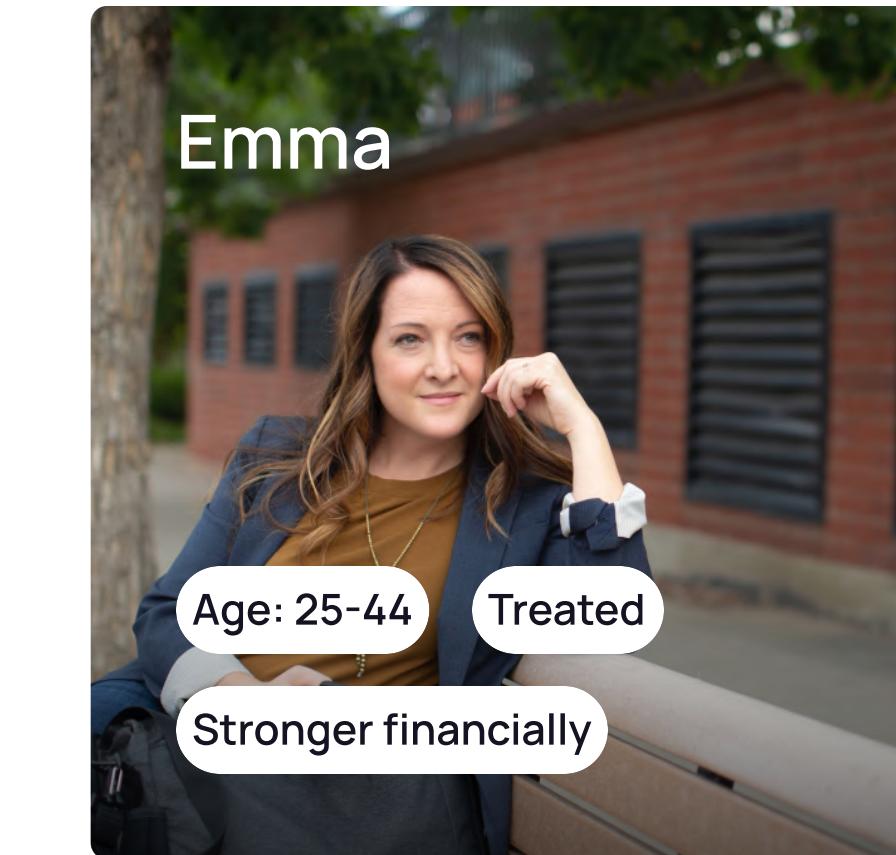

Round 1 interviews: life with mental health

Explore options,
self-manage
mental health

Mental health
costs, stigma of
seeking solution

Handle mental
health between
appointments

Mental health
costs, coverage
options

“Mental health is so fragmented,
it would be great if I could find
good resources all in one place.”

“I’ve had 3 psychiatrists and tried
10 medications over the course of
the 11-year treatment.”

Journey

Awareness

Symptom detection, trigger
to act

Research scattered

Treatment and coverage
discovery

Decision ill-matched

Building treatment plan,
finding coverage

Treatment discontinuous

Execute, track progress,
modify

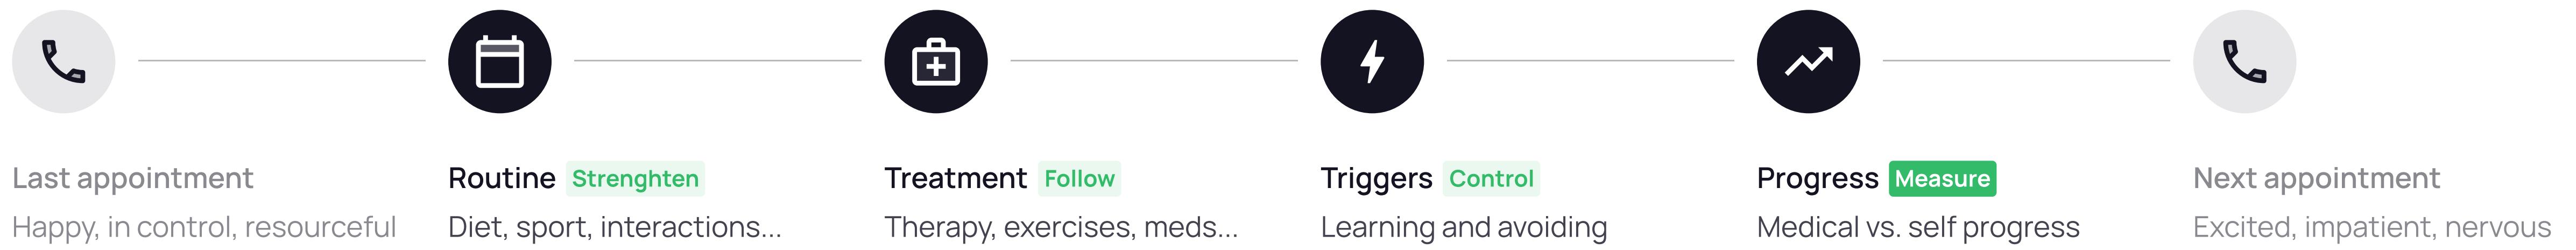

Advocacy

Sharing working
solution

Research findings

Round 2 interviews: life between appointments

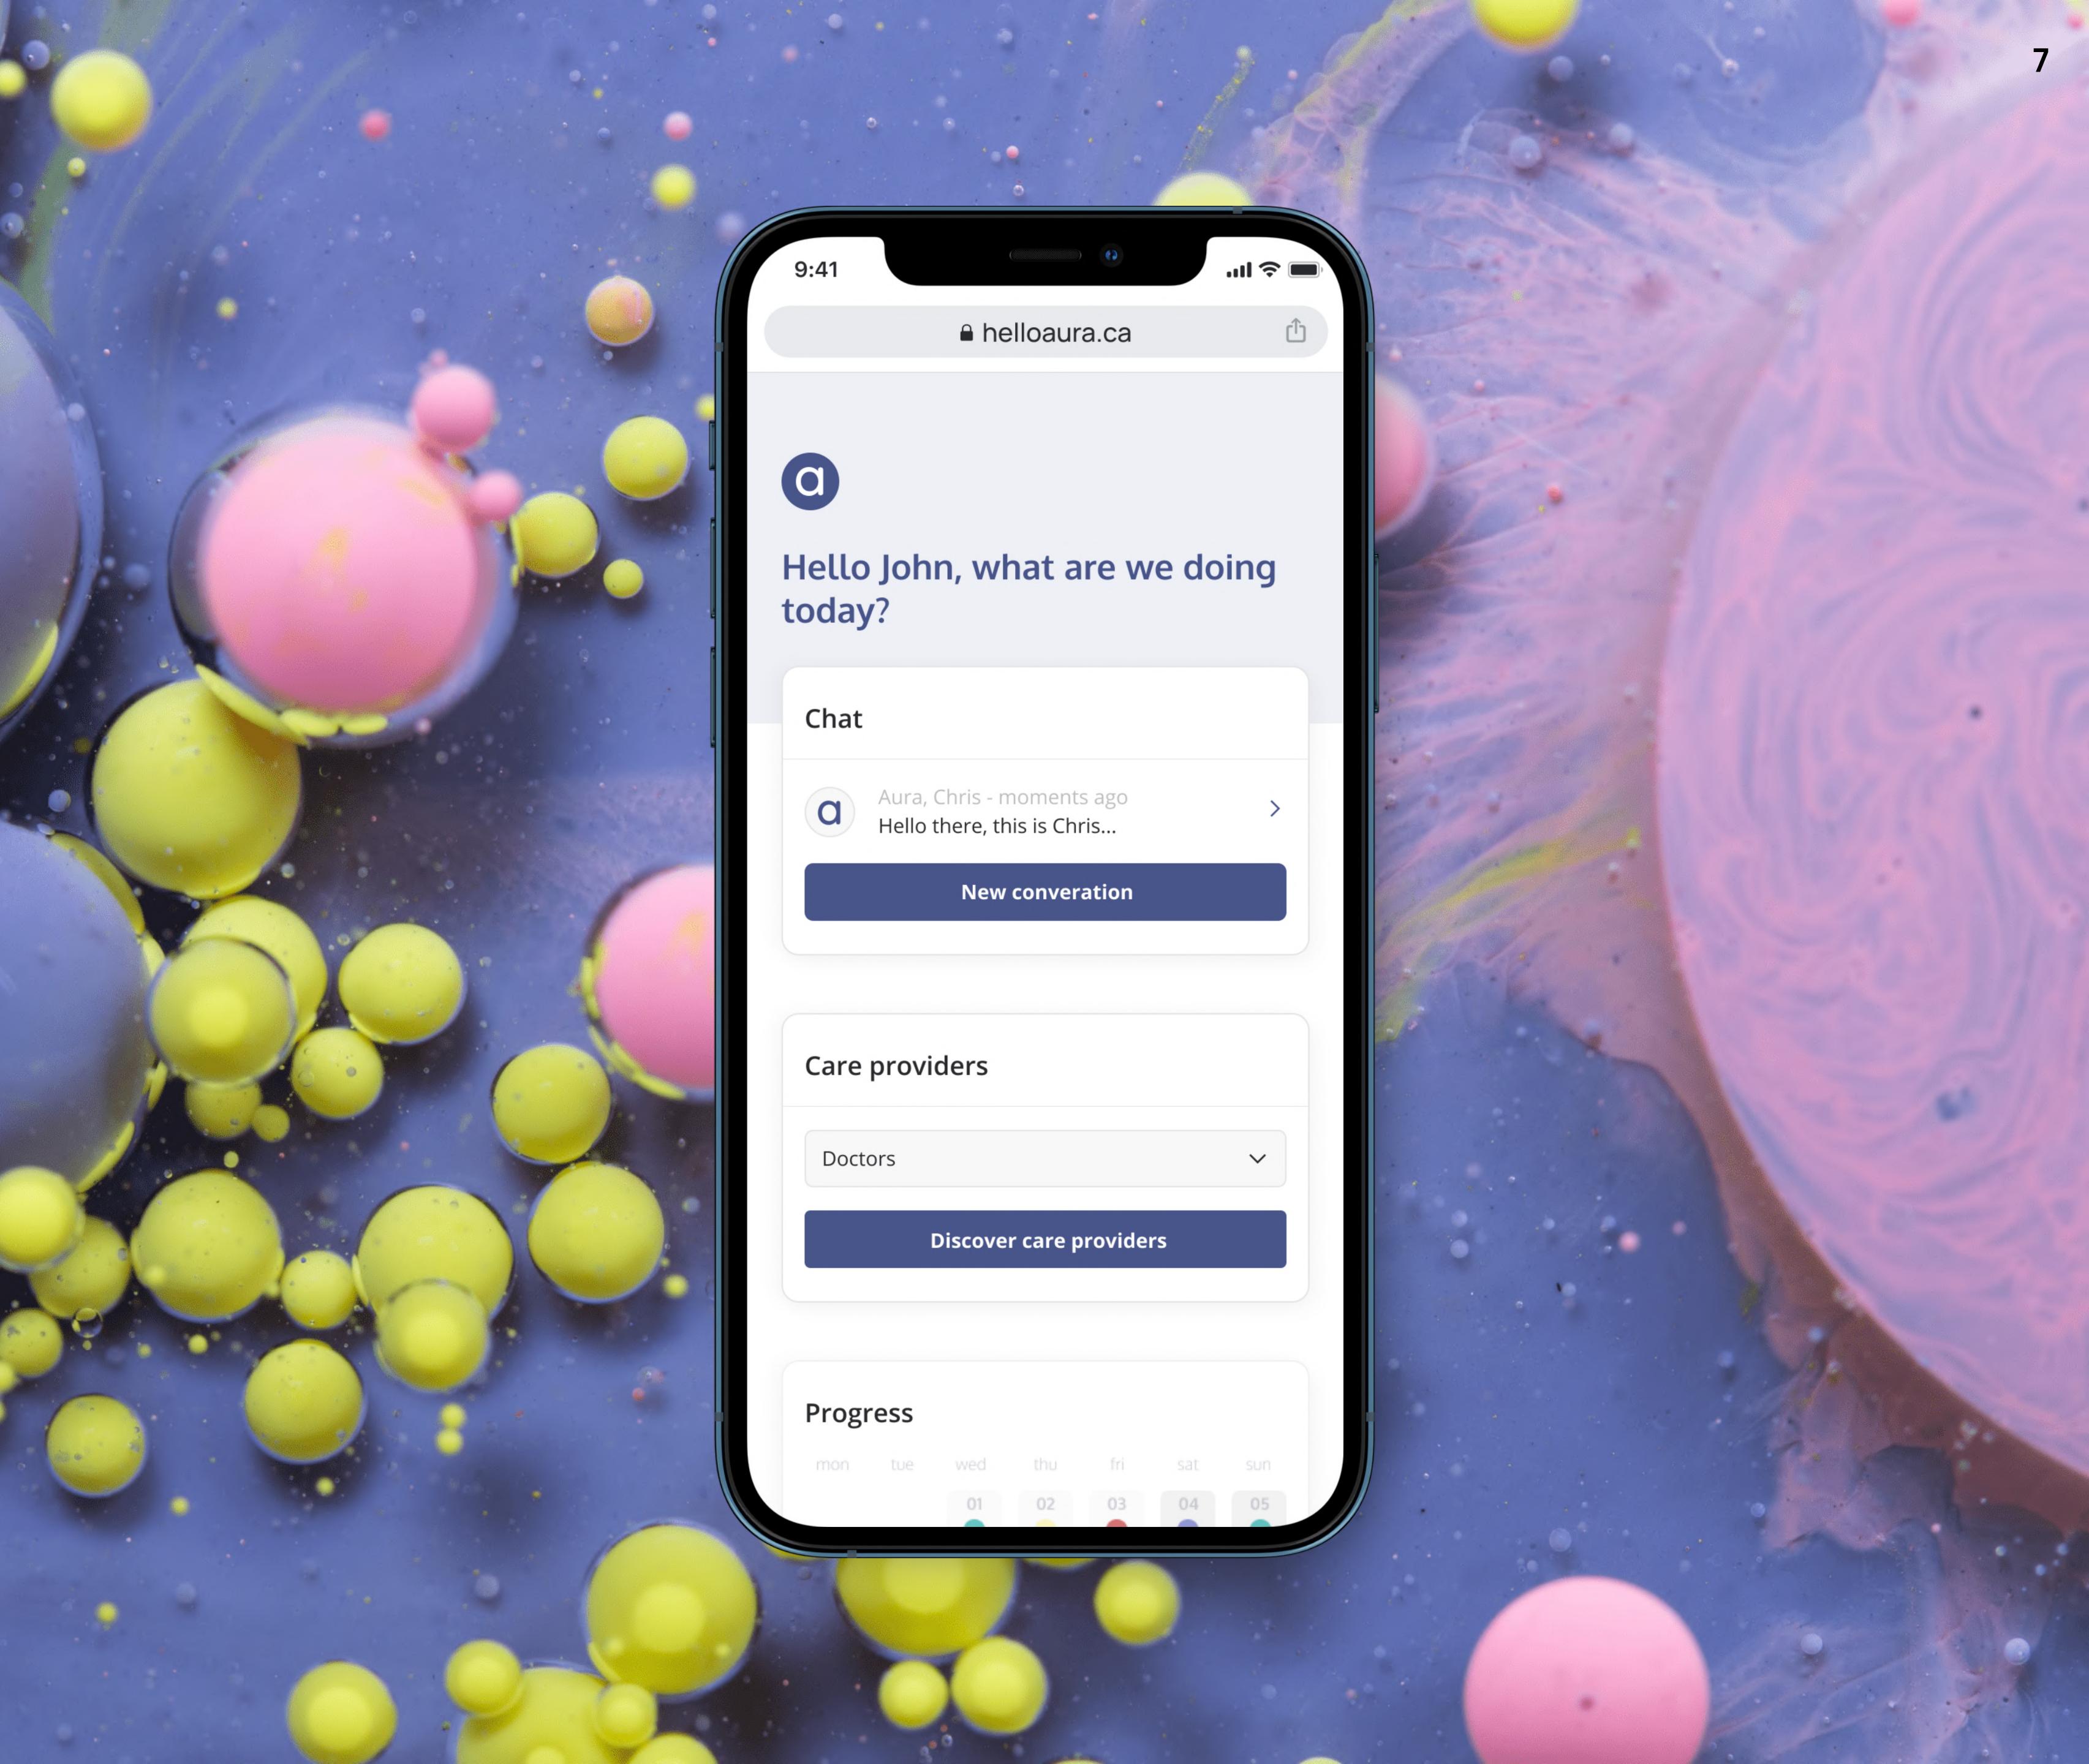

How might we create a **feeling of support and progress** during the treatment journey between appointments?

Solution

Mental health exercises between your appointments

Journey

1. Start with your assessment
2. Receive taylored exercises
3. Track your mood
4. Find professional help when you need it

Product design

Designing a path that will create stickiness

Customer journey mapping

Used the Hooked Model to
create stickiness by design

Version 1

Objectives

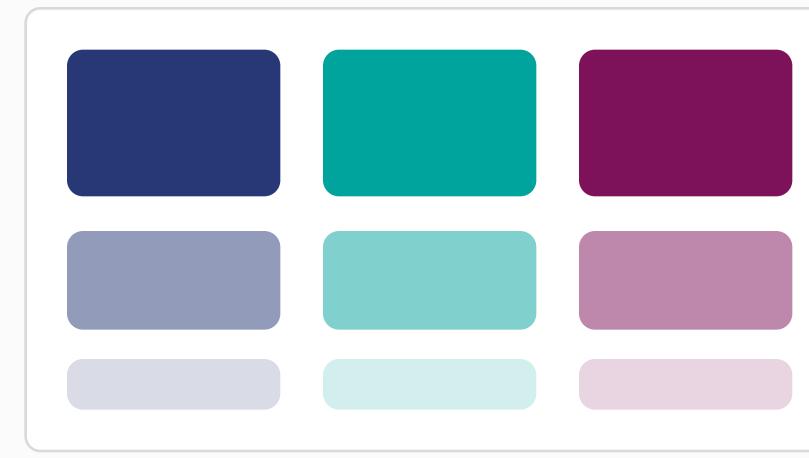

Get feedback on the 8 steps. Improve the product before moving to the building phase.

Execution

1 week to build the prototype, 1 week to test with interviews.

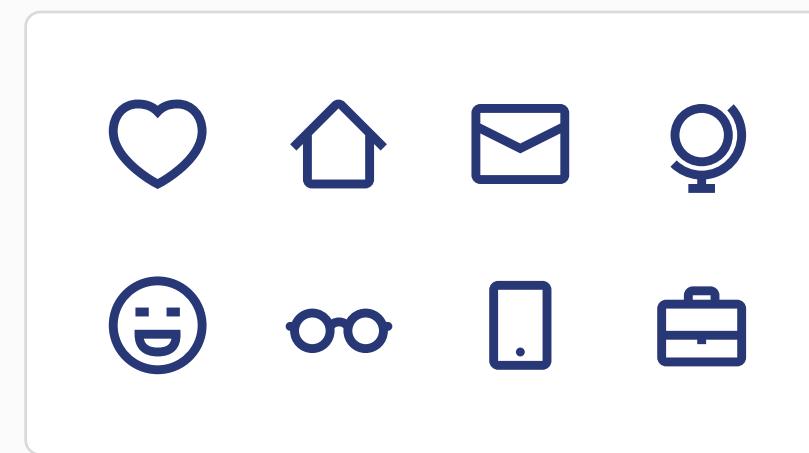

Success

We had specific hypothesis and questions for each of the 8 steps.

Colors

Pastels for empathy, darker colors for anonymity.

Icons

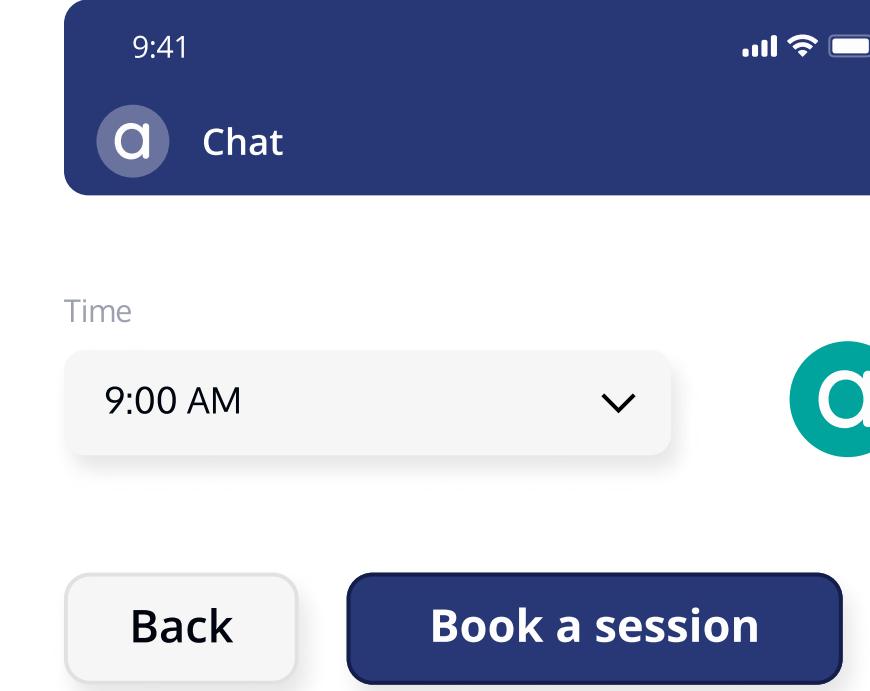

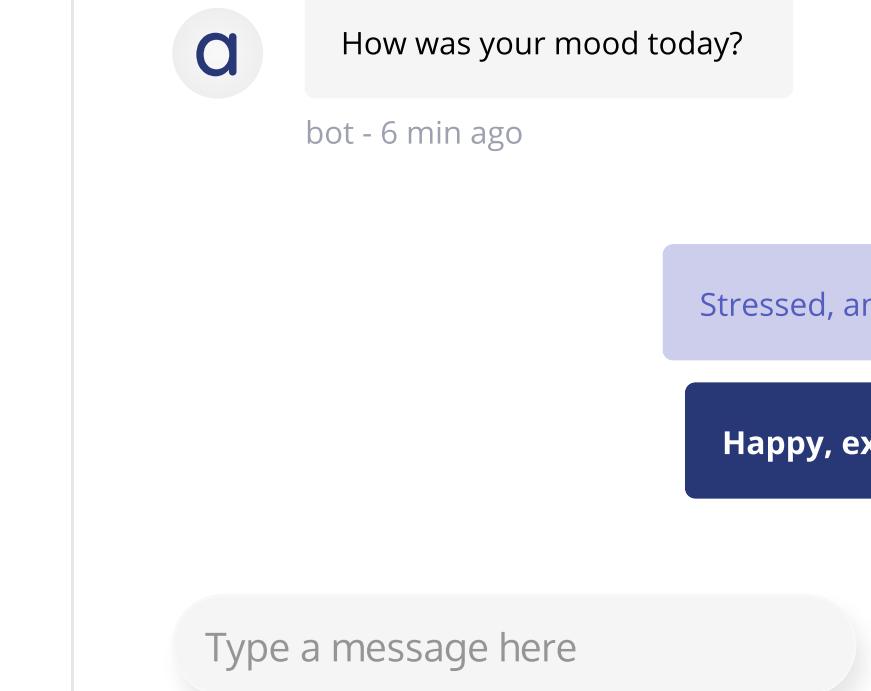

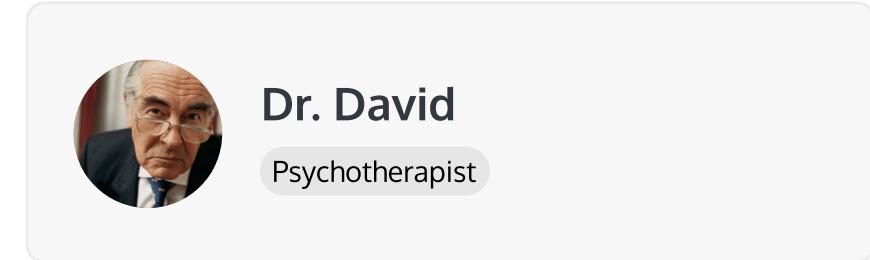

Rounded with sharp ends, professional without rigidity.

Typography

Readable Sans with movement in the headings.

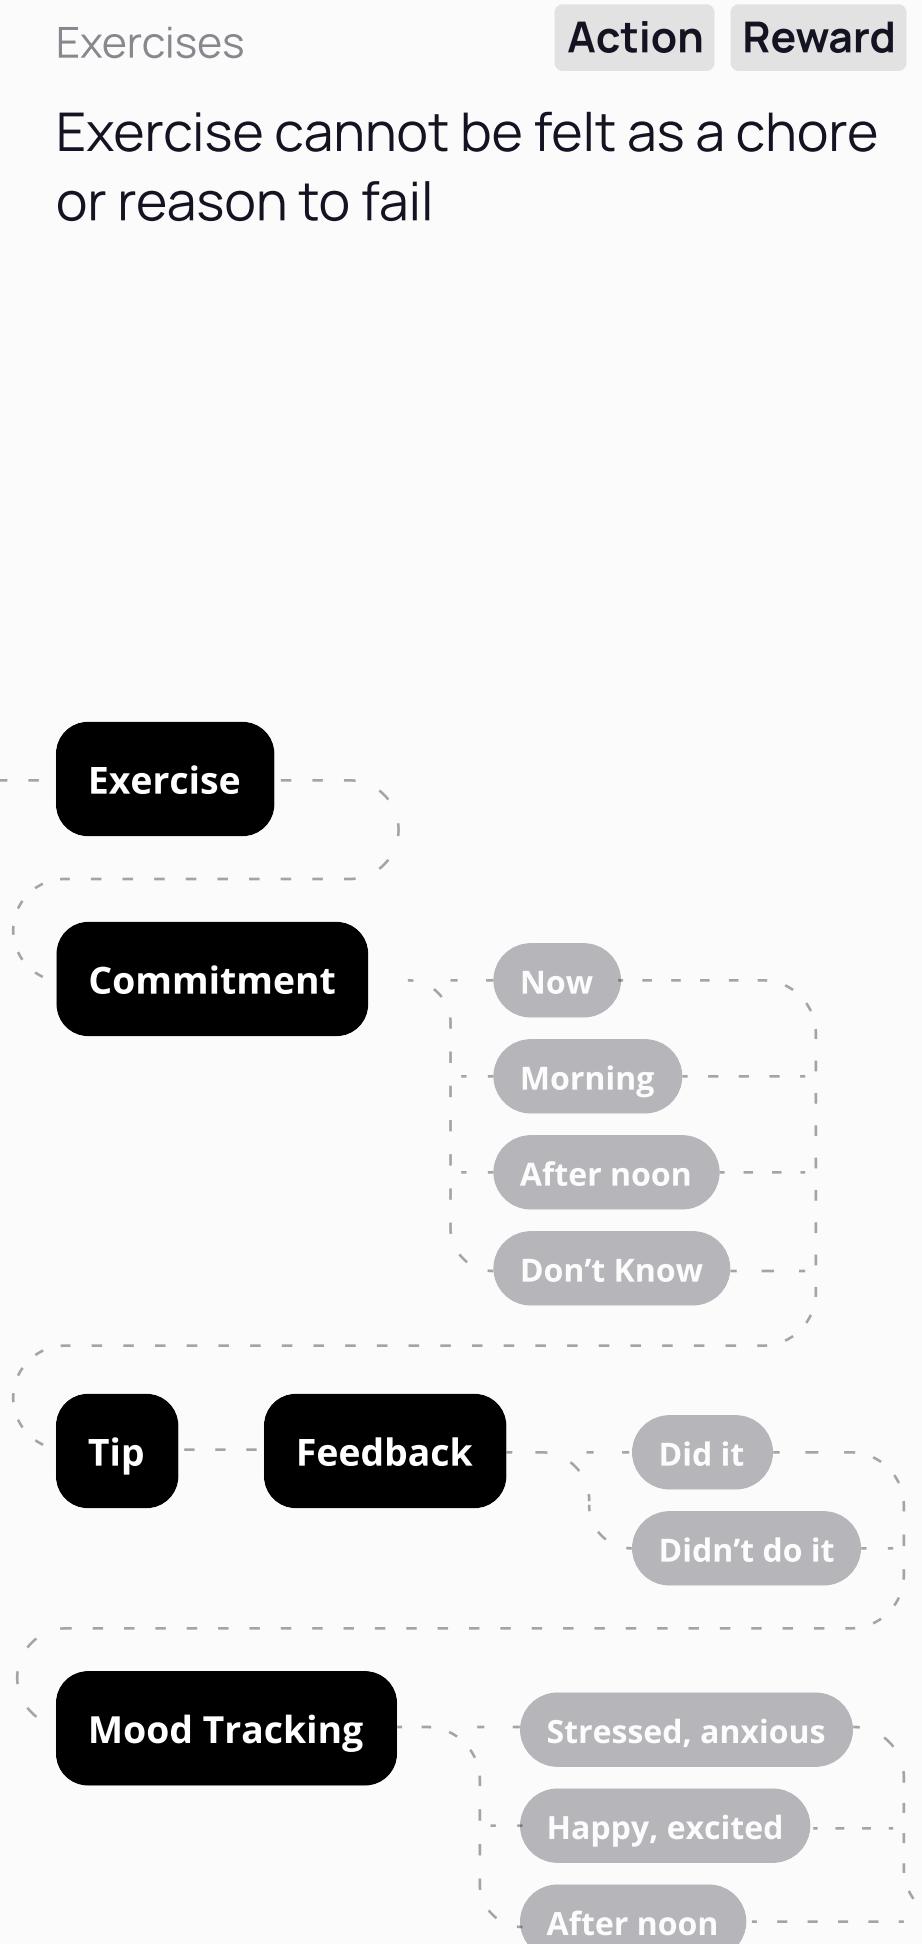

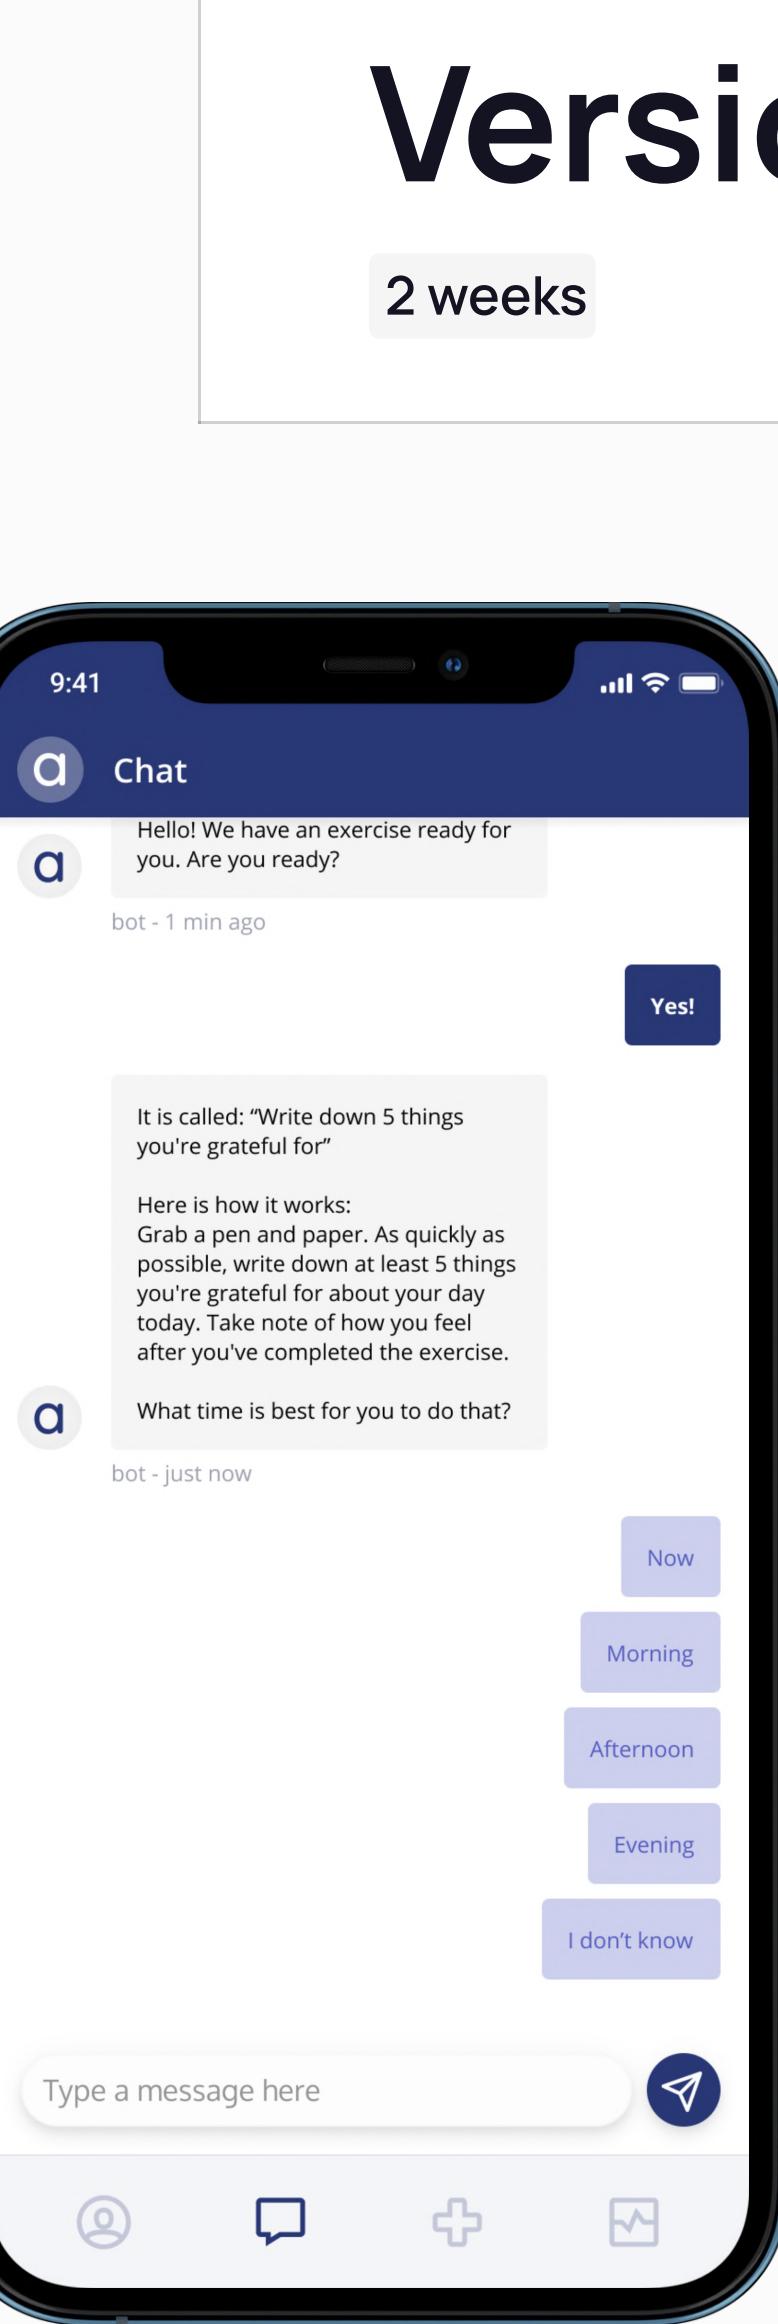

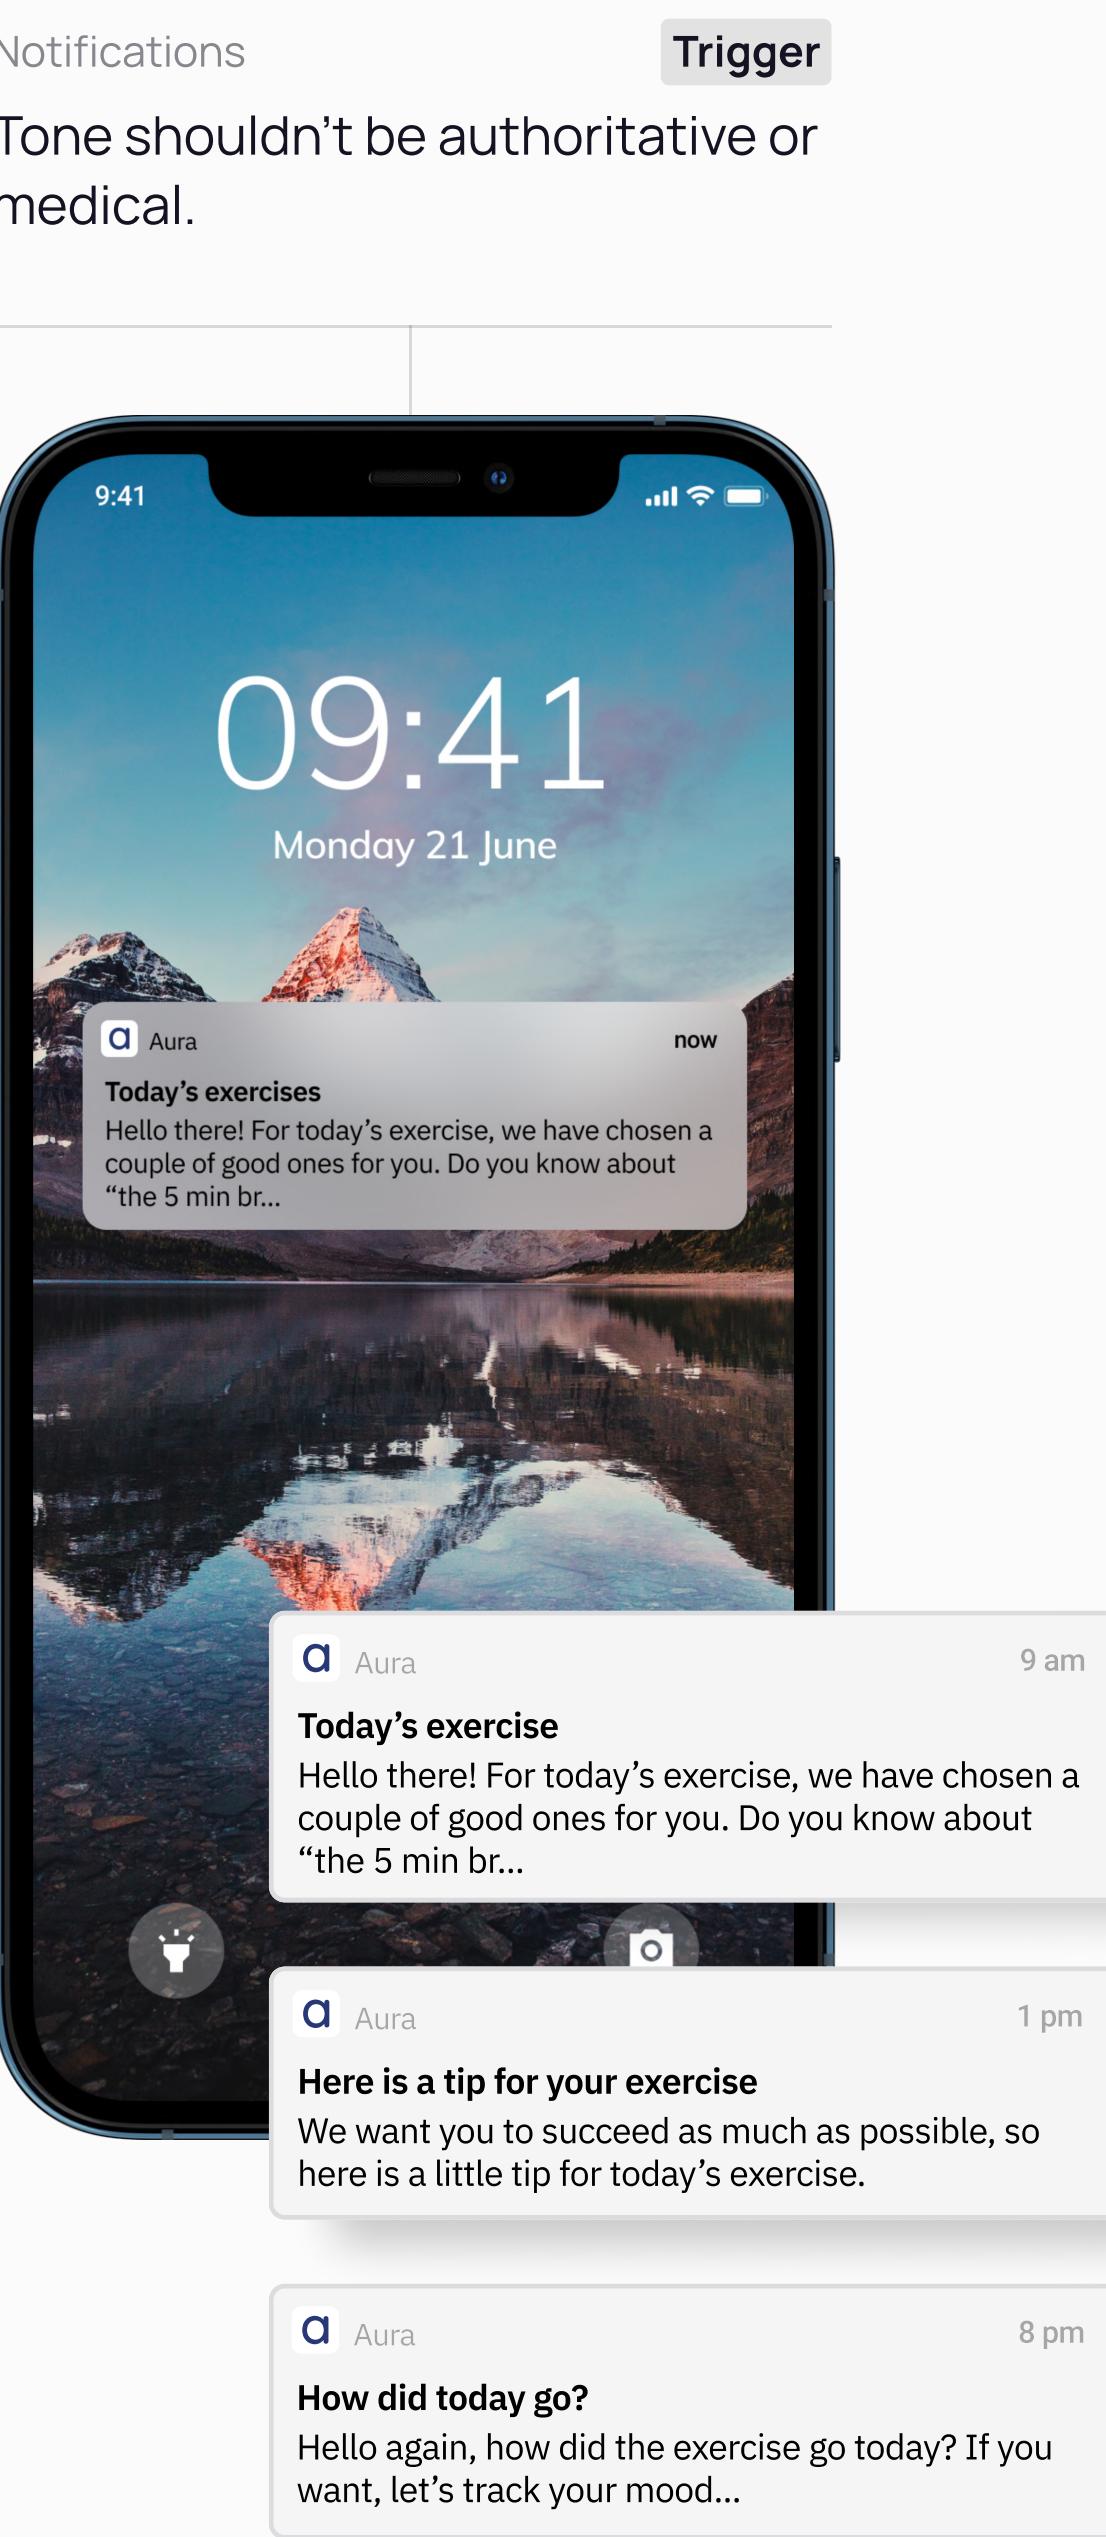

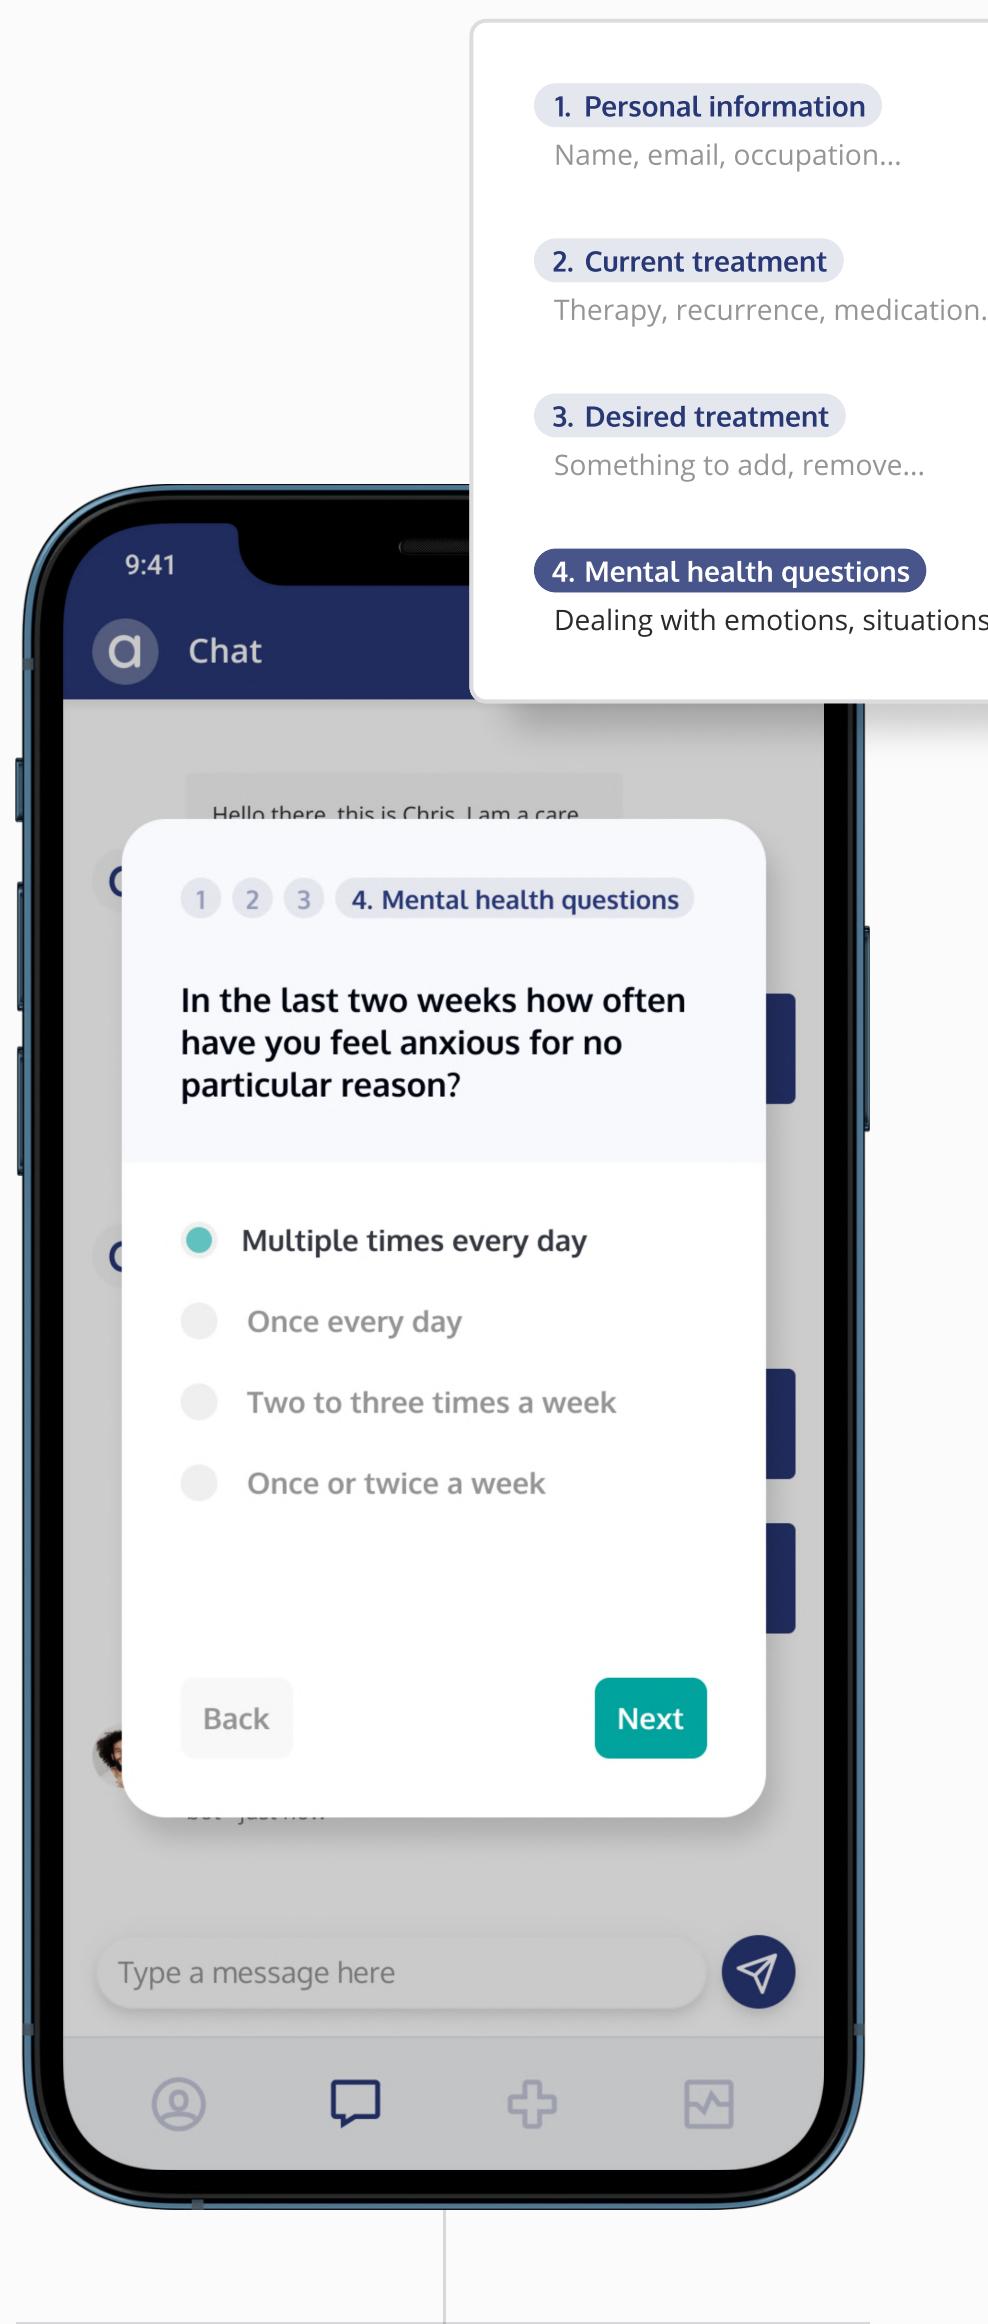

**Get the help you need,
without getting lost.**

Your personal mental health guide helps you find the right mental health treatment plan and stays with you throughout your journey.

Basics elements	Conversational UI	Product-specific elements
		

UI Kit

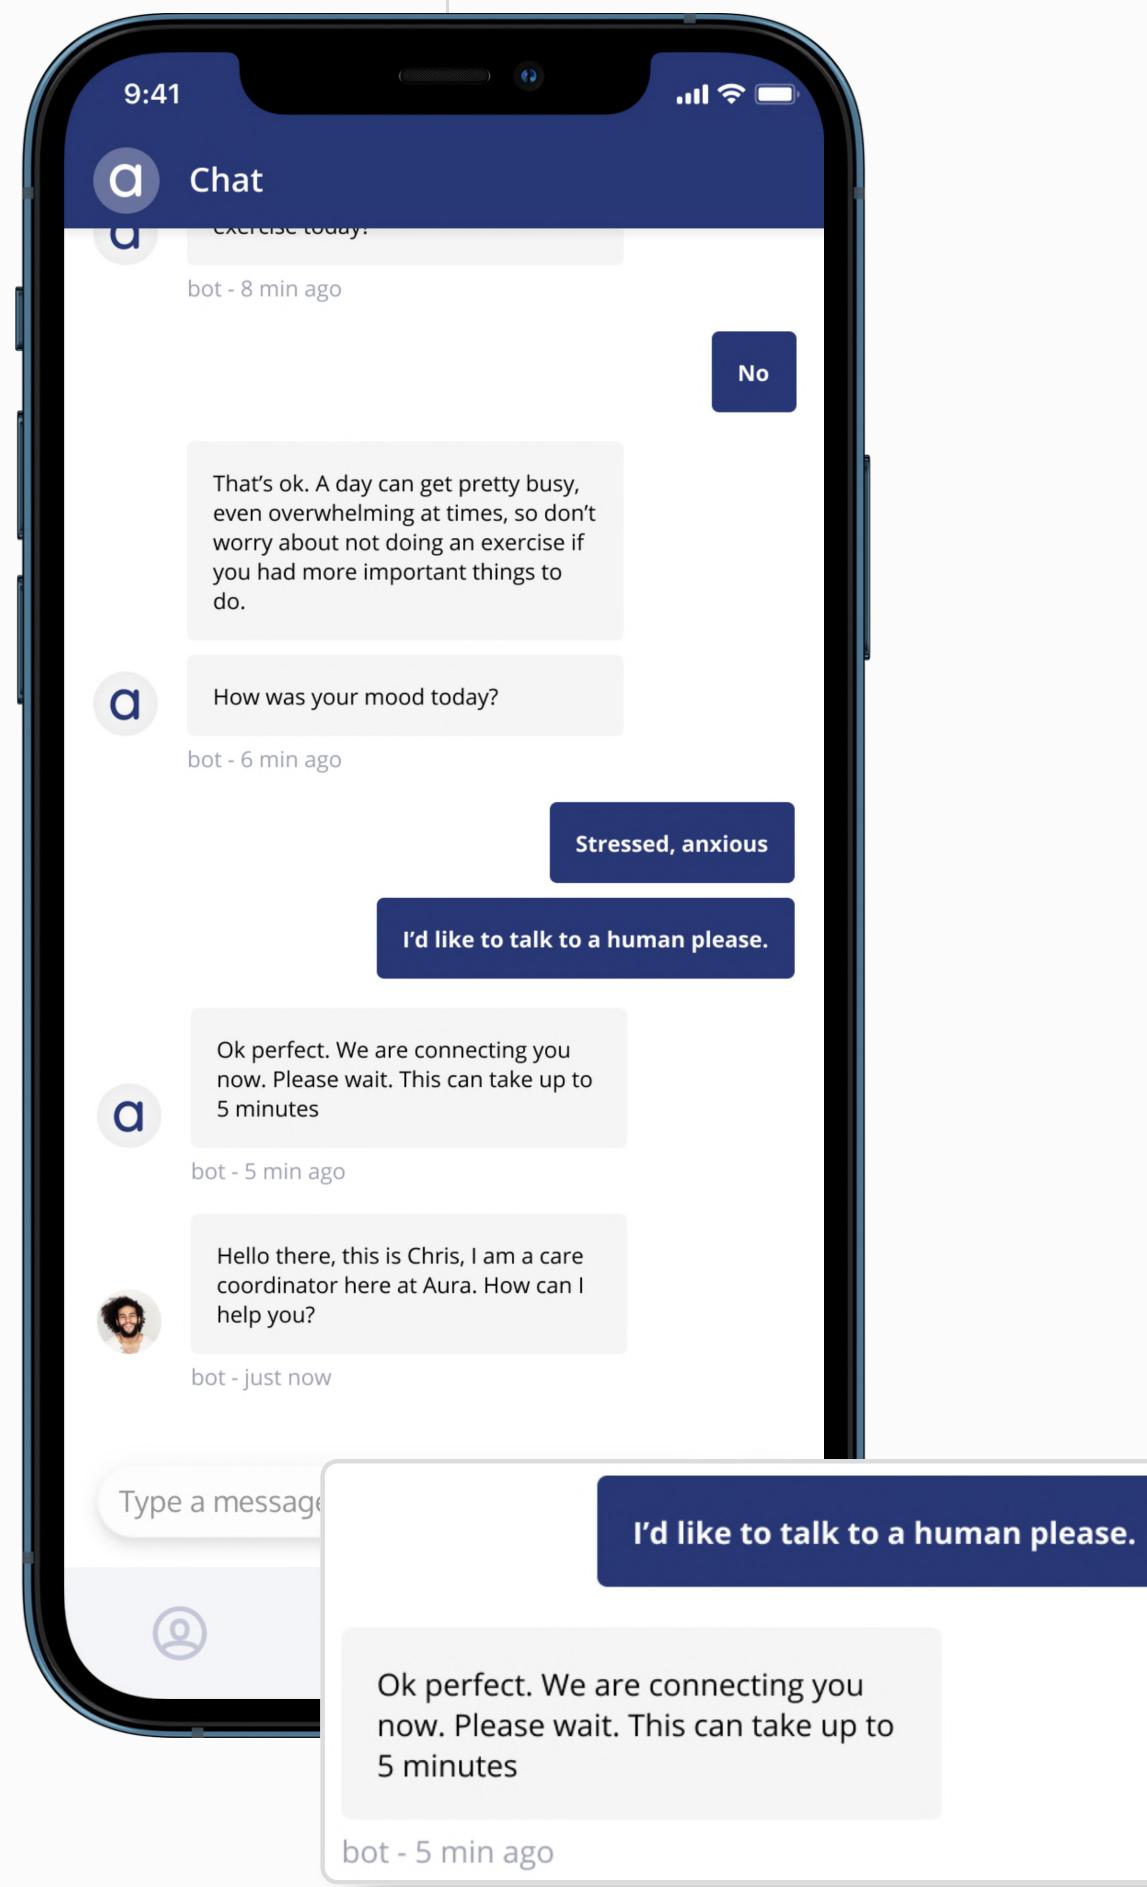

Inspired by Material resources & Atomic principles

Conversion

Trigger

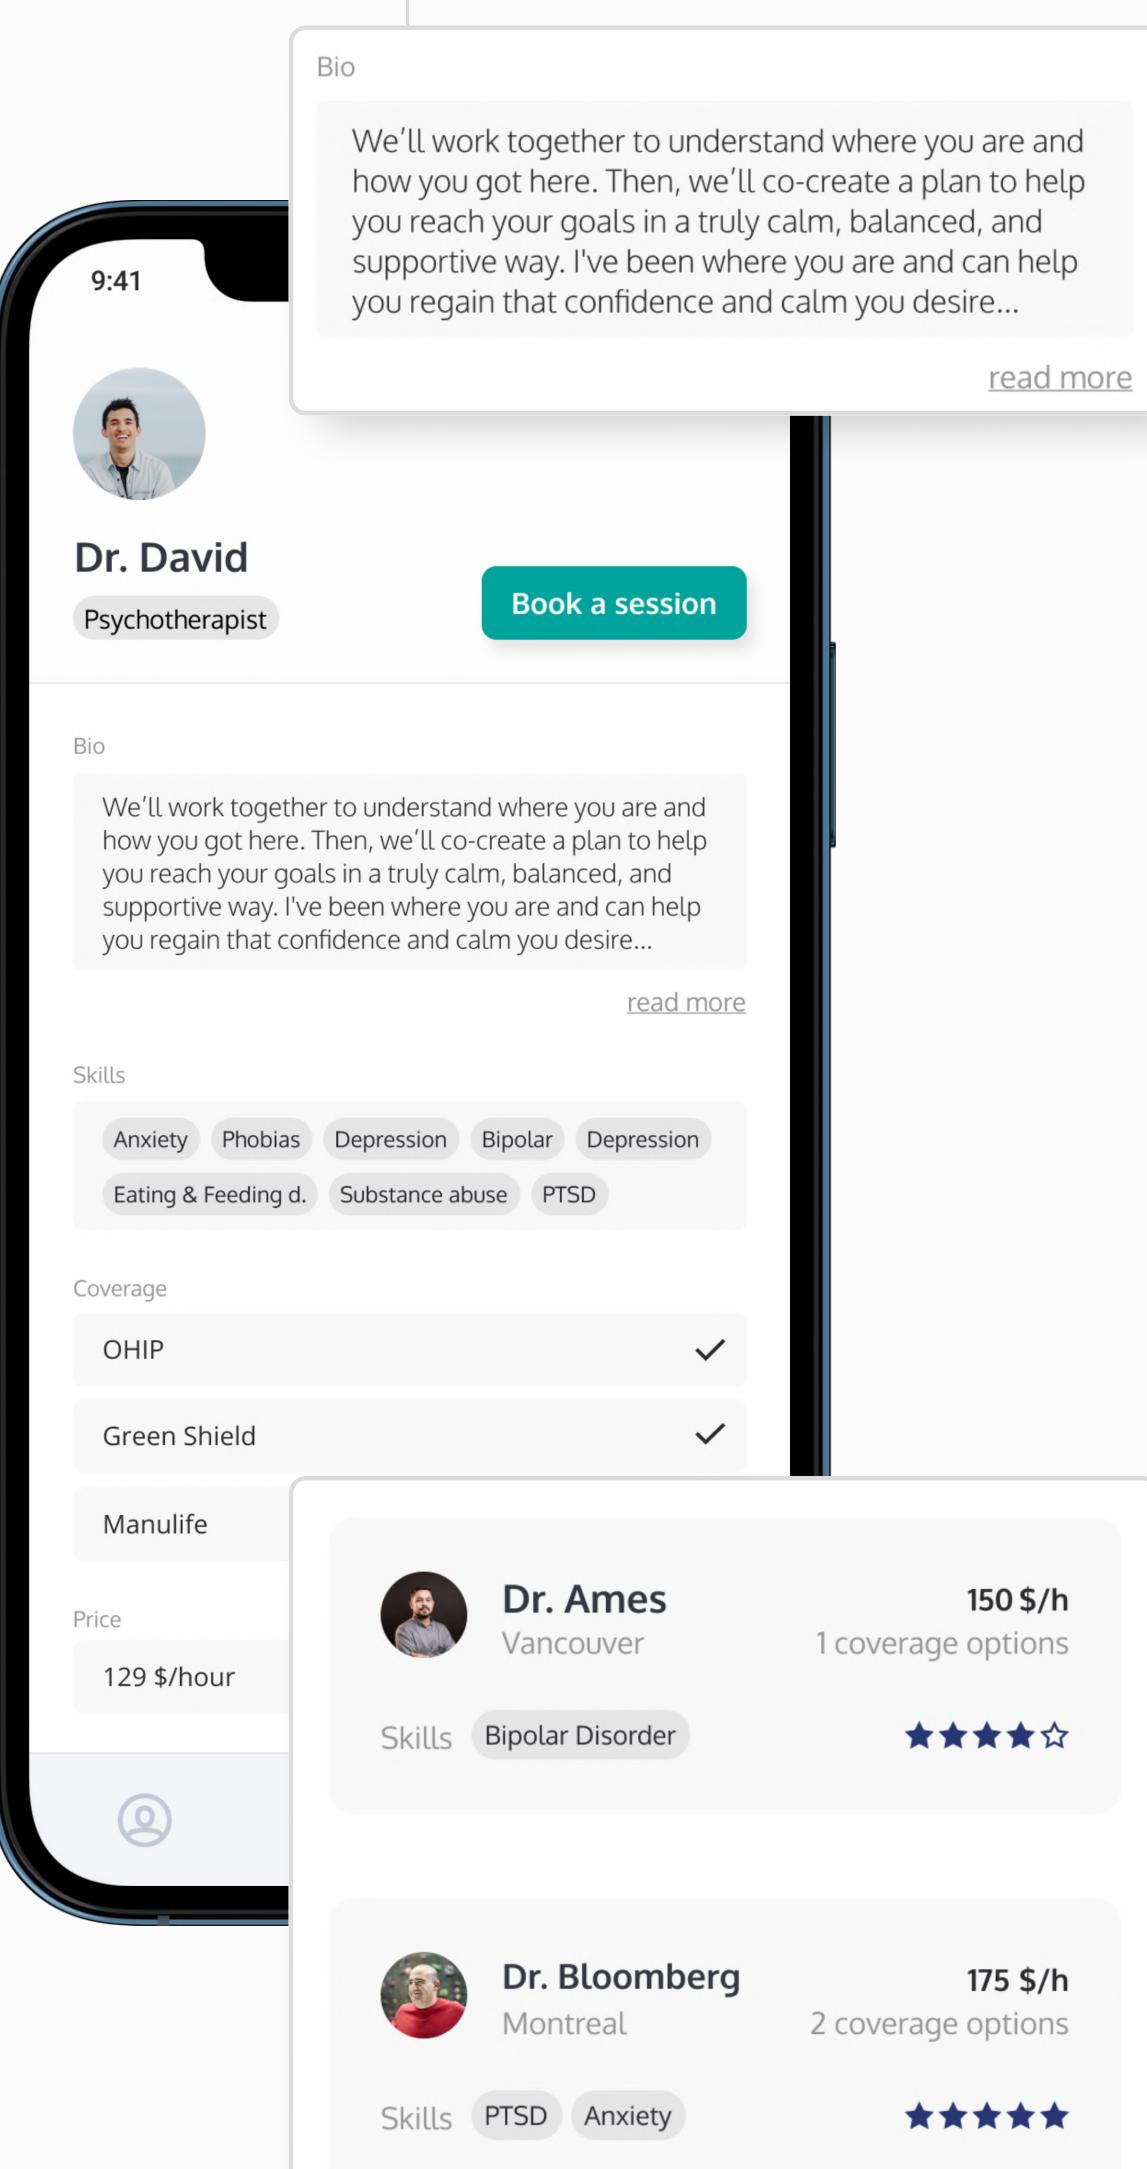

Patient triggers are unknown, a human must be available

Therapy

Action

A bio is not enough to create a connection and reduce anxiety

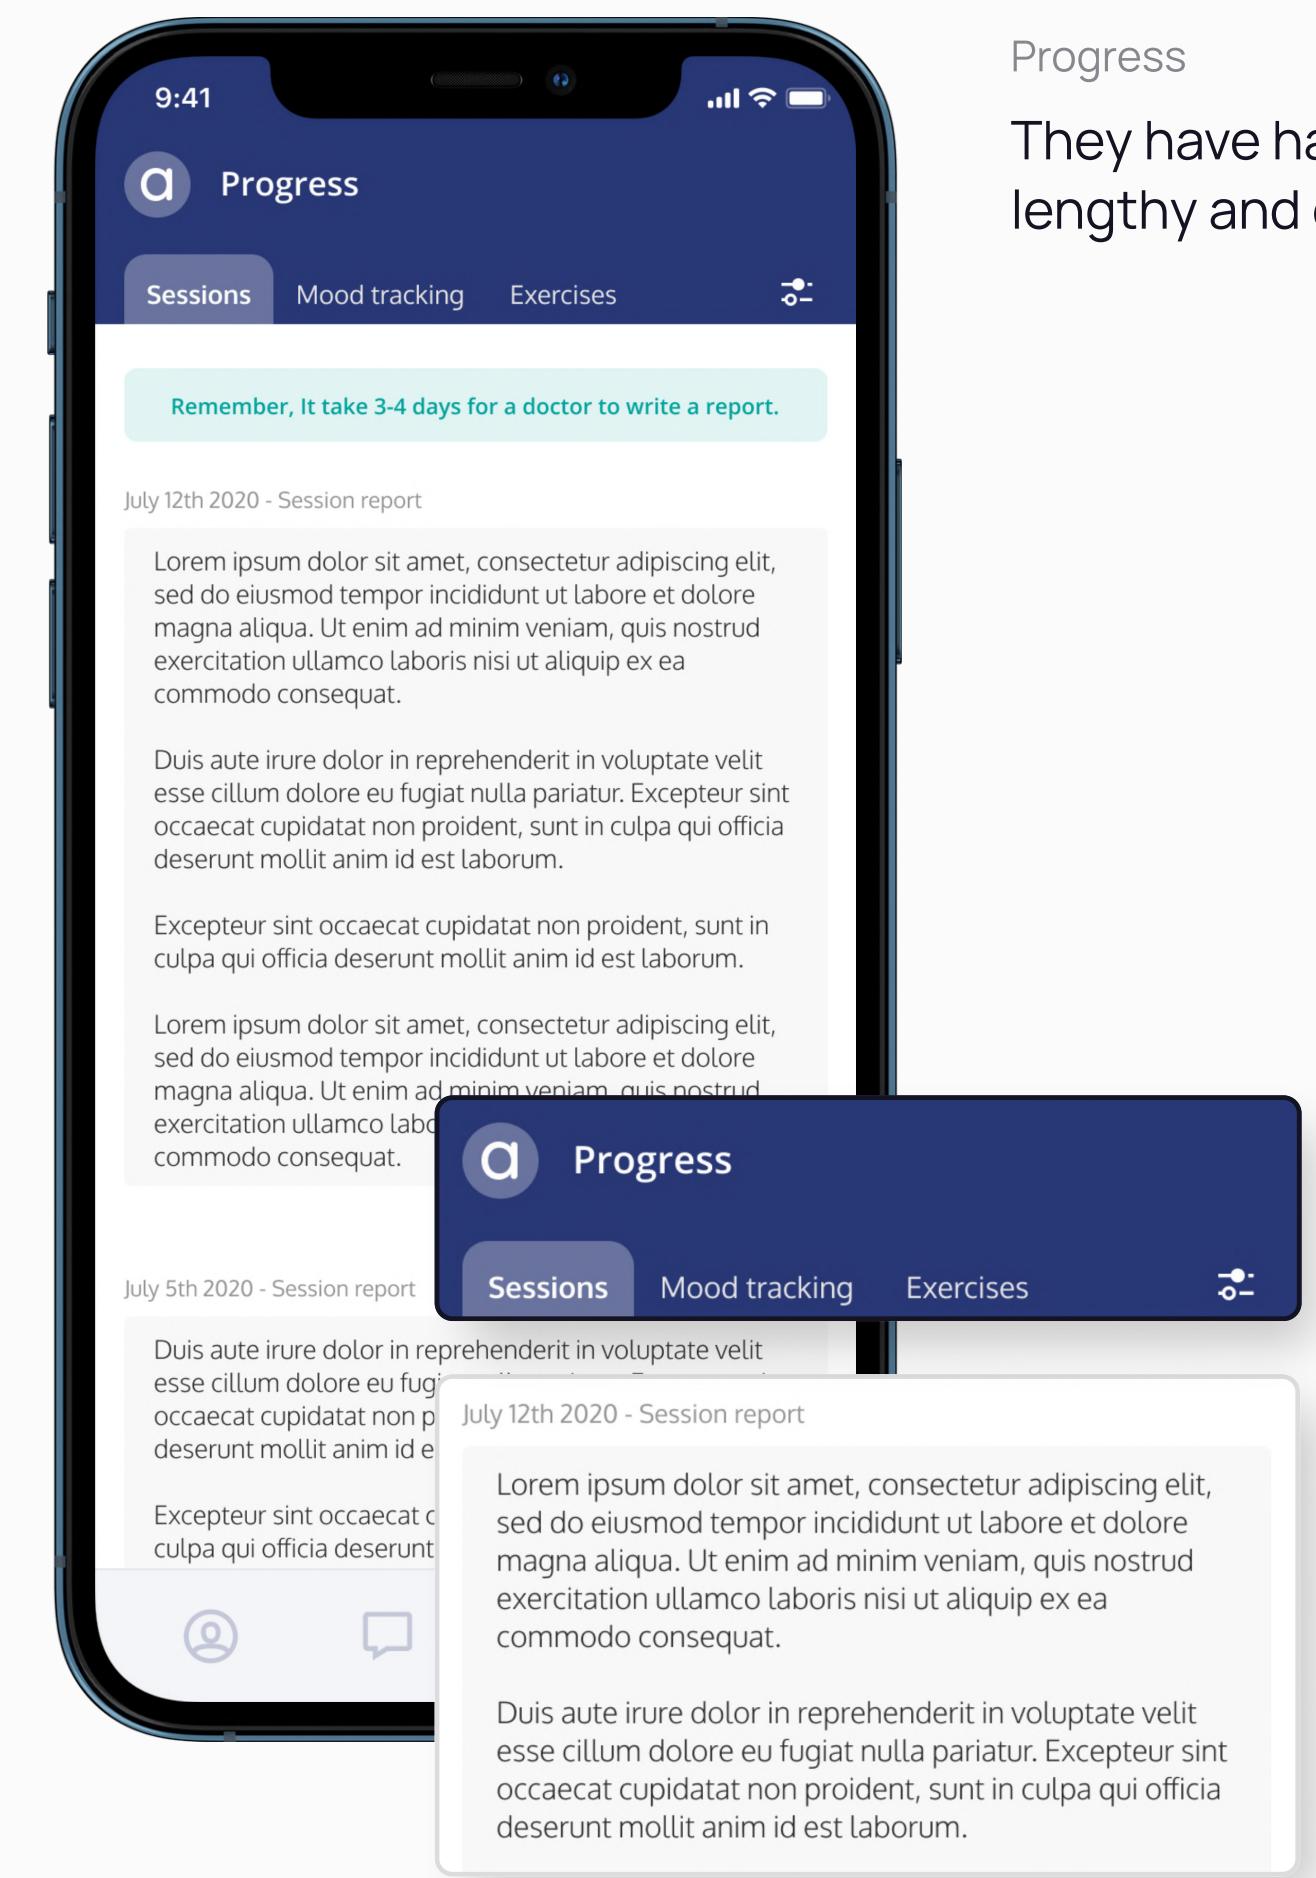

Version 1

2 weeks

Progress

Reward Investment

They have had enough of the lengthy and complex reports

Version 2

Objectives

Proof Of Concept with 10 people during 7 days.

Understand usage & willingness to buy

Success

3/10 people active after 7 days. 1/10 person tries to buy

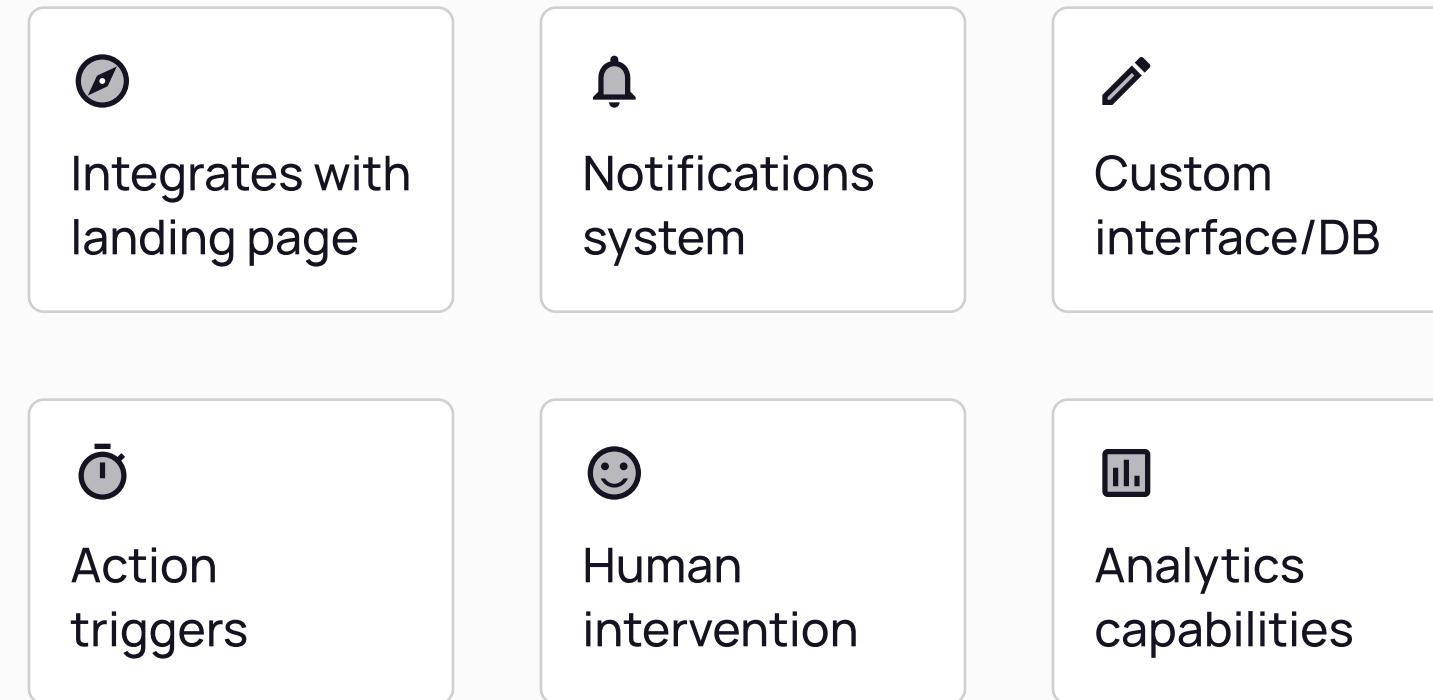

Results

- 😊 Coaching aspect of exercises and tips
- 😊 Friendly tone
- 😢 Progress data should be free
- 😢 Doctors still felt hard to trust

Metrics

Initial signups	56	View progress	2/6
POC signups	12 (20%)	View CC form	1/6
Assessment	6/12 (50%)	Filled CC info	0/6
50% exercises done	3/6		
Browsed providers	2/6		

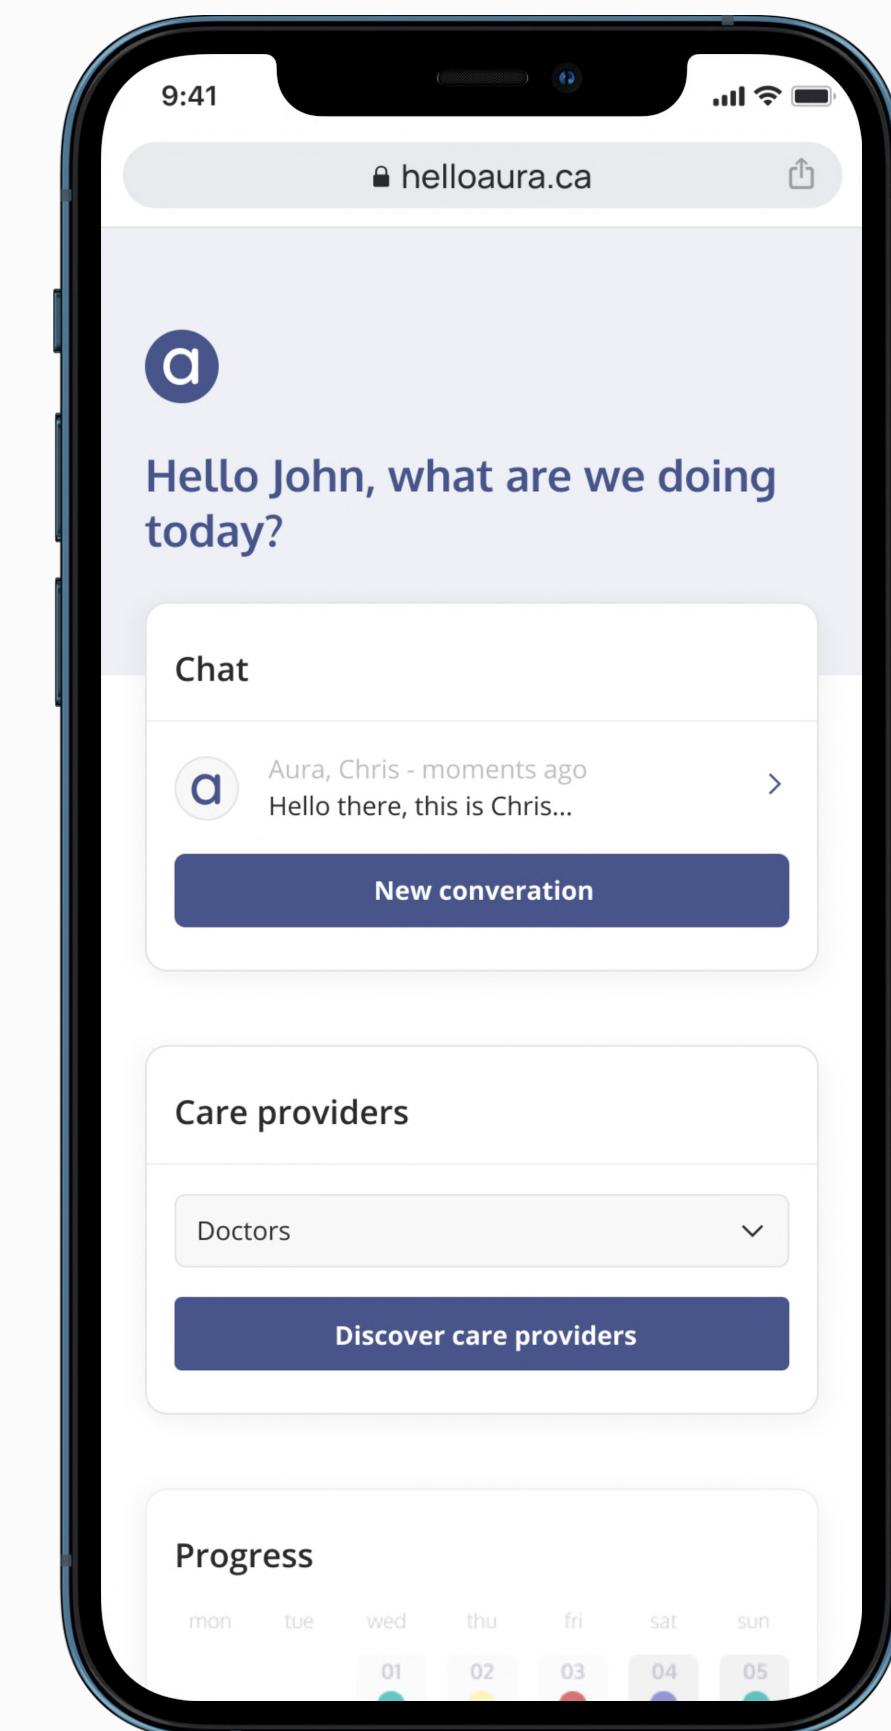

Requirements

Options

*Grey tools: Not selected to build

Intercom

Chose a chat software as our primary product engine.

Technical constraints
Updated the components library to fit the constraints

Doctors Screen:

- Dr. Han:** Montreal, \$129/h, 2 coverage options, Skills: PTSD, Substance abuse, ★★★★☆.
- Dr. Ames:** Vancouver, \$150/h, 1 coverage option, Skills: Bipolar Disorder, ★★★★☆.
- Dr. Bloomberg:** Montreal, \$175/h, 2 coverage options, Skills: PTSD, Anxiety, ★★★★☆.

Dr. David Profile:

- Dr. David:** Psychotherapist, Bio: "We'll work together to understand where you are and how you got here. Then, we'll co-create a plan to help you reach your goals in a truly calm, balanced, and supportive way. I've been where you are and can help you regain that confidence and calm you desire...", [read more](#).
- Skills:** Anxiety, Phobias, Depression, Bipolar, Depression, Eating & Feeding d., Substance abuse, PTSD.

Progress Screen:

Calendar grid showing availability from Monday to Sunday. A legend indicates colors for different days: red, teal, yellow, purple, blue, grey, and green.

Exercises streak: 1, Track My Mood streak: 1, [Check my progress](#).

Doctors Screen:

- Dr. Han:** \$119/h, 2 coverage options, Expertise: Phobias, Eating & Feeding d.
- Dr. David:** \$129/h, 3 coverage options, Expertise: PTSD, Substance abuse.
- Dr. Ames:** \$150/h, 1 coverage option, Expertise: Bipolar Disorder.

Your Doctor Screen:

- Dr. David:** Doctor • Ajax, \$129/h, 3 coverage options, ★★★★☆, 4.2/5, 78 sessions.

Schedule appointment button.

Version 2

3 weeks

Paywall Screen:

Upgrade needed message: "Your credit card was not charged. Sorry about that. We are currently working on building Aura as fast as we can, but you beat us to it! We have not charged your credit card. Please talk with one of our care coordinators for more information. [Talk to a care coordinator](#)".

Upgrade Screen:

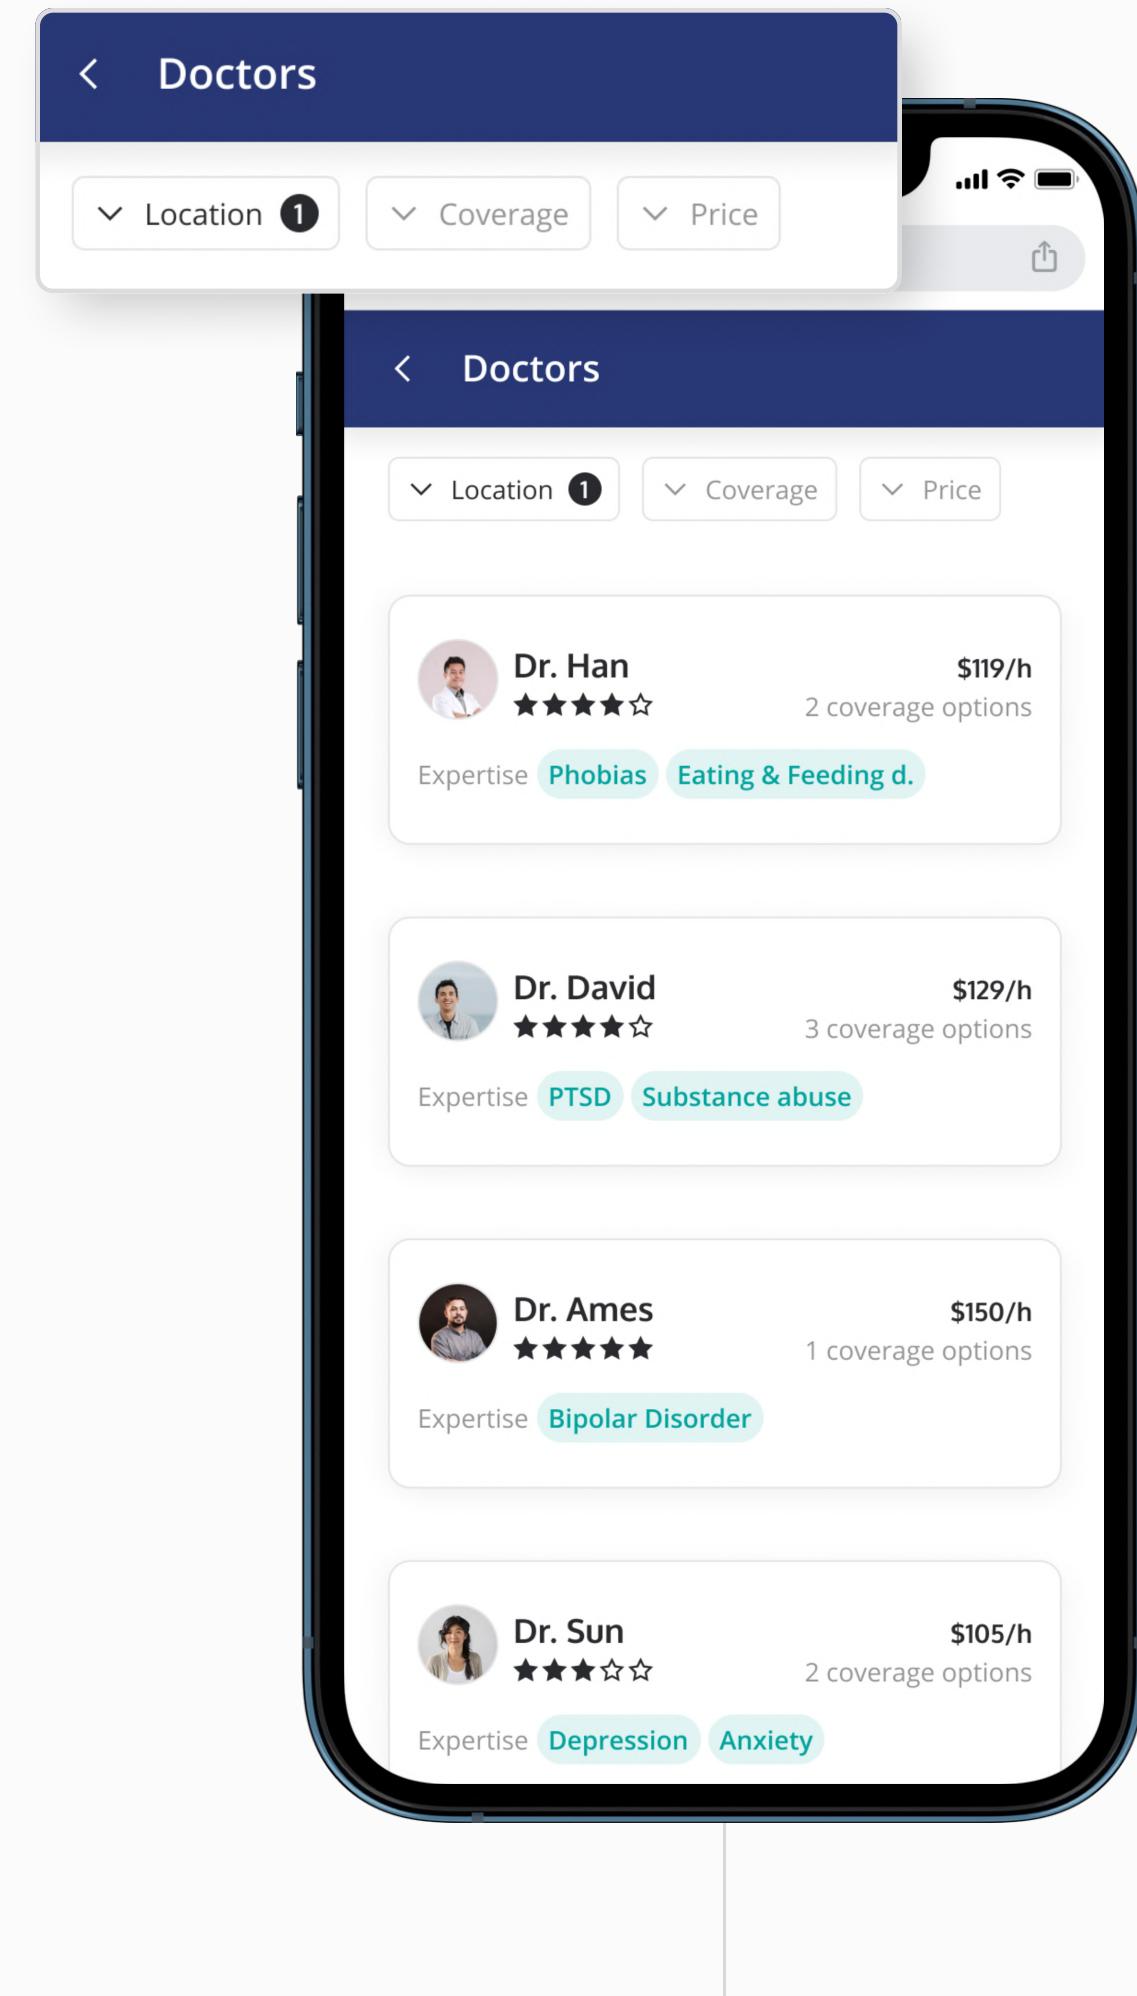

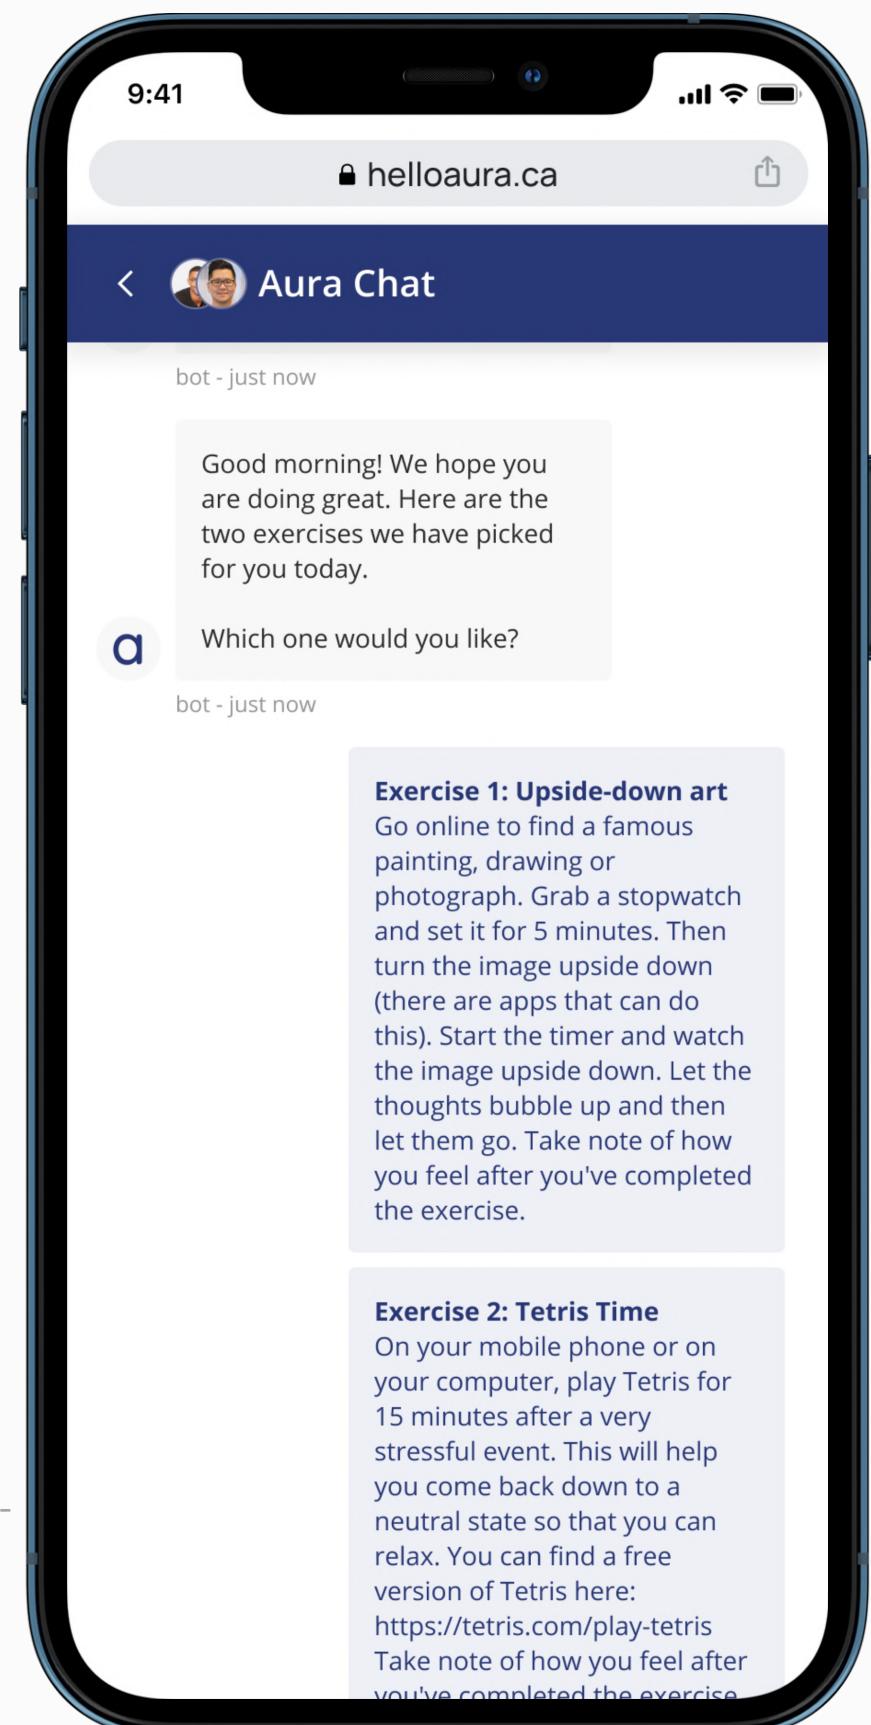

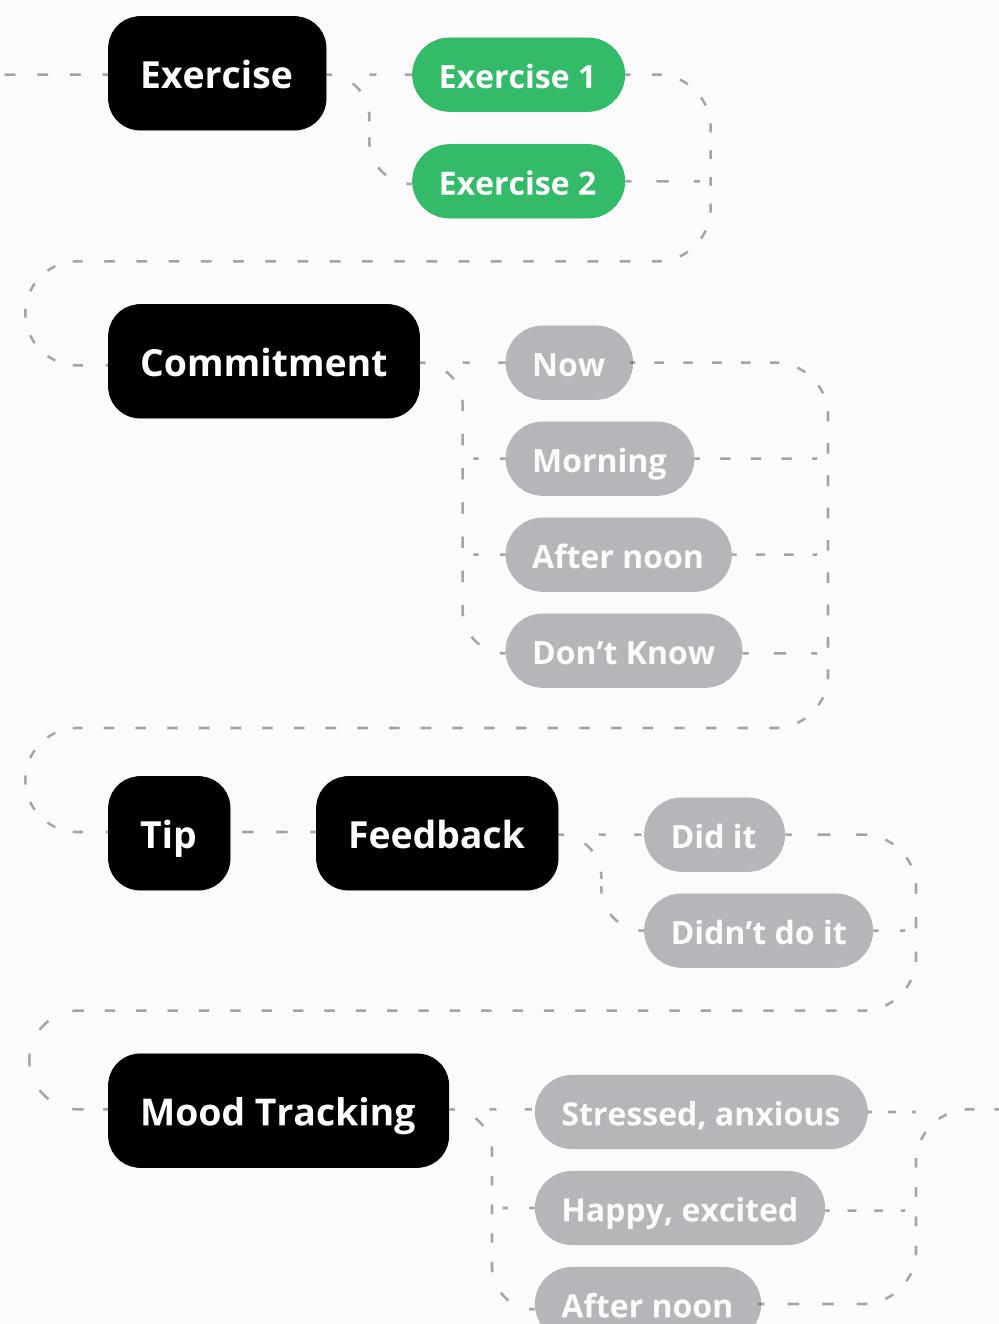

Type of card, Name on card, Card number, Date, CCV fields, [Try Premium Free](#) button.

Version 2

3 weeks

Guiding user behavior

Reduce the feeling of constraint
with exercise choices

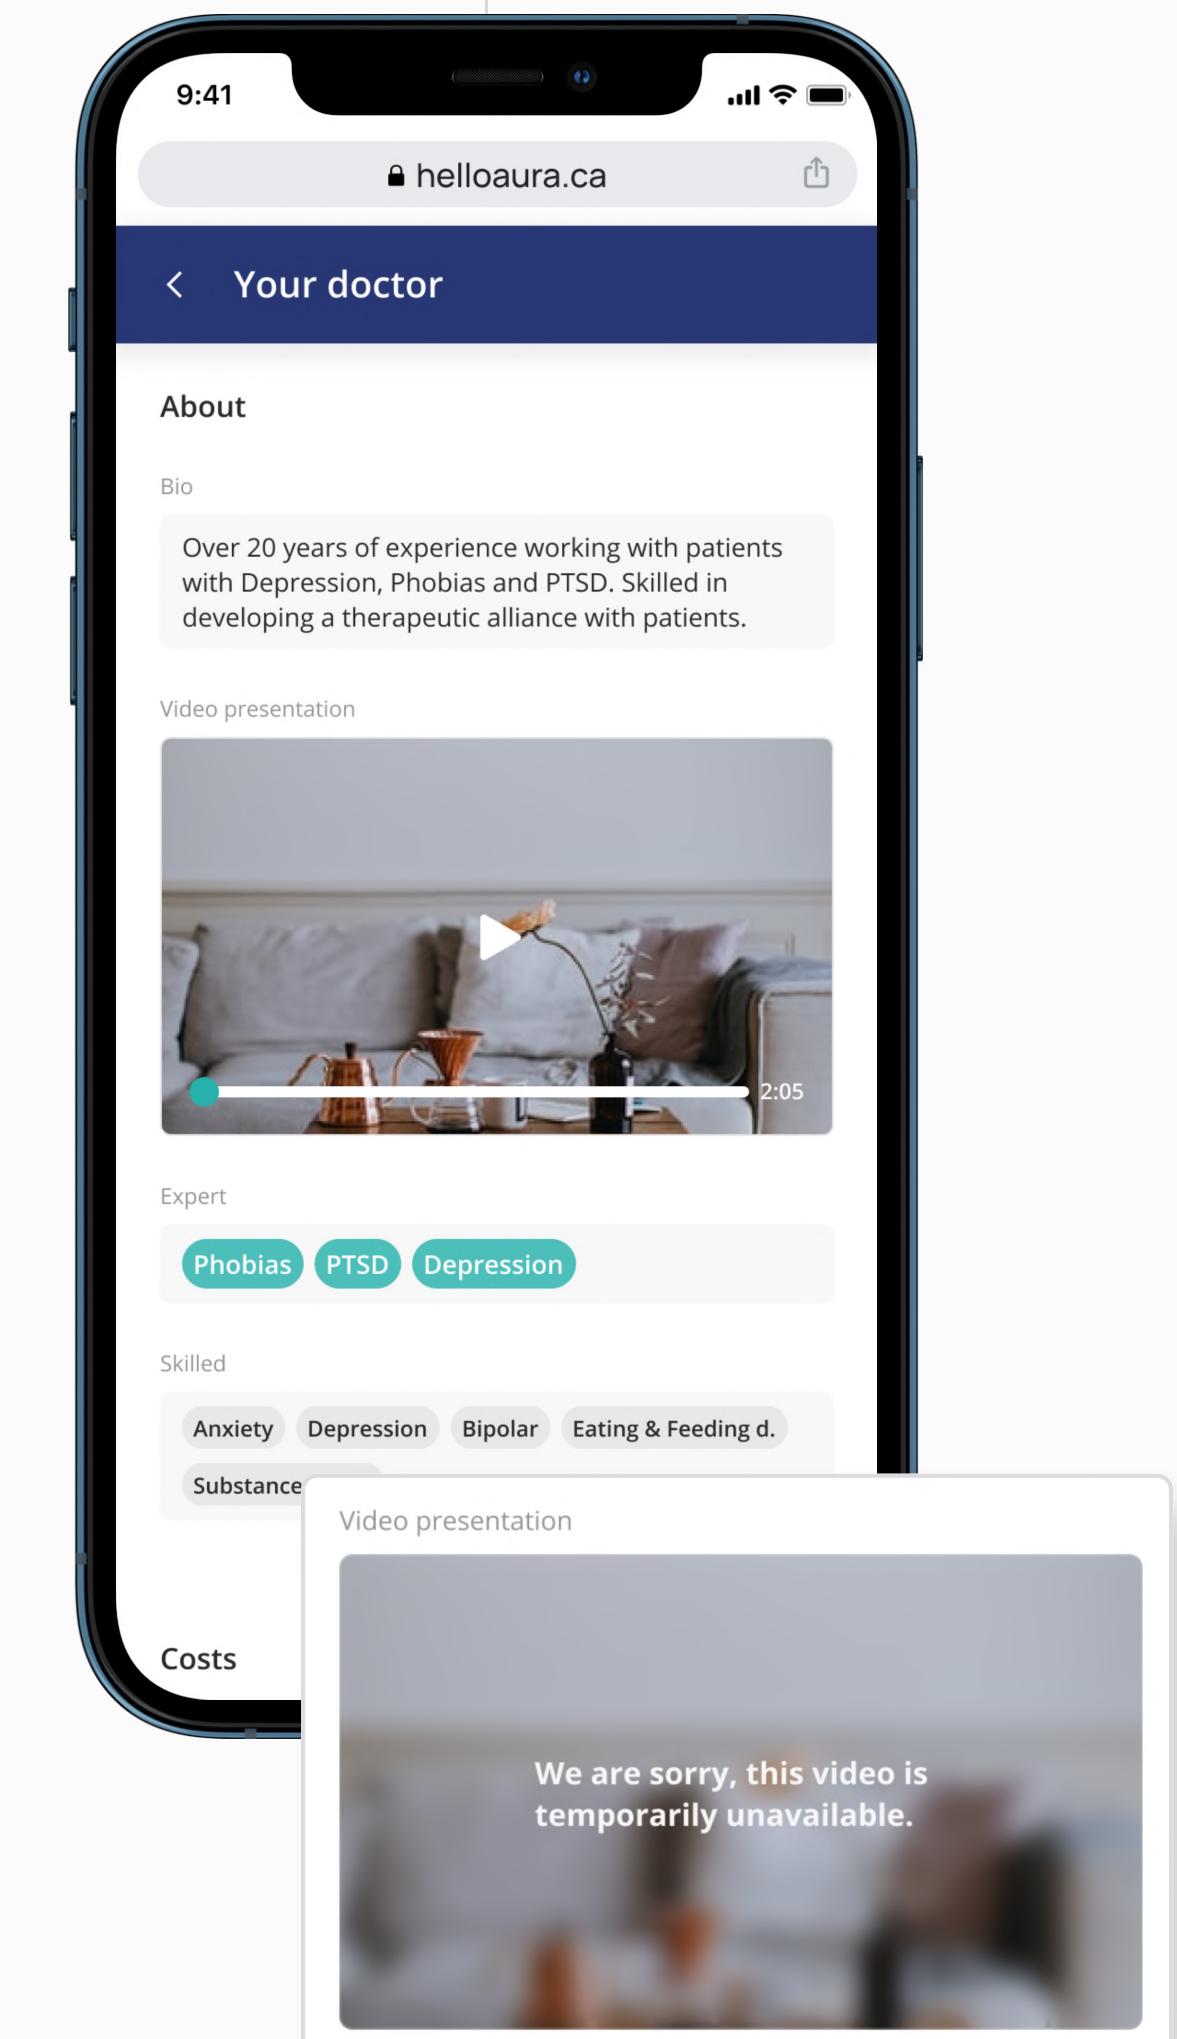

Filters

Made discovery easier with basic filtering

Increasing trust

Introduced doctors more mindfully

Results

What did we accomplish?

1 - Problem worth solving

Gained domain expertise, user empathy. Found real problems that matter.

3
pain points identified

2 - Value Proposition worth building

Quantitatively assessed perceived value of solutions to these problems.

3.3x
more interest

3 - Product qualitative testing

Presented a first end-to-end solution, got concrete feedback that resulted in product improvements.

1
clickable prototype

4.1 - Proof of concept

Tested the product with people diagnosed with various forms of MH.

12
participants

4.2 - Proof of concept

Not the best results, but we had a strong product foundation to move forward and iterate.

25%
activity after 7 days

Learnings

Strategic learning

Design can be used as a way to learn and derisk a project

Design learning

Intro to conversational UI design (find intent & variables)

Product learning

Traction is part of the UX (channels & audiences matter)

For next time

Conversion: do assessment during the exercises

Big acquisition drop at the assessment stage

Engagement: improve rewards inside the app

Product lacked a reward mechanism to be truly validated

Traffic quality: better leverage FB Advertising

Audiences, Optimization, Events, Assets...

Thank you
